Ngo Accountability Ngo Accountability:

NGO Accountability Lisa Jordan, Peter van Tuijl, 2006 First Published in 2006 Routledge is an imprint of Taylor Francis an informa company Debating NGO Accountability Jem Bendell, 2006 Concerns about the role and accountability of NGOs have been voiced from different quarters in recent years Some donors governments corporations and international agencies raise important questions about the effectiveness of NGO work and the legitimacy of their advocacy Some NGOs have also recognized the need to ensure good practice in the wider voluntary sector For this emerging agenda to lead to positive development outcomes we need to ask what initiatives will improve the accountability of all institutions to the people whose lives they shape and what initiatives could serve merely to undermine NGOs useful and largely accepted role in holding business and government accountable for their actions This publication puts democracy and human rights at the centre of the debate about NGO accountability Non-Governmental Organisations - Performance and Accountability Michael Edwards, David Hulme, 2014-03-18 The last decade has seen some significant changes in international development and in the status of non governmental organisations operating in the field Not only has the number of NGOs virtually doubled many of them have seen a considerable growth in their budgets and have grown closer to governments and official aid agencies NGOs are acknowledged by many to be more effective agents of development than governments or commercial interests even as a magic bullet for development problems Despite these positive trends the real impact of the NGO sector is not well documented This is partly because NGO performance assessment and accountability methods are weak and partly because NGOs are caught up increasingly in the world of official aid which pushes them towards certain forms of evaluation at the expense of others This unique book takes a hard and critical look at these issues and describes how NGOs can and must improve the way they measure and account for their performance if they are to be truly effective **NGO Accountability** Lisa D. Jordan, 2007 **NGO Accountability from an NGO Perspective** Khaldoun Abou Assi, Deborah L Trent, 2020 Extant research in the nonprofit literature focuses on NGO accountability framing it relationally We examine the interplay of several constitutive elements of NGO donor relationships based on narratives of NGO executives NGO perceptions of accountability and of their donors their assumptions about donor perceptions of the NGO role and expectations of NGO accountability and their responses to shifts in donor funding We argue that perceptions and practices of accountability not only determine to whom an NGO should be primarily accountable but also shape NGO behavior and alter dependence on donors As such accountability is not necessarily a consequence of a relationship but more likely a constitutive element of the relationship While a favourable response to donor interests might signify upward accountability it might also suggest that NGOs are more assertive about managing their institutional environments and thereby mitigate their dependence on donors *NGO Accountability* , The arguments that were conventionally put forth in favor of NGO accountability have been the need to maintain public trust the intrinsic value of accountability and the need to create checks and balances on growing NGO power

the argument the AEI and governments have employed for example Jordan forthcoming 4 3 2 What Is the New NGO Accountability Three key questions make up the commonly accepted core accountability framework that is at the heart of the new NGO accountability A What is the NGO accountable for B To whom is the NGO accountable C How is the NGO accountable There is no one right answer to any of these questions as the great number of types of organization and fields of activity 3 3 Benefits of Accountability A number of arguments are frequently put forth in favor of improved NGO accountability Accountability has the potential to increase the trust and commitment of stakeholders Sustainability and The Global Compact 2003 3 because it can prove an organization's effectiveness and demonstrate whom the organization represents Disclosure of Statements and Reports The disclosure of statements and reports was already part of the traditional approach to accountability and retains its validity under the new approach Why is NGO Accountability an Issue What Does NGO Accountability Mean in Practice What Does NGO Accountability Traditionally Entail What Is the New NGO Accountability What is the NGO accountable for To whom is the NGO accountable How is the NGO accountable Benefits of Accountability What Kinds of Accountability Mechanisms Are in Use Which Problems Exist with Accountability as It Is Current

Environmentalism and NGO Accountability Kemi C. Yekini, Liafisu Sina Yekini, Paschal Ohalehi, 2020-11-27 It is increasingly being recognised across society that the preservation of our natural environment should shape political economic and social policies This book delves into the partnership of non governmental organisations NGOs Environmental NGOs ENGOs their communities and their governmental counterparts in responding to this need Overcoming Ngo Accountability Concerns in International Governance Erik B. Bluemel, 2014 Most scholars treat NGOs as a homogenous group and base their theoretical and normative arguments around such a generalization even when recognizing that NGOs vary significantly on a number of levels This Article seeks to advance the literature on NGO accountability by unpacking NGOs by functional role in international governance relating the functional roles of NGOs to accountability theory This Article proposes that participation of NGOs in international governance should not always depend upon democratic accountability Instead the accountability required of NGOs when participating in international governance should depend upon the particular function performed As a result the accountability mechanisms used to achieve such accountability will necessarily vary by function Failing to recognize this theories which elaborate theories of NGO participation in international governance have missed the mark focusing primarily on ensuring greater accountability of NGOs generally This Article seeks to remove the debate from the provision of accountability from the level of the actor to that of function Part I begins with a discussion of accountability in international governance establishing a general typology of accountability mechanisms based largely upon the work of Grant and Keohane Part II then describes some of the different functions performed by NGOs in international governance providing examples of how such systems are arranged under existing frameworks and illustrating the relationship between the function performed and the accountability needed Part III seeks to refine NGO accountability theory

