Nicholas J. Karolides, 2020-03-09 Reading is a quest Likened to an adventure both metaphoric and real the quest is a journey of discovery The reader s search encompasses the sensations of the experience itself accompanying emotions sense and meaning engendered by the experience and understandings of the self others and the world around Out of curiosity readers also search for an extensive array of information The journey can be envisioned and contemplated again and again after the reading act itself is completed In a meaningful way the reader s quest and its discoveries are life enduring and life fulfilling The purpose of this volume is two fold to establish and explore the essential features of reader response theory and its rendering of the reading process and to acknowledge a philosophy of teaching and to illustrate teaching strategies to evoke and enhance readers responses Understanding the ways in which the reader affects the reading and how the reading

happens will illuminate classroom pedagogy This text establishes and explores the essential features of reader response theory and its rendering of the reading process The essays acknowledge a philosophy of teaching and illustrate a spectrum of teaching strategies to evoke and enhance readers responses including whole and small group discussion story drama readers theatre journal writing scripts letters stories and other writings and body punctuation A case study format is used to illustrate these strategies in action in real classrooms
