Nice Political Economy Erosion Developing Countries:

The Political Economy of Soil Erosion in Developing Countries Piers Blaikie, 2016-05-20 First published in 1985 This book examines wide variety of ways in which environmental deterioration in particular soil erosion can be viewed and the implicit political judgements that often inform them Using the context of developing countries where the effects tend to be more acute due to underdevelopment and climatic factors this work aims to examine this source of uncertainty and make explicit the underlying assumptions in the debate about soil erosion It also rejects the notion that soil erosion is a politically neutral issue and argues that conservation requires fundamental social change This title will be of interest to students of environmental and developmental studies

The Political Economy of Bank Regulation in Developing Countries

Emily Jones, 2020 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations International banking standards are intended for the regulation of large complex risk taking international banks with trillions of dollars in assets and operations across the globe Yet they are being implemented in countries with nascent financial markets and small banks that have yet to venture into international markets Why is this This book develops a new framework to explain regulatory interdependence between countries in the core and the periphery of the global financial system Drawing on in depth analysis of eleven countries across Africa Asia and Latin America it shows how financial globalisation generates strong reputational and competitive incentives for developing countries to converge on international standards It explains how specific cross border relations between regulators politicians and banks within developing countries and international actors including investors peer regulators and international financial institutions generate regulatory interdependence It explains why some configurations of domestic politics and forms of integration into global finance generate convergence with international standards while other configurations lead to divergence This book contributes to our understanding of the ways in which governments and firms in the core of global finance powerfully shape regulatory decisions in the periphery and the ways that governments and firms from peripheral developing countries manoeuvre within the constraints and opportunities created by financial globalisation

Environmental Transformations Mark

Whitehead,2014-04-16 From the depths of the oceans to the highest reaches of the atmosphere the human impact on the environment is significant and undeniable These forms of global and local environmental change collectively appear to signal the arrival of a new geological epoch the Anthropocene This is a geological era defined not by natural environmental fluctuations or meteorite impacts but by collective actions of humanity Environmental Transformations offers a concise and accessible introduction to the human practices and systems that sustain the Anthropocene It combines accounts of the carbon cycle global heat balances entropy hydrology forest ecology and pedology with theories of demography war industrial capitalism urban development state theory and behavioural psychology This book charts the particular role of geography and geographers in studying environmental change and its human drivers It provides a review of critical theories that can help to uncover the socio economic and political factors that influence environmental change It also explores key issues in contemporary environmental studies such as resource use water scarcity climate change industrial pollution and deforestation These issues are mapped through a series of geographical case studies to illustrate the particular value of geographical notions of space place and scale in uncovering the complex nature of environmental change in different socio economic political and cultural contexts Finally the book considers the different ways in which nations communities and individuals around the world are adapting to environmental change in the twenty first century Particular attention is given throughout to the uneven geographical opportunities that different communities have to adapt to environmental change and to the questions of social justice this situation raises This book encourages students to engage in the scientific uncertainties that surround the study of environmental change while also discussing both pessimistic and more optimistic views on the ability of humanity to address the environmental challenges of our current era *Labor in Colonial Kenya after the Forced Labor Convention, 1930-1963* Opolot Okia,2019-08-23 This book advances research into the government forced labor used widely in colonial Kenya from 1930 to 1963 after the passage of the International Labor Organization s Forced Labour Convention While the 1930 Convention intended to mark the suppression of forced labor practices various exemptions meant that many coercive labor practices continued in colonial territories Focusing on East Africa and the Kenya Colony this book shows how the colonial administration was able to exploit the exemption clause for communal labor thus ensuring the mobilization of African labor for infrastructure development As an exemption communal labor was not defined as forced labor but instead justified as a continuation of traditional African and community labor practices Despite this ideological justification the book shows that communal labor was indeed an intensification of coercive labor practices and one that penalized Africans for non compliance with fines or imprisonment The use of forced labor before and after the passage of the Convention is examined with a focus on its use during World War II as well as in efforts to combat soil erosion in the rural African reserve areas in Kenya The exploitation of female labor the Mau Mau war of the 1950s civilian protests and the regeneration of communal labor as harambee after independence are also discussed The Politics of Development Claire

