Designed to Perform Tom Dollard, 2019-07-25 This book is an illustrated practical design guide to delivering better energy performance in all types of new build homes. It takes the form of an annotated details book with photos taken from live construction sites with the content based around diagrams, drawings and photos by the author which demonstrates valuable best practice knowledge and advice. Chapter 1 is an introduction to the performance gap and the quality of design and construction in new build homes explaining the typical construction sequence of homebuilding and highlights common issues that designers need to engage with. Chapters 2-7 look at each construction fabric in turn including a series of detailed drawings, diagrams and photos illustrating the key elements of good design. Chapter 8 contains a checklist of all performance gap issues that designers need to look for. This book will provide valuable guidance to architects and designers on how to improve their detailing at construction stage and therefore the overall quality of design and performance of new homes.

Materials for Architects and Builders Arthur Lyons, 2019-08-28 Materials for Architects and Builders provides a clear and concise introduction to the broad range of materials used within the construction industry and covers the essential details of their manufacture, key physical properties, specification and uses. This new sixth edition has been completely revised and updated to include the latest developments in materials research, new images, appropriate technologies and relevant legislation. The ecological effects of building construction and lifetime use remain an important focus and this new edition includes a wide range of energy saving building components.

Show Me the Bodies Peter Apps, 2022-11-10 WINNER OF THE ORWELL PRIZE FOR POLITICAL WRITING 2023. Never before in years of reviewing books about buildings has one brought me to tears. This one did. Rowan Moore Observer Book of the Week. On 14 June 2017 a 24 storey block of flats went up in flames. The fire climbed up cladding as flammable as solid petrol. Fire doors failed to self close. No alarm rang out to warn sleeping residents. As smoke seeped into their homes, all were told to stay put. Many did and they died. It was a tragedy. Decades in the making. Peter Apps meticulously exposes how a steady stream of deregulation, corporate greed and institutional indifference caused a tragedy. 72 people did not need to die as the Grenfell Tower Inquiry makes clear. Here is the story of a grieving community forsaken by our government, a community still waiting for justice.
