[A Brief History of the United States](#) John Bach McMaster,2016-07-07 It is not too much to assert that most of our countrymen acquire at school all the knowledge they possess of the past history of their country In view of this fact it is most desirable that a history of the United States for elementary schools should present not only the essential features of our country s progress which all should learn but also many things of secondary consequence which it is well for every young American to know In this book the text proper consists of the essentials and these are told in as few words as truth and fairness will permit The notes which form a large part of the book include the matters of less fundamental importance they may be included in the required lessons or

may be omitted as the teacher thinks proper however they should at least be read Some of the notes are outline biographies of men whose acts require mention in the text and who ought not to be mere names nor appear suddenly without any statement of their earlier careers Others are intended to be fuller statements of important events briefly described or narrated in the text or relate to interesting events that are of only secondary importance Still others call attention to the treatment of historical personages or events by our poets and novelists or suggest passages in standard histories that may be read with profit Such suggested readings have been chosen mostly from books that are likely to be found in all school libraries

Popular Imperialism and the Military John M. MacKenzie, John MacDonald MacKenzie, 1992 Colonial war played a vital part in transforming the reputation of the military and placing it on a standing equal to that of the navy The book is concerned with the interactive culture of colonial warfare with the representation of the military in popular media at home and how these images affected attitudes towards war itself and wider intellectual and institutional forces It sets out to relate the changing image of the military to these fundamental facts For the dominant people they were an atavistic form of war shorn of guilt by Social Darwinian and racial ideas and rendered less dangerous by the increasing technological gap between Europe and the world Attempts to justify and understand war were naturally important to dominant people for the extension of imperial power was seldom a peaceful process The entertainment value of war in the British imperial experience does seem to have taken new and more intensive forms from roughly the middle of the nineteenth century Themes such as the delusive seduction of martial music the sketch of the music hall song powerful mythic texts of popular imperialism and heroic myths of empire are discussed extensively The first important British war correspondent was William Howard Russell 1820 1907 of *The Times* in the Crimea The 1870s saw a dramatic change in the representation of the officer in British battle painting Up to that point it was the officer's courage tactical wisdom and social prestige that were put on display