Mcloughlin, Sameen Ali, Kailing Xie, Nic Cheeseman, David E. Hudson, 2024-03-06 A pathbreaking introduction to the controversial contested and deeply political topic of development Written in an engaging and eminently readable style leading authors invite readers to examine the political dynamics behind some of today's most complex global issues from rising inequality and social exclusion to the climate crisis By confronting false assumptions and dispelling myths the book challenges readers to see politics as not only the obstacle to development but also the means to achieve it The Politics of Development is grounded in the everyday challenges facing people around the world in accessing the vital resources they need to survive and thrive It illustrates the unavoidable reality that politics shapes who gets what when how whether in family settings local communities national stages or global arenas It provides readers with a clear roadmap for action centred on institutions interests and ideas to better navigate competing demands and push forward profound change There are no easy answers to the politics of development instead this book provides the analytical tools to understand why getting development right can be so hard and how you can positively respond to some of the critical challenges facing governments societies and citizens around the world today This text is essential reading for any student of the politics of development or Development Studies at undergraduate and postgraduate levels Claire Mcloughlin is Associate Professor of Politics and Development University of Birmingham UK Sameen Ali is Assistant Professor of International Development University of Birmingham UK Kailing Xie is Assistant Professor of International Development University of Birmingham UK Nicholas Cheeseman is Professor of Democracy and International Development University of Birmingham UK David Hudson is Professor of Politics and Development University of Birmingham UK *Globalization in an Age of Crisis* Robert C. Feenstra, Alan M. Taylor, 2014-01-07 Along with its painful economic costs the financial crisis of 2008 raised concerns over the future of international policy making As in recessions past new policy initiatives emerged approaches that placed greater importance on protecting national interests than promoting international economic cooperation Whether in fiscal or monetary policies the control of currencies and capital flows the regulation of finance or the implementation of protectionist policies and barriers to trade there has been an almost worldwide trend toward the prioritizing of national economic security But what are the underlying economic causes of this trend and what can economic research reveal about the possible consequences Prompted by these questions Robert C Feenstra and Alan M Taylor have brought together top researchers with policy makers and practitioners whose contributions consider the ways in which the global economic order might address the challenges of globalization that have arisen over the last two decades and that have been intensified by the recent crisis Chapters in this volume consider the critical linkages between issues including exchange rates global imbalances and financial regulation and plumb the political and economic outcomes of past policies for what they might tell us about the future of the global economic cooperation **Soil Conservation in Developing Countries** Jock R. Anderson, Jesuthason Thampapillai, 1990 **Tax Justice and the Political Economy of Global Capitalism, 1945 to the Present** Jeremy

Leaman, Attiya Waris, 2013-06-01 Tax justice has become an increasingly central issue of political debate in many countries particularly following the cardiac arrest of global financial services in 2008 and the subsequent worldwide slump in trade and production. The evident abuse of tax systems by corporations and rich individuals through tax avoidance schemes and offshore shadow banking is increasingly in the public eye. Above all the political challenges of recovery and structural reform have raised core issues of burden sharing and social equity on the agendas of both civil society groups and political elites. Democratic states need tax revenue to fund public goods and combat public bads with any degree of legitimacy. The contributions to this book discuss the haphazard evolution of contemporary taxation systems, their contradictory effects in a globalized economy and the urgency of their reform as a precondition for social justice. **Reimagining Political Ecology**

Piers Blaikie, 1987 **Encyclopedia of Ecology**

Brian D. Fath, 2018-08-23 Encyclopedia of Ecology Second Edition Four Volume Set continues the acclaimed work of the previous edition published in 2008. It covers all scales of biological organization from organisms to populations to communities and ecosystems. Laboratory field simulation modelling and theoretical approaches are presented to show how living systems sustain structure and function in space and time. New areas of focus include micro and macro scales, molecular and genetic ecology and global ecology e.g. climate change, earth transformations, ecosystem services and the food-water-energy nexus are included. In addition, new international experts in ecology contribute on a variety of topics. Offers the most broad ranging and comprehensive resource available in the field of ecology. Provides foundational content and suggests further reading. Incorporates the expertise of over 500 outstanding investigators in the field of ecology including top young scientists with both research and teaching experience. Includes multimedia resources such as an Interactive Map Viewer and links to a CSDMS Community Surface Dynamics Modeling System, an open source platform for modelers to share and link models dealing with earth system processes. **Green Development**