by proposing a new model to guide NGO participation in international governance which links accountability to function Part III also identifies some concerns in implementing the theory The Article concludes by calling for further research into the costs of implementing this new framework so an appropriate balance between fairness operability and accountability may be reached in international governance NGO's Accountability R. K. Gupta (NGO activist.),2009 **Evaluating Transnational NGOs** J. Steffek,K. Hahn,2010-04-14 Critics question the representativeness of NGOs the democratic quality of their internal procedures and their accountability to the wider public This volume written jointly by academics and practitioners clarifies the issues at stake and controversially discusses proposals for reform *Sustainability Accounting and Accountability* Jan Bebbington,Jeffrey Unerman,Brendan O'Dwyer,2014-06-05 The management and balancing of social environmental and economic sustainability is one of the most complex and urgent challenges facing both private and public sector organizations today with these challenges of sustainability posing many risks to and many opportunities for advancing the aims and performance of organizations Accounting and accountability processes and practices provide key tools to help organizations to more effectively identify and manage the risks and opportunities of sustainability Popular features from the first edition are retained whilst recent developments in theory and practice are accounted for New substantive chapters on water resource accounting carbon accounting and decision making have been introduced and the book continues to benefit from a host of expert contributors from around the world including Jesse Dillard Rob Gray Craig Deegan This comprehensive and authoritative textbook will continue to be a key resource for students of accounting and sustainability as well as being a vital tool for researchers The NGO Challenge for International Relations Theory William E. DeMars,Dennis Dijkzeul,2015-02-11 It has become commonplace to observe the growing pervasiveness and impact of Non Governmental Organizations NGOs And yet the three central approaches in International Relations IR theory Liberalism Realism and Constructivism overlook or ignore the importance of NGOs both theoretically and politically Offering a timely reappraisal of NGOs and a parallel reappraisal of theory in IR the academic discipline entrusted with revealing and explaining world politics this book uses practice theory global governance and new institutionalism to theorize NGO accountability and analyze the history of NGOs This study uses evidence from empirical data from Europe Africa Latin America the Middle East and Asia and from studies that range across the issue areas of peacebuilding ethnic reconciliation and labor rights to show IR theory has often prejudged and misread the agency of NGOs Drawing together a group of leading international relations theorists this book explores the frontiers of new research on the role of such forces in world politics and is required reading for students NGO activists and policy makers **What NGO Accountability Means - and Does Not Mean (Review Essay).** Kenneth Anderson,2014 This essay offers a review 4000 words of quot NGO Accountability Politics Principles and Innovations quot Lisa Jordan and Peter van Tuijl eds London Earthscan 2006 following AJIL permission it is given in unedited form and is available in final form in 103 AJIL 1 January 2009 International and transnational NGOs have been under criticism for alleged

lack of accountability since they emerged into prominence in the 1990s In recent years the debate over NGOs has shifted from legitimacy and "representativeness" to accountability in the narrower senses of internal governance fiduciary responsibility relationships with national governmental authorities and similar issues The volume under review seeks to cover both aspects of the debate with emphasis on the latter narrower issues The review essay argues that the debate over representativeness and legitimacy accountability in the large sense cannot be left aside but continues to be present if only because the incentives that led NGOs to claim to represent the peoples of the world in the first place have not gone away but have instead merely been submerged under critical pressure The review essay argues that the question of NGO accountability as a matter of claims to governance remain salient because global civil society still seeks a role in global governance in a way that relies upon claims of representativeness and that is not satisfied by narrower mechanisms by which NGOs make themselves accountable for other narrower purposes such as internal corporate governance or fiduciary accountability for charitable assets Considering NGO Accountability: a Note of Caution Carol Ann Tilt, 2006

Non-Governmental Organisations - Performance and Accountability Michael Edwards, David Hulme, 2014-03-18 The last decade has seen some significant changes in international development and in the status of non governmental organisations operating in the field Not only has the number of NGOs virtually doubled many of them have seen a considerable growth in their budgets and have grown closer to governments and official aid agencies NGOs are acknowledged by many to be more effective agents of development than governments or commercial interests even as a magic bullet for development problems Despite these positive trends the real impact of the NGO sector is not well documented This is partly because NGO performance assessment and accountability methods are weak and partly because NGOs are caught up increasingly in the world of official aid which pushes them towards certain forms of evaluation at the expense of others This unique book takes a hard and critical look at these issues and describes how NGOs can and must improve the way they measure and account for their performance if they are to be truly effective **NGO Accountability** A.
