**George C. Marshall and the Early Cold War** William A. Taylor, 2020-07-09 Though best known for his central part in the American war effort from 1939 to 1945 George C Marshall s critical role in the early Cold War was probably at least as important in shaping the policies and politics of the postwar western world and in cementing his place as a pivotal figure in twentieth century American history This book places Marshall squarely at the center of the story of the American century by

examining his tenure in key policymaking positions during this period including army chief of staff special presidential envoy to China secretary of state and secretary of defense among others George C Marshall and the Early Cold War brings together a diverse and accomplished group of scholars including military diplomatic and institutional historians to explore how Marshall Time magazine's Man of the Year in both 1943 and 1947 and the 1953 Nobel Peace Prize winner molded debates on all the major issues of his day such as universal military training China's civil war an independent air force the National Security Act of 1947 nuclear weapons European Recovery Program North Atlantic Treaty Korean War and racial integration of the U S military With a focus on Marshall's public service at the intersection of American policy politics and society the authors provide a comprehensive historical account of his central role in shaping America during a tumultuous yet formative period in the nation's history Their work fills a void in the scholarship of American military history and American history generally providing context for the consideration of broader questions about American power and the place of the military within American society *Hearings* United States. Congress. House, 1946 *Pearl Harbor Attack* United States. Congress, United States. Congress. Joint Committee on the Investigation of the Pearl Harbor Attack, 1946 **Anatomy of Victory** John D. Caldwell, 2018-11-09 This groundbreaking book provides the first systematic comparison of America's modern wars and why they were won or lost John D Caldwell uses the World War II victory as the historical benchmark for evaluating the success and failure of later conflicts Unlike WWII the Korean Vietnam and Iraqi Wars were limited but they required enormous national commitments produced no lasting victories and generated bitter political controversies Caldwell comprehensively examines these four wars through the lens of a strategic architecture to explain how and why their outcomes were so dramatically different He defines a strategic architecture as an interlinked set of continually evolving policies strategies and operations by which combatant states work toward a desired end Policy defines the high level goals a nation seeks to achieve once it initiates a conflict or finds itself drawn into one Policy makers direct a broad course of action and strive to control the initiative When they make decisions they have to respond to unforeseen conditions to guide and determine future decisions Effective leaders are skilled at organizing constituencies they need to succeed and communicating to them convincingly Strategy means employing whatever resources are available to achieve policy goals in situations that are dynamic as conflicts change quickly over time Operations are the actions that occur when politicians soldiers and diplomats execute plans A strategic architecture Caldwell argues is thus not a static blueprint but a dynamic vision of how a state can succeed or fail in a conflict MacArthur's Korean War Generals Stephen R. Taaffe, 2016-03-14 Wedged chronologically between World War II and Vietnam the Korean War which began with North Korea's invasion of South Korea in June of 1950 possessed neither the virtuous triumphalism of the former nor the tragic pathos of the latter Most Americans supported defending South Korea but there was considerable controversy during the war as to the best means to do so and the question was at least as exasperating for American army officers as it was for the general public A

longtime historian of American military leadership in the crucible of war Stephen R Taaffe takes a close critical look at how the highest ranking field commanders of the Eighth Army acquitted themselves in the first decisive year in Korea Because an army is no better than its leadership his analysis opens a new perspective on the army s performance in Korea and on the conduct of the war itself In that first year the Eighth Army s leadership ran the gamut from impressive to lackluster a surprising unevenness since so many of the high ranking officers had been battle tested in World War II Taaffe attributes these leadership difficulties to the army s woefully unprepared state at the war s start army personnel policies and General Douglas MacArthur s corrosive habit of manipulating his subordinates and pitting them against each other He explores the personalities at play their pre war experiences the manner of their selection their accomplishments and failures and of course their individual relationships with each other and MacArthur By explaining who these field corps and division commanders were Taaffe exposes the army s institutional and organizational problems that contributed to its up and down fortunes in Korea in 1950 1951 Providing a better understanding of MacArthur s controversial generalship Taaffe s book offers new and invaluable insight into the army s life and death struggle in America s least understood conflict **Five**

**The Generals** Thomas E. Ricks, 2013-10-29 A New York Times bestseller An epic history of the decline of American military leadership from the bestselling author of Fiasco and Churchill and Orwell While history has been kind to the American generals of World War II Marshall Eisenhower Patton and Bradley it has been less kind to the generals of the wars that followed such as Koster Franks Sanchez and Petraeus In The Generals Thomas E Ricks sets out to explain why that is In chronicling the widening gulf between performance and accountability among the top brass of the U S military Ricks tells the stories of great leaders and suspect ones generals who rose to the occasion and generals who failed themselves and their soldiers In Ricks s hands this story resounds with larger meaning about the transmission of values about strategic thinking and about the difference between an organization that learns and one that fails
