New Media And Sport New Media And Sport:

Routledge Handbook of Sport and New Media Andrew Billings, Marie Hardin, 2014-01-10 New media technologies have become a central part of the sports media landscape Sports fans use new media to watch games discuss sports transactions form fan based communities and secure minutiae about their favorite players and teams Never before have fans known so much about athletes whether that happens via Twitter feeds fan sites or blogs and never before have the lines between producer consumer enactor fan and athlete been more blurred The Internet has made virtually everything available for sports media consumption it has also made understanding sports media substantially more complex The Routledge Handbook of Sport and New Media is the most comprehensive and in depth study of the impact of new media in sport ever to be published Adopting a broad interdisciplinary approach the book explores new media in sport as a cultural social commercial economic and technological phenomenon examining the profound impact of digital technologies on that the way that sport is produced consumed and understood There is no aspect of social life or commercial activity in general that is not being radically influenced by the rise of new media forms and by offering a state of the field survey of work in this area the Routledge Handbook of Sport and New Media is important reading for any advanced student researcher or practitioner with an interest in sports studies media studies or communication studies The Digital World of Sport Sam Duncan, 2020-09-28 This book is about how new media and in particular digital and social media has changed the world of sports forever The way fans receive information communicate and form communities now predominantly lives online But perhaps even more significant is the evolution of the sports media industry where digital media has impacted the broader media industry stimulated new media organisations changed old media organisations and altered old conventions of journalism in equal measure Drawing on the expertise of academics scholars experts and professionals at the forefront of the sports media and journalism fields the book suggests that new media has turned the sports industry on its head with profound implications both exciting and disturbing New Media and Sport Katrien Lefever, 2012-10-04 During the past decade the media landscape and the coverage of sports events have changed fundamentally Sports fans can consume the sports content of their choice on the platform they prefer and at the time they want Furthermore thanks to electronic devices and Internet content can now be created and distributed by every sports fan As a result it is argued that media regulation which traditionally contains rules safeguarding access to information and diversity would become redundant Moreover it is sometimes proposed to leave the regulation of the broadcasting market solely to competition law This book illustrates that media law is still needed even in an era of abundance to guarantee public s access to live and full sports coverage Dealing with the impact of new media on both media and competition law this book will greatly appeal to academics and stakeholders from various disciplines such as legal and public policy political science media and communications studies journalism and European studies Additionally it contains valuable information and points of view for policy makers lawyers and international

and intergovernmental organisations active in media development The book contains an up to date analysis and overview of the different competition authorities decisions and media provisions dealing with the sale acquisition and exploitation of sports broadcasting rights Katrien Lefever is Senior Legal Researcher at IBBT The Interdisciplinary Centre for Law and ICT ICRI KU Leuven Belgium The book appears in the ASSER International Sports Law Series under the editorship of Prof Dr Robert Siekmann Dr Janwillem Soek and Marco van der Harst LL M
