New Product Development New Product Development:

New Product Development Tim Jones, 1997 *New Product Development* presents a unique cross discipline approach to new product development and goes further than most product design books by drawing together the various strands that make up total design now the accepted way to develop new products The successful development of new products has become a complex process involving contributions from a range of different disciplines Rarely is one individual responsible for the inception creation and realisation of a new product for today the inherent complexity of products markets and the processes through which they are developed dictates that a number of functions each with their own roles work together to create the product This book presents a cross discipline discussion of new product development its organisation its management the key stages and key functions involved Through the use of six major case studies and numerous mini cases the author demonstrates how a number of manufacturing companies have successfully illustrated separate elements into the new product development process Extensive use of photographs Includes case studies of Rover Flymo Logitech and Polaroid Provides a balanced overview of an often misunderstood process

New Product Development Scott J. Edgett, Rachel Brill, 2011

Lean, Rapid and Profitable New Product Development Robert G. Cooper, Scott J. Edgett, 2009-03-06

Although many companies have introduced product innovation processes they are still struggling to achieve the financial results they expected This book shows how to properly balance the need for speed with the drive for profitability It demonstrates how to maximize the value of a new product portfolio how to streamline the product innovation process and how to achieve growth that is both profitable and sustainable New product success is not simply about developing new products that sell it s about getting them to market quickly with the lowest cost and the highest return Dr Robert G Cooper and Dr Scott J Edgett use their latest research and draw upon their combined 60 years of experience in the field to show you what the companies that continuously win at new products are doing Top performers have discovered how to properly balance the need for speed with profitability With a new process they call NexGen TM Stage Gate R Dr Cooper and Dr Edgett show precisely how you can ensure that your innovation is not only lean and rapid but profitable as well For more information visit www.stagegate.com

Revolutionizing Product Development Steven C. Wheelwright, Kim B. Clark, 1992-06-15 Today a company s capability to conceive and design quality prototypes and bring a variety of superior products to market quicker than its competitors is increasingly the focal point of competition contend leading product development experts Steven Wheelwright and Kim Clark Drawing on six years of in depth systematic worldwide research they present proven principles for developing the critical capabilities for speed efficiency and quality that have worked again and again in scores of successful Japanese American and European fast cycle firms The authors argue that to survive let alone succeed today s companies must construct a new platform with new methodologies on which they can compete Using

their model for development strategies Wheelwright and Clark show that firms can create a solid architecture for the integration of marketing manufacturing and design functions for problem solving and fast action particularly during the critical design build test cycles of prototype creation They demonstrate further how successful firms such as Honda in automobiles Compaq in personal computers Applied Materials in semi conductors Sony in audio equipment The Limited in apparel and Hill Rom in hospital beds have employed recent methodologies to bring new products to market at break neck speed Such innovations include design for manufacturability quality function deployment computer aided design and computer aided engineering Finally Wheelwright and Clark emphasize the importance of learning in the organization Companies that consistently design it right the first time and follow a path of continuous improvement in product and process development have a formidable edge in the crucial race to market

Theory of New Product Development and Its Applications Esen Gurbuz, 2018 A product which can be a physical object or a service should be functional and emotional to satisfy the customer's need and to offer value be delivered as the way customer demanded Also it has to include other specific elements like providing customer services New product is the result of a creative and unique idea that is able to make consumers satisfied In the process of new product development it should not be thought that the change will only be on product physically but also on every aspect of the product The difference between ideas increases production of different goods The different kind of goods can positively affect the customer's opinion about a business When a new business starts to produce a product which satisfies customer's need then the demand of competitor's product which was already in the market may be decreased Establishment of new product development NPD departments and their direct influence in the production process is crucial for businesses They can determine demand and needs of consumers by applying different theories These theories can be classified as i product service systems ii the Kano model iii conjoint analysis iv the product value matrix and v quality function deployment

Accelerating Innovation Marvin L. Patterson, Sam Lightman, 1993 The time for rehashing America's lost battles on the world market has passed Now it's time to address a critical component of the economic battle plan the product development process that creates the products that satisfy customer needs How quickly these weapons of economic

war are developed how competitive they are how timely they are deployed and how supportable they are will determine the failure or success of American business in the 1990s Here is the right book at the right time a concise blueprint to transform product development from a collection of ad hoc activities into an integrated smoothly operating process Written by the Director of Corporate Engineering for Hewlett Packard one of the most successfully innovative companies in America today Accelerating Innovation shows how successful well tested concepts from the manufacturing domain can be readily transformed into the needy world of new product innovation Filled with clear sighted analysis and practical explanations this book will help management unleash innovation and creativity in development processes to meet the urgent need for bringing new technology to customers faster and more effectively than the competition Discover how to cope with the limited life span of today s products anticipate changing consumer needs and desires close the gap between new technology and products that apply it bring leading edge products to market fast eliminate profit threatening gaps between the death of obsolete products and the introduction of new ones and enjoy higher returns on investment Accelerating Innovation provides a results oriented model for transferring to product development the strategies that are moving manufacturers from the old era to the new one Numerous real life examples give you powerful insights into the time based factoring and total quality management principles used so successfully in manufacturing and shows how to implement them in the product development cycle Key chapters address how to shorten the innovation cycle time applying the principle that success springs from focusing on the right issues manage organization change so that change goes where you want it to go and quickly transfer quality principles used on the assembly line to the process of developing raw information and adding value to it reduce innovation time by implementing the cost of quality principle cost as a function of when an error is detected manage information flow and bottlenecks minimize changeover time and much much more Does your organization really have a handle on new product development Are goals objectives processes metrics and controls in place Are you equipped to create new products rationally and systematically while continuously reducing innovation cycle times Accelerating Innovation presents new thinking that will help you answer these questions with a resounding yes In product development doing business the same old way is a formula for disaster The time to act is long before the livelihood of the product development function is ever threatened And if a company is trying to catch up then it has to improve faster than its toughest competition if it ever expects to win Finally here is a guide that can give you the critical advantage you need for success in product development success that is no longer a luxury but a necessity for survival
