Department of State, 1992 **Twain's Brand** Judith Yaross Lee, 2013-02-26 Samuel L Clemens lost the 1882 lawsuit declaring his exclusive right to use Mark Twain as a commercial trademark but he succeeded in the marketplace where synergy among his comic journalism live performances authorship and entrepreneurship made Mark Twain the premier national and international brand of American humor in his day And so it remains in ours because Mark Twain's humor not only expressed views of self and society well ahead of its time but also anticipated ways in which humor and culture coalesce in today's postindustrial information economy the global trade in media performances and other forms of intellectual property that began after the Civil War In Twain's Brand Humor in Contemporary American Culture Judith Yaross Lee traces four hallmarks of Twain's humor that are especially significant today Mark Twain's invention of a stage persona comically conflated with his biographical self lives on in contemporary performances by Garrison Keillor Margaret Cho Jerry Seinfeld and Jon Stewart The postcolonial critique of Britain that underlies America's nationalist tall tale tradition not only self destructs in A Connecticut Yankee in King Arthur's Court but also drives the critique of American Exceptionalism in Philip Roth's literary satires The semi literate writing that gives Adventures of Huckleberry Finn its vernacular vision wrapping cultural critique in ostensibly innocent transgressions and misunderstandings has a counterpart in the apparently untutored drawing style and social critique seen in The Simpsons Lynda Barry's comics and The Boondocks And the humor business of recent decades depends on the same brand name promotion cross media synergy and copyright practices that Clemens pioneered and fought for a century ago Twain's Brand highlights the modern relationship among humor commerce and culture that were first exploited by Mark Twain

Emerging Geographies of Belief Catherine Brace, 2010-10-12 This interdisciplinary book presents new research from international scholars that explores questions of belief faith and religion Focusing on theoretically informed cultural geographical and historical analyses of faith belief religion society and space the book presents new and revised theoretical approaches and methodologies grounded in rigorous empirical research both contemporary and historical The volume takes a deliberately eclectic approach reflecting the complex interactions of the political and poetic dimensions of sacredness in contemporary societies Taking this research agenda forward this book explores how religious beliefs inform and construct social identities public knowledge and modes of governance In particular the book meets an urgent need for a critical understanding of how terms such as religion faith fundamentalism and secularism for example inform public debates and foster constructive engagements both between faith groups and between people of faith and people of no faith The essays in Emerging Geographies of Belief also show that religion cannot be mapped neatly onto faith or belief We attempt to tease out the different circumstances in which for example belief can operate without religious adherence or faith can inspire social

action in geographies of hope The geography of the title relates to an overarching concern with space and spatiality rather than describing a single disciplinary approach Our concern with belief faith and religion operates at different temporal and spatial scales in different localities from the contemporary appeal to a more global sense of responsibility to a historically situated account of faith led educational practices This reflects more generally the so called spatial turn in the social sciences and humanities But despite this wide historical and geographical sweep the authors share some key concerns This collection is unique in combining theoretical conceptual and discursive approaches to the emerging geographies of belief with substantive examples of the intersection of belief faith and religion with aspects of everyday life Discussions of the potential subversive and prophetic capacities of faith belief and religion sit alongside consideration of how these have become implicated in the spaces and performances of hope It provides a critique of the situationist and substantive approaches to religion along with insights into the role of faith in education community and social work It considers the practices of remembrance representation and pilgrimage and the place of religion in contemporary identity politics In sum the book problematises the seemingly simple categories of faith religion and belief calling attention to how these are mobilised and implicated differently in different circumstances In addressing these themes the book provides a key theoretical resource but crucially goes on to show how multiple perspectives on belief however defined can be applied in practice Whilst there has been much contemporary work on the individual areas covered by the book they have not been brought together before to provide a dynamic insight into issues of the most pressing relevance
