correspondents working in exotic international locales This book challenges this established view by putting the spotlight on the insiders working in their own countries producing news for international audiences Western male foreign correspondents who report from areas affected by crises and conflicts for an audience back home have long stood in as visible metaphors of international news production But the understanding of who produces international news is starting to shift as scholars come to take into account the often invisible role played by locally based non Western news workers who have always been part and parcel of international news production The roles and responsibilities of these professional specialised locals within the global flow of news have only increased as falling news industry revenues have meant reductions in non local staff in foreign news bureaus Available research shows that the involvement of local journalists and fixers as well as NGOs as sources of news and information in international news production is marked by economic socio cultural and practice related tensions To shed light on these growing yet relatively less investigated changes happening in international news making this book brings together the latest of studies conducted on this form of journalistic labour around the world This book will contribute to both the breadth and depth of our future understanding of local news work that benefits distant audiences and also help cement the place of such journalistic work as a vital topic of analysis in its own right The chapters in this book were originally published as a special issue of Journalism Studies

Misunderstanding the Internet James Curran, Natalie Fenton, Des Freedman, 2012-03-12 The growth of the internet has been spectacular There are now more 1.5 billion internet users across the globe about one quarter of the world's population This is certainly a new phenomenon that is of enormous significance for the economic political and social life of contemporary societies However much popular and academic writing about the internet takes a technologically deterministic view assuming that the internet's potential will be realised in essentially transformative ways This was especially true in the euphoric moment of the mid 1990s when many commentators wrote about the internet with awe and wonderment While this moment may be over its underlying technocentrism the belief that technology determines outcomes lingers on and with it a failure to understand the internet in its social economic and political context Misunderstanding the Internet is a short introduction encompassing the history sociology politics and economics of the internet and its impact on society The book has a simple three part structure

Part 1 looks at the history of the internet and offers an overview of the internet's place in society Part 2 focuses on the control and economics of the internet Part 3 examines the internet's political and cultural influence Misunderstanding the Internet is a polemical sociologically and historically informed textbook that aims to challenge both popular myths and existing academic orthodoxies around the internet
