

Photography Through the Years

1550 - The first Pinhole camera (Camera Obscura) was used to create an image.

1816 - Camera Obscura is used to make an image on metal plates coated with chemicals. This was when the first permanent photograph was taken! It took 8 hours to take this photograph!

1839 - The first glass negative was used in Daguerre's process which needed exposure to make a negative and then printing it onto a plate to develop and fix the image. These plates were one of a kind and took only 15 minutes to take the photo.

1839 - The wet collodion process became the standard as the photographs made by this method are more detailed and sharper. Also the wet collodion process produces a negative that can be used to make duplicate photos.

1914 - The first handheld camera (Leica) was sold. This camera had flash film.

1907 - First color photograph was made by taking multiple images through red, green, and blue filters. Then these images were combined to make a color image.

1888 - Kodak made the first box camera, which had a 13-foot film roll that held 100 photos. The made photography available to all! These photographs were 1.3 inches.

1917 - First Kodak instant photo.

1935 - The first 35mm single lens reflex camera (Leica). This camera used a single lens, a mirror, and a prism system which allowed the photographer to see exactly what would be seen by the camera.

1975 - Eastman Kodak introduced the first digital camera that displayed photos on its screen. Digital cameras can store more photos than film.

1995 - Nikon offered the first DSLR, digital single lens reflex camera, which combined a digital imaging sensor with the mechanisms and optics of a single lens reflex camera.

2000 - First camera phone is produced in Japan.
