Imaginaries of Connectivity Luis Lobo-Guerrero, Suvi Alt, Maarten Meijer, 2019-11-20 This edited collection addresses the problem of how the creation of novel spaces of governance relates to imaginaries of connectivity in time While connectivity seems almost ubiquitous today it has been imagined and practiced in various ways and to varying political effects in different historical and geographical contexts Often the conception of new connectivities also gives birth to new spaces of governance The political denomination of spaces whether maritime continental social or virtual reflects the situatedness of power Yet such crafting of new spaces also expresses particular imaginaries and technologies of connectivity that make governance possible Whereas the study of international relations has traditionally focused on the role of agency and structure in power relations the affects beliefs attitudes and practices that intervene in how groups of people connect in given times have not attracted much scholarly attention Overall the detailed and original case studies examined in the book range from the 16th century to the 19th century to the present and from Spain to the Maritime Alps to Germany to the Mediterranean to China to East Asia The historical and geographical variety of the cases serves to highlight the diversity of the meaning and function of connectivity in the constitution of novel spaces of governance

Entrepôt of Revolutions Manuel Covo, 2022 The Age of Revolutions has been celebrated for the momentous transition from absolute monarchies to representative governments and the creation of nation states in the Atlantic world Much less recognized than the spread of democratic ideals was the period's growing traffic of goods capital and people across imperial borders and reforming states attempts to control this mobility Analyzing the American French and Haitian revolutions in an interconnected narrative Manuel Covo centers imperial trade as a driving force arguing that commercial factors preceded and conditioned political change across the revolutionary Atlantic At the heart of these transformations was the entrepôt the island known as the Pearl of the Caribbean whose economy grew dramatically as a direct consequence of the American Revolution and the French American alliance Saint Domingue was the single most profitable colony in the Americas in the second half of the eighteenth century with its staggering production of sugar and coffee and the unpaid labor of enslaved people The colony was so focused on its lucrative exports that it needed to import food and timber from North America which generated enormous debate in France about the nature of its sovereignty over Saint Domingue At the same time the newly independent United States had to come to terms with contradictory interests between the imperial ambitions of European powers its connections with the Caribbean and its own domestic debates over the future of slavery This work sheds light on the three way struggle among France the United States and Haiti to assert define and maintain commercial sovereignty Drawing on a wealth of archives in France the United States and the United Kingdom *Entrepôt of Revolutions* offers an innovative perspective on the primacy of economic factors in this era as politicians and theorists planters and merchants ship captains smugglers and the formerly enslaved all attempted to

transform capitalism in the Atlantic world **Tracks on the Ocean** Sara Caputo,2024-10-22 An engaging look at ocean routes complicated beginnings and elusive impact Sara Caputo's *Tracks on the Ocean* is a sweeping history of how we have understood routes of travel over the ocean and how we came to represent that movement as a cartographical line Focusing on the representation of sea journeys in the Western world from the early sixteenth century to the present Caputo deftly argues that the depiction of these lines is inextricable from European imperialism the rise of modernity and attempts at mastery over nature Caputo recounts the history of ocean tracks through an array of lively stories and characters from the expeditions of Captain James Cook in the eighteenth century to tracks depicted in *Moby Dick* and popular culture of the nineteenth century to the use of navigational techniques by the British navy She discusses how tracks evolved from tools of surveying into tools of surveillance and eventually into paths of environmental calamity The impulse to record tracks on the ocean is Caputo argues reflective of an ongoing desire for order schematization and personal visibility as well as occupation and permanent ownership in this case over something that is unoccupiable and impossible to truly possess Both beautifully written and deeply researched *Tracks on the Ocean* shares how the lines drawn on maps tell the audacious and often tragic and violent stories of ocean voyages **The Cambridge History of Science Fiction** Gerry Canavan,Eric Carl Link,2018-12-31

