Newport Through Its Architecture James L. Yarnall, 2005 A comprehensive architectural history of America's greatest living architectural laboratory

Governor's Houses and State Houses of British Colonial America, 1607-1783 Hoke P. Kimball, Bruce Henson, 2017-05-11 This comprehensive survey of British colonial governors' houses and buildings used as state houses or capitols in the North American colonies begins with the founding of the Virginia Colony and ends with American independence. In addition to the 13 colonies that became the United States in 1783, the study includes three colonies in present-day Florida and Canada: East Florida, West Florida, and the Province of Quebec, obtained by Great Britain after the French and Indian War.

Newport Gardner's Anthem Edward E. Andrews, 2025-10-15 Newport Gardner's Anthem explores the remarkable life of Occramer Marycoo, an enslaved African who went on to become one of early America's most important Black leaders. In the mid-eighteenth century, Marycoo was taken from West Africa to Newport, Rhode Island, where he was forced into racial bondage and given a name that symbolized the power that his new city and new enslaver held over him, Newport Gardner. In this powerful book, Edward E. Andrews pieces together newspaper articles, church records, letters, and Gardner's own writings to tell the story of his life. After acquiring his freedom via a winning lottery ticket in 1791, Gardner became a kind of Founding Father for Newport's free Black community. He established and led several Black benevolent organizations that helped the community navigate the complicated waters of freedom as Rhode Island slowly began the process of emancipation. He became a popular educator to young Black Newporters and also emerged as a key religious figure, serving as a long-standing pillar of Newport's First Congregational Church and later founding an independent Black church in the 1820s. His final act was leading a group of about three dozen Black New Englanders to Liberia, in hopes that a new start in Africa would be better than the discrimination they faced in America. A richly textured account, Newport Gardner's Anthem tells the story of a forgotten Black leader while exploring the new but tragically limited opportunities for formerly enslaved people in the post-Revolutionary world.

Summer by the Seaside Bryant Franklin Tolles, 2008 A sweeping, richly illustrated architectural study of the large historic New England coastal resort hotels.

Assembling the Architect George Barnett Johnston, 2020-01-23 Assembling the Architect explores the origins and history of architectural practice. It unravels the competing interests that historically have structured the field and cultivates a deeper understanding of the contemporary profession. Focusing on the period 1870 to 1920, when the foundations were being laid for the U.S. architectural profession that we recognize today, this study traces the formation and standardization of the fundamental relationships among architects, owners, and builders as codified in the American Institute of Architects' very first Handbook of Architectural Practice. It reveals how these archetypal roles have always been fluid, each successfully redefining their own agency with respect to the others in the constantly shifting political economy of building. Far from being a purely historical study, the book also sheds light on today's digitally enabled profession. Contemporary architectural tools and

disciplinary ideals continue to be shaped by the same fundamental tensions and emergent modes of practice such as BIM Building Information Modelling and IPD Integrated Project Delivery represent the realization of programs and agendas that have been over a century in play Essential reading for professional practice courses as a contextual and historical companion to the Handbook Assembling the Architect provides a critical perspective of the profession that is fundamental to understanding current architectural practice ["With fclat"](#) Hina Hirayama,2013 A detailed history of the Boston Athenaeum s historic role in the founding of the Museum of Fine Arts Boston [2015 Annual Issue](#) New York History Review,2016-02-28 This is an annual printed issue for writers who specialize in local histories of New York State Many of your local historical societies don t have the resources to provide a platform for publishing your local history article Well we do **The Papers of Frederick Law Olmsted** Frederick Law Olmsted,1977 The concluding volume of the monumental Papers of Frederick Law Olmsted captures some of Olmsted s greatest achievements Choice 2015 Outstanding Academic Title In 1890 Frederick Law Olmsted then nearly sixty eight years old had risen to the pinnacle of his career Together with his partners stepson John Charles Olmsted and prot g Henry Sargent Codman he was involved in a number of major ongoing projects including the Boston Buffalo and Rochester park systems the campus plan for Stanford University and numerous private estates In July he reported that the firm had twenty works of considerable importance underway including nine large parks and six estates that he believed were matters of public interest Before the summer ended the firm s commitments would expand dramatically as Olmsted and his partners were appointed landscape architects for the World s Columbian Exposition in Chicago As commissions for new park systems residential communities grounds for educational institutions and private homes increased Olmsted feared that their commitments would exceed the partners ability to do their best work Despite these fears Olmsted s work in the final six years of his professional career would only enhance his considerable reputation as the ninth and final volume of The Papers of Frederick Law Olmsted reveals With its impressive waterways monumental buildings and verdant islands and shores the Chicago fair proved to be one of the firm s crowning achievements The early 1890s also saw the culmination of Olmsted s wide ranging work on one of his other great projects the design of the grounds of George W Vanderbilt s massive estate Biltmore near Asheville North Carolina In planning the estate s thousands of acres Olmsted outlined new approaches to landscape design promoted the creation of the first scientific forestry operation in the United States designed a model residential subdivision and proposed an arboretum that would have been the most ambitious in the nation The Last Great Projects 1890 1895 chronicles the history of one of the world s greatest landscape design firms while offering a fascinating retrospective on Frederick Law Olmsted s productive final years The volume also gathers together the important documents of this last triumphant era As Olmsted neared the end of his career he wrote some of his most reflective letters and reports summarizing the legacy of his involvement with the U S Sanitary Commission the quality of landscape design in England and France the biographical circumstances that proved most important to his
