Brand,2023-08-31 Each year millions of high school students consider whether to continue their schooling and attend and complete college Despite evidence showing that a college degree yields far reaching benefits critics of higher education increasingly argue that college does not pay off and some students namely disadvantaged prospective college goers would be better served by forgoing higher education But debates about the value of college often fail to carefully consider what is required to speak knowledgeably about the benefits what a person s life might look like had they not completed college or their college counterfactual In Overcoming the Odds sociologist Jennie E Brand reveals the benefits of completing college by comparing life outcomes of college graduates with their college counterfactuals Drawing on two cohorts of nationally representative data from the Bureau of Labor Statistics National Longitudinal Surveys program Brand uses matching and machine learning methods to estimate the effects of college completion across students with varying likelihoods of completing four year degrees To illustrate her findings Brand describes outcomes using matched vignettes of college and non college graduates Brand shows that four year college completion enables graduates to increase wages and household income while also circumventing unemployment low wage work job instability poverty and social assistance Completing college also increases civic engagement Most of these benefits

are larger for disadvantaged than for more advantaged students rendering arguments that college has limited benefits for unlikely graduates as flawed Brand concludes that greater long term earnings and less job instability and unemployment and thus more tax revenue less reliance on public assistance and high levels of volunteering indicate that public investment in higher education for students from disadvantaged backgrounds yields far reaching collective benefits She asserts that it is better for our society when more people complete college Overcoming the Odds is an innovative and enlightening exploration of how college can transform lives *Travel Industry Economics* Harold L. Information—Consciousness—Reality James B. Glattfelder, 2019-04-10 This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age old enigmas of existence Over 300 years ago the human mind discovered the machine code of reality mathematics By utilizing abstract thought systems humans began to decode the workings of the cosmos From this understanding the current scientific paradigm emerged ultimately discovering the gift of technology Today however our island of knowledge is surrounded by ever longer shores of ignorance Science appears to have hit a dead end when confronted with the nature of reality and consciousness In this fascinating and accessible volume James Glattfelder explores a radical paradigm shift uncovering the ontology of reality It is found to be information theoretic and participatory yielding a computational and programmable universe *Transforming Mathematics Teacher Education* Tonya Gau Bartell, Corey Drake, Amy Roth McDuffie, Julia M. Aguirre, Erin E. Turner, Mary Q. Foote, 2019-08-01 This book builds on the Teachers Empowered to Advance Change in Mathematics TEACH Math project which was an initiative that sought to develop a new generation of preK 8 mathematics teachers to connect mathematics children s mathematical thinking and community and family knowledge in mathematics instruction or what we have come to call children s multiple mathematical knowledge bases in mathematics instruction with an explicit focus on equity Much of the work involved in the TEACH Math project included the development of three instructional modules for preK 8 mathematics methods courses to support the

project's goals. These activities were used and refined over eight semesters and in Fall 2014 shared at a dissemination conference with other mathematics teacher educators from a variety of universities across the United States. Chapter contributions represent diverse program and geographical contexts and teach prospective and practicing teachers from a variety of socioeconomic and ethnic backgrounds in particular providing accounts of supports, challenges and tensions in implementing equity based mathematics teacher education. The chapters supply rich evidence and illustrative examples of how other mathematics teacher educators and professional developers might make the modules work for their unique practices, courses, workshops and prospective teachers. It promises to be an important resource for offering guidance and examples to those working with prospective teachers of mathematics who want to create positive culturally responsive and equity based mathematics experiences for our nation's youth.

Understanding Religion Through Artificial Intelligence Justin E. Lane, 2021-05-06 In *Understanding Religion through Artificial Intelligence* Justin E. Lane looks at the reasons why humans feel they are part of a religious group despite often being removed from other group members by vast distances or multiple generations. To achieve this, Lane offers a new perspective that integrates religious studies with psychology, anthropology and data science as well as with research at the forefront of Artificial Intelligence (AI). After providing a critical analysis of approaches to religion and social cohesion, Lane proposes a new model for religious studies which he calls the Information Identity System. This model focuses on the idea of conceptual ties/links between an individual's self-concept and the ancient beliefs of their religious group. Lane explores this idea through real world examples ranging from the rise in global Pentecostalism to religious extremism and self-radicalization to the effect of 9/11 on sermons. Lane uses this lens to show how we can understand religion and culture today and how we can better contextualize the changes we see in the social world around us.

Parliament Buildings Sophia Psarra, Uta Staiger, Claudia Sternberg, 2023-10-30 As political polarisation undermines confidence in the shared values and established constitutional orders of many nations, it is imperative that we explore how parliaments are to stay relevant and accessible to the citizens whom they serve. The rise of modern democracies is thought to have found physical expression in the staged unity of the parliamentary seating plan. However, the built forms alone cannot give sufficient testimony to the exercise of power in political life. *Parliament Buildings* brings together architecture, history, art history, history of political thought, sociology, behavioural psychology, anthropology and political science to raise a host of challenging questions: How do parliament buildings give physical form to norms and practices, to behaviours, rituals, identities and imaginaries? How are their spatial forms influenced by the political cultures they accommodate? What kinds of histories, politics and morphologies do the

diverse European parliaments share and how do their political trajectories intersect This volume offers an eclectic exploration of the complex nexus between architecture and politics in Europe Including contributions from architects who have designed or remodelled four parliament buildings in Europe it provides the first comparative multi disciplinary study of parliament buildings across Europe and across history Praise for Parliament Buildings In its totality this is an invaluable book both as a comprehensive review of the wider implications of architecture and building in culture and society and as a specific resource in the understanding of one highly specialised but profoundly significant building type Dean Hawkes Cardiff University and University of Cambridge Symbols of history and of hope theatres of struggle cradles of consensus parliamentary buildings as these diverse essays show both reflect our democracies and can help them function better David Anderson House of Lords Parliament Buildings is a brilliant interdisciplinary exploration of a fascinating topic Theoretically sophisticated empirically rich and historically informed it demonstrates the multiple ways in which politics and the built environment intersect and sheds light on the symbolic and material practices central to contemporary representative politics Duncan Bell University of Cambridge *World Yearbook of Education 2018* Julie McLeod, Noah W. Sobe, Terri Seddon, 2017-12-01 This latest volume in the World Yearbook of Education Series considers changing space times of education by asking how they become unevenly textured as our worlds globalise horizons shift and familiar points of reference melt and are remade Acknowledging the reach of economic and cultural change digital communication geopolitics and persistent inequalities the chapters trace processes that are re making education and societies Examining the depth of their impact on practices methods and concepts reveals the significance of knowledge building and socially embedded forms of reasoning in emerging patterns of educational governance pedagogic and policy reforms as well as in lived understandings of self and social worlds The organisation of the collection into three sections Making Spaces Troubling Temporalities and Mobility and Contexts begins to map out an ambitious project It calls on education researchers and professionals to write the present as history by grasping the socio spatial historical and political dimensions and effects that frame form and filter the educational present This research calls for a revitalised historical sociology and novel forms of comparative education that can provide productive insights inform creative problem solving and suggest practical directions for education This agenda recognises the unevenness of educational space times the making of education as a social institution the persistence and effects of social embeddedness eventful space situated knowledge and geosocial thinking the present as history and multiple temporalities in education different registers of transformation that become visible through lenses such as identity work citizenship and mobility The World Yearbook of Education 2018 continues the project of compiling worldwide research on globalising education These volumes offer a powerful commentary on how and why space times of education are changing and emphasise the importance of forms of knowledge that materialise categories of professionals policies and practices This volume will be of interest to academics professionals and policymakers in education and social policy and also to scholars
