[Unto This Last and Other Writings](#) John Ruskin, 2005-12-01 First and foremost an outcry against injustice and inhumanity *Unto this Last* is also a closely argued assault on the science of political economy which dominated the Victorian period Ruskin was a profoundly conservative man who looked back to the Middle Ages as a Utopia yet his ideas had a considerable influence on the British socialist movement And in making his powerful moral and aesthetic case against the dangers of unhindered industrialization he was strangely prophetic This volume shows the astounding range and depth of Ruskin's work and in an illuminating introduction the editor reveals the consistency of Ruskin's philosophy and his adamant belief that questions of economics art and science could not be separated from questions of morality In Ruskin's words There is no Wealth but Life **Penguin Classics** Anonymous, 2012-01-31 A Complete Annotated Listing More than 1 500 titles in print Authoritative introductions and notes by leading academics and contemporary authors Up to date translations from award winning translators Readers guides and other resources available online Penguin Classics on air online radio programs

Utopias and Dystopias in the Fiction of H. G. Wells and William Morris Emelyne Godfrey, 2016-12-08 This book is

about the fiercely contrasting visions of two of the nineteenth century's greatest utopian writers. A wide-ranging interdisciplinary study, it emphasizes that space is a key factor in utopian fiction, often a barometer of mankind's successful relationship with nature or an indicator of danger. Emerging and critically acclaimed scholars consider the legacy of two great utopian writers exploring their use of space and time in the creation of sites in which contemporary social concerns are investigated and reordered. A variety of locations is featured, including Morris's quasi-fourteenth-century London, the lush and corrupted island, a routed and massacred English countryside, the high rises of the future, and the vertiginous landscape of another Earth beyond the stars.

Making is Connecting David Gauntlett, 2013-04-29. In *Making is Connecting*, David Gauntlett argues that through making things, people engage with the world and create connections with each other. Both online and offline, we see that people want to make their mark on the world and to make connections. During the previous century, the production of culture became dominated by professional elite producers. But today, a vast array of people are making and sharing their own ideas, videos, and other creative material online, as well as engaging in real-world crafts, art projects, and hands-on experiences. Gauntlett argues that we are seeing a shift from a sit-back-and-be-told culture to a making-and-doing culture. People are rejecting traditional teaching and television and making their own learning and entertainment. Drawing on evidence from psychology, politics, philosophy, and economics, he shows how this shift is necessary and essential for the happiness and survival of modern societies.

Accounting for Biodiversity Michael Jones, 2014-06-27. Biodiversity, at its simplest, refers to the variety of species inhabiting Planet Earth. It is essential to the well-being of the planet. There is now a scientific consensus around the current ongoing crisis in biodiversity arising from both climate change and human activities. Experts believe we are in the middle of a mass extinction of biodiversity with devastating consequences for our planet. *Accounting for Biodiversity* explores the need for companies to actively protect, conserve, and improve biodiversity within their sphere of operation. The 14 chapters, written by a selected team of experts, investigate the ways in which companies are embracing their responsibility through a variety of biodiversity initiatives and innovative models designed to improve the recording, reporting, and valuing of biodiversity. Global case studies look at biodiversity accounting in Africa, Asia, Australasia, Europe, and South America. Overall, this book provides a comprehensive set of reflections on accounting for biodiversity and recommendations for the future. This book is essential reading for all those interested in the contribution that accounting can make to the preservation of biodiversity. As we see increasing awareness of the importance of sustainability and ecological responsibility in business activity, it is relevant and should prove informative to students, managers, accountants, and those in business more generally. It is also important for all those interested in conserving biodiversity.

Work Incentives and Welfare Provision Doris Schroeder, 2018-02-06. This title was first published in 2000. Over the past decade, the welfare state has come under sustained attack, not only from quarters which never approved of its policies but also from political theorists who used to support it. With the collapse of communism, the policy of comprehensive

welfare provision came under renewed scrutiny It was argued that its impact on work incentives is most detrimental Examining in detail current unemployment debates within Western welfare states this book seeks to verify or refute the view that non work is increasingly chosen by work shy individuals the pathological theory of unemployment Drawing from a range of disciplinary perspectives from social philosophy and the history of philosophy to occupational psychology and feminist economics this interdisciplinary analysis reveals that the pathological theory of unemployment with its reliance on a deficient depiction of human nature and its disregard of non pecuniary work incentives and empirical evidence on benefit fraud cannot be upheld Schroeder presents an alternative explanation for the phenomenon of widespread Western unemployment through new insights into an external barrier theory of unemployment namely technological displacement combined with a refusal to return to a two tiered Victorian society By effectively combining empirical data with philosophical deliberations the book provides an important contribution to the welfare state debate *History of Modern Design Third Edition* David

