Campbell, 2021-09-15 Christianity is more than just a religion It is a social organism that affects the lives of every person on earth in significant ways even if they are not Christians themselves In the United States its influence is pervasive with often profound influence on public policies but it is largely unchallenged as a belief system relegated to that quarantined area outside the zone of polite conversation Despite much academic ink being allotted to the weaknesses of Christianity as a valid belief system the general public remains unaware of these flaws In Cross Examined John Campbell applies his almost thirty years of experience as a trial lawyer to dissecting Christianity and the case of apologists for the Christian God He addresses the best arguments for Christianity those against it and the reasons people should care about

William Domhoff, Eleven Other Authors, 2017-08-04 This book critiques and extends the analysis of power in the classic Who Rules America on the fiftieth anniversary of its original publication in 1967 and through its subsequent editions The chapters written especially for this book by twelve sociologists and political scientists provide fresh insights and new findings on many contemporary topics among them the concerted attempt to privatize public schools foreign policy and the growing role of the military industrial component of the power elite the successes and failures of union challenges to the power elite the ongoing and increasingly global battles of a major sector of agribusiness and the surprising details of how those who hold to the egalitarian values of social democracy were able to tip the scales in a bitter conflict within the power elite itself on a crucial banking reform in the aftermath of the Great Recession These social scientists thereby point the way forward in the study of power not just in the United States but globally A brief introductory chapter situates Who Rules America within the context of the most visible theories of power over the past fifty years pluralism Marxism Millsian elite

theory and historical institutionalism Then a chapter by G William Domhoff the author of Who Rules America takes us behind the scenes on how the original version was researched and written tracing the evolution of the book in terms of new concepts and research discoveries by Domhoff himself as well as many other power structure researchers through the 2014 seventh edition Readers will find differences of opinion and analysis from chapter to chapter The authors were encouraged to express their views independently and frankly They do so in an admirable and useful fashion that will stimulate everyone s thinking on these difficult and complex issues setting the agenda for future studies of power **Knowledge Evolution and Societal Transformations** Jerald Hage, 2020-04-30 Knowledge evolution punctuates the previous equilibrium of society and requires us to develop adaptive solutions One new rule is that as the discovery of new knowledge grows more difficult more complex organizational and institutional arrangements have to be adopted Knowledge growth is accelerating because not only are there more creative individuals and organizations developing radical innovations but also innovative regions are facilitating both of these trends The discussion of four social regions and the kinds of selves produced help explain partisan divides and integrate the social psychological literature The growth in knowledge produces two kinds of social changes In the nature of the social structure and the kinds of institutional problems that have to be solved The discussion of changes in the stratification system in the choice of organizational form and in the spread of inter organizational networks with tight connections heterogeneous social capital allows us to update Marx Weber and Durkheim The new adaptive problems include growing inefficiencies in labor product and public markets and the failure of many existing programs The proposed solutions are the creation of coordinated systemic networks in each of these areas which integrates the comparative institutional literature neoclassical economics and political science