Bill Adams, 2019-12-05 The concept of sustainability lies at the core of the challenge of environment and development and the way governments, business and environmental groups respond to it. Green Development provides a clear and coherent analysis of sustainable development in both theory and practice. Green Development explores the origins and evolution of mainstream thinking about sustainable development and offers a critique of the ideas behind them. It draws a link between theory and practice by discussing the nature of the environmental degradation and the impacts of development. It argues that ultimately green development has to be about political economy about the distribution of power and not about environmental quality. Its focus is strongly on the developing world. The fourth edition retains the broad structure of previous editions but has been updated to reflect advances in ideas and changes in international policy. Greater attention has been given to the political ecology of development, market based and neoliberal

environmentalism and degrowth This fully revised edition discusses the origins of thinking about sustainability and sustainable development and its evolution to the present day the ideas that dominate mainstream sustainable development including natural capital the green economy market environmentalism and ecological modernisation critiques of mainstream ideas and of neoliberal framings of sustainability and alternative ideas about sustainability that challenge business as usual thinking such as arguments about limits to growth and calls for degrowth the dilemmas of sustainability in the context of forests desertification food and farming biodiversity conservation and dam construction the challenge of policy choices about sustainability particularly between reformist and radical responses to the contemporary global dilemmas Green Development offers clear insights into the challenges of environmental sustainability and social and economic development It is unique in offering a synthesis of theoretical ideas on sustainability and in its coverage of the extensive literature on environment and development around the world The book has proved its value to generations of students as an authoritative thought provoking and readable guide to the field of sustainable development

Green Development W. M. Adams, 2003-09-02 This revised and updated new edition retains the clear and powerful argument which characterized the original It gives a valuable analysis of the theory and practice of sustainable development and suggests that at the start of the new millennium we should think radically about the challenge of sustainability Fully revised this latest edition includes further reading chapter outlines chapter summaries and new discussion topics and explores the roots of sustainable development thinking and its evolution in the last three decades of the twentieth century the dominant ideas within mainstream sustainable development the nature and diversity of alternative ideas about sustainability the problems of environmental degradation and the environmental impacts of development strategies for building sustainability in development from above and below Offering a synthesis of theoretical ideas on sustainability based on the industrialized economies of the North and the practical applied ideas in the South which tend to ignore First World theory this important text gives a clear discussion of theory and extensive practical insights drawn from Africa Latin America and Asia

Third World Political Ecology Sinead Bailey, Raymond Bryant, 2005-08-08 An effective response to contemporary environmental problems demands an approach that integrates political economic and ecological issues Third World Political Ecology provides an introduction to an exciting new research field that aims to develop an integrated understanding of the political economy of environmental change in the Third World The authors review the historical development of the field explain what is distinctive about Third World political ecology and suggest areas for future development Clarifying the essentially politicised condition of environmental change today the authors explore the role of various actors states multilateral institutions businesses environmental non governmental organisations poverty stricken farmers shifting cultivators and other grassroots actors in the development of the Third World's politicised environment Third World Political Ecology is the first major attempt to explain the development and characteristics of environmental problems that plague parts of Asia Africa and Latin America Drawing on examples from

throughout the Third World the book will be of interest to all those who wish to understand the political and economic bases of the Third World's current predicament *The Political Economy of Economic Reform in the Pacific* Ron

Duncan, 2011-07-01 Over the last several years Vanuatu has become one of the fastest growing economies in the Pacific region driven primarily by tourism construction and aid inflows The achievement of strong economic growth has also occurred on the back of improved economic policy effective fiscal management and improved environment for private sector development While recent gains have been impressive more remains to be done to sustain growth and ensure the benefits are distributed throughout the nation The Government is now on a sound financial footing and is well placed to address key development issues The report discusses options for responding to these needs with a view to helping guide public policy formulation in Vanuatu **The Global Political Economy of Trade Protectionism and Liberalization** Tony

Heron, 2012-06-25 Given the widely accepted premise that free trade is the best means of maximising overall societal welfare why has it proven so difficult to achieve in certain industries This book tackles arguably the most perennial and deep rooted of all questions in political economy and questions the incumbent orthodox liberal theories of collective action Using a historical institutionalist framework to explore and explain the political economy of trade protectionism and liberalization this book is based on detailed case studies of the textiles and clothing sector in the EU United States China Caribbean Basin and sub Saharan Africa From this the book expands to discuss the origins of trade protectionism and examine the wider political effects of liberalization offering an explanation of why a successful conclusion to the WTO Doha round has proven to be so elusive The book argues that the regulation of global trade and the economic consequences that this has for both developed and developing countries has been the result of the particular way in which trade preferences are mediated through political institutions The Global Political Economy of Trade Protectionism and Liberalization will be of interest to those studying and researching international and comparative political economy developing area studies economics law and geography