The first science fiction course in the American academy was held in the early 1950s In the sixty years since science fiction has become a recognized and established literary genre with a significant and growing body of scholarship *The Cambridge History of Science Fiction* is a landmark volume as the first authoritative history of the genre Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past Science fiction as a literary genre is the central focus of the volume but fundamental to its story is its non literary cultural manifestations and influence Coverage thus includes transmedia manifestations as an integral part of the genre's history including not only short stories and novels but also film art architecture music comics and interactive media **Ideologies of Western Naval Power, c. 1500-1815** J.D. Davies,Alan James,Gijs Rommelse,2019-06-25 This ground breaking book provides the first study of naval ideology defined as the mass of cultural ideas and shared perspectives that for early modern states and belief systems

justified the creation and use of naval forces Sixteen scholars examine a wide range of themes over a wide time period and broad geographical range embracing Britain the Netherlands France Spain Sweden Russia Venice and the United States along with the extra national polities of piracy neutrality and international Calvinism This volume provides important and often provocative new insights into both the growth of western naval power and important elements of political cultural and religious history **The Cambridge History of the British Empire** John Holland Rose,Arthur Percival Newton,Ernest Alfred Benians,Henry Dodwell,1930 **Gender, Surveillance, and Literature in the Romantic Period** Lucy E.

Thompson,2021-12-30 Romantic era literature offers a key message surveillance in all its forms was experienced distinctly

and differently by women than men Gender Surveillance and Literature in the Romantic Period examines how familiar and neglected texts internalise and interrogate the ways in which targeted asymmetric and often isolating surveillance made women increasingly and uncomfortably visible in a way that still resonates today The book combines the insights of modern surveillance studies with Romantic scholarship It provides readers with a new context in which to understand Romantic period texts and looks critically at emerging paradigms of surveillance directed at marginal groups as well as resistance to such monitoring Works by writers such as Jane Austen Charlotte Smith and Joanna Baillie as well as Lord Byron and Thomas De Quincey give a new perspective on the age that produced the Panopticon This book is designed to appeal to a wide readership and is aimed at students and scholars of surveillance literature Romanticism and gender politics as well as those interested in important strands of women s experience not only for the additional layers they reveal about the Romantic era but also for their relevance to current debates around asymmetries of power within gendered surveillance **The Maritime**

World of Early Modern Britain Richard Blakemore,James Davey,2025-10-01 Britain s emergence as one of Europe s major maritime powers has all too frequently been subsumed by nationalistic narratives that focus on operations and technology This volume by contrast offers a daring new take on Britain s maritime past It brings together scholars from a range of disciplines to explore the manifold ways in which the sea shaped British history demonstrating the number of approaches that now have a stake in defining the discipline of maritime history The chapters analyse the economic social and cultural contexts in which English maritime endeavour existed as well as discussing representations of the sea The contributors show how people from across the British Isles increasingly engaged with the maritime world whether through their own lived experiences or through material culture The volume also includes essays that investigate encounters between English voyagers and indigenous peoples in Africa and the intellectual foundations of imperial ambition **Beneath the Lines**

Jacobo García-Álvarez,Paloma Puente-Lozano,2022-05-03 This book brings together ten empirically rich and theoretically informed contributions that aim to clarify both geo historical specificities and common transnational and global features of the cultures and practices of boundary making that shaped modern statehood Written by scholars from Spain France Italy Argentina Brazil and Mexico the essays included in this volume provide a comparative international perspective on the processes of border formation as well as an integrative approach that seeks to strengthen the links between renewed geo historical studies and more contemporary oriented border studies The book is addressed to a wide range of researchers including geographers historians political scientists and specialists in geopolitics and the history of international relations

Boston Harbor Navigation Improvement and Berth Dredging Project ,1995 **Trading with the Enemy** John Shovlin,2021-06-08 A ground breaking account of British and French efforts to channel their eighteenth century geopolitical rivalry into peaceful commercial competition Britain and France waged war eight times in the century following the Glorious Revolution a mutual antagonism long regarded as a Second Hundred Years War Yet officials on both sides also initiated

ententes free trade schemes and colonial bargains intended to avert future conflict What drove this quest for a more peaceful order In this highly original account John Shovlin reveals the extent to which Britain and France sought to divert their rivalry away from war and into commercial competition The two powers worked to end future conflict over trade in Spanish America the Caribbean and India and imagined forms of empire building that would be more collaborative than competitive They negotiated to cut cross channel tariffs recognizing that free trade could foster national power while muting enmity This account shows that eighteenth century capitalism drove not only repeated wars and overseas imperialism but spurred political leaders to strive for global stability