Raizman,2023-08-31 This unparalleled and wide ranging book surveys the history of applied arts and industrial design from the eighteenth century to the present day exploring the dynamic relationship between design and manufacturing and the technological social and commercial contexts in which this relationship has developed In this extensively revised and expanded third edition David Raizman addresses international questions more fully with the addition of six Global Inspiration sections that examine the contributions of non Western traditions rendering the very notion of a national design debatable The text also pays closer attention to issues of gender race and climate change and their impact on design With over 580 illustrations mostly in colour *History of Modern Design* is an inclusive well balanced introduction to a field of increasing scholarly and interdisciplinary research and provides students in design with historical perspectives of their chosen fields of study Political Descent Piers J. Hale,2014-08-05

Historians of science have long noted the influence of the nineteenth century political economist Thomas Robert Malthus on Charles Darwin In a bold move Piers J Hale contends that this focus on Malthus and his effect on Darwin s evolutionary thought neglects a strong anti Malthusian tradition in English intellectual life one that not only predated the 1859 publication of the *Origin of Species* but also persisted throughout the Victorian period until World War I *Political Descent* reveals that two evolutionary and political traditions developed in England in the wake of the 1832 Reform Act one Malthusian the other decidedly anti Malthusian and owing much to the ideas of the French naturalist Jean Baptiste Lamarck These two traditions Hale shows developed in a context of mutual hostility debate and refutation Participants disagreed not only about evolutionary processes but also on broader questions regarding the kind of creature our evolution had made us and in what kind of society we ought therefore to live Significantly and in spite of Darwin s acknowledgement that natural selection was the doctrine of Malthus applied to the whole animal and vegetable kingdoms both sides of the debate claimed to be the more correctly Darwinian By exploring the full spectrum of scientific and political issues at stake *Political Descent* offers a novel approach to the relationship between evolution and political thought in the

Victorian and Edwardian eras *The Cambridge Companion to William Morris* Marcus Waithe, 2024-05-23 A vibrant gathering of influential voices who have participated in the critical political and curatorial revival of William Morris's work

Women and the Victorian Occult Tatiana Kontou, 2013-10-31 Increasingly contemporary scholarship reveals the strong connection between Victorian women and the world of the nineteenth century supernatural. Women were intrinsically bound to the occult and the esoteric from mediums who materialised spirits to the epiphanic experiences of the New Woman from theosophy to telepathy. This volume addresses the various ways in which Victorian women expressed themselves and were constructed by the occult through a broad range of texts. By examining the roles of women as automatic writing mediums, spiritualists, authors, editors, theosophists, socialists, and how they interpreted the occult in their life and work, the contributors in this edition return to sensation novels, ghost stories, autobiographies, sciences and fashionable magazines to access the visible and invisible worlds of Victorian life. The variety of texts analysed by the authors in this collection demonstrates the many interpretations of the occult in nineteenth century culture and the ways that women used supernatural imagery and language to draw attention to issues that bore immediate implications on their own lives. Either by catering for the fad of ghost stories or by giving public trance speeches, women harnessed the metaphorical and financial forces of the supernatural. As the articles in this book demonstrate, the occult was after all a female affair. This book was published as a special issue of *Women's Writing*.

Peacock & Vine A. S. Byatt, 2016-08-02 From the winner of the Booker Prize, a ravishing book that opens a window into the lives, designs and passions of Mariano Fortuny and William Morris, two remarkable artists who themselves are passions of the writer A. S. Byatt. Born a generation apart in the mid 1800s, Fortuny and Morris were seeming opposites. Fortuny, a Spanish aristocrat, thrilled by the sun-baked cultures of Crete and Knossos; Morris, a member of the British bourgeoisie, enthralled by Nordic myths. Through their revolutionary inventions and textiles, both men inspired a new variety of art that is as striking today as when it was first conceived. In this elegant meditation, Byatt traces their genius right to the source. Fortuny's Palazzo Pesaro Orfei in Venice is a warren of dark spaces imbued with the rich hues of Asia. In his attic workshop, Fortuny created intricate designs from glowing silks and velvets; in the palazzo, he found happiness in a glittering cavern alongside the French model who became his wife and collaborator, including on the famous Delphos dress, a flowing pleated gown that evoked the era of classical Greece. Morris's Red House outside London, with its Gothic turrets and secret gardens, helped inspire his stunning floral and geometric patterns; it likewise represented a coming together of life and art. But it was a sweet, simple old place called Kelmscott Manor in the countryside that he loved best, even when it became the setting for his wife's love affair with the artist Dante Gabriel Rossetti. Generously illustrated with the artists' beautiful designs, pomegranates and acanthus, peacock and vine among other aspects of their worlds, this marvel-filled book brings the visions and ideas of Fortuny and Morris to vivid life.

The Individual and Utopia Clint Jones, Cameron Ellis, 2016-03-09 Central to the idea of a perfect society is the idea that communities must be strong and bound together with

shared ideologies However while this may be true rarely are the individuals that comprise a community given primacy of place as central to a strong communal theory This volume moves away from the dominant current macro level theorising on the subject of identity and its relationship to and with globalising trends focusing instead on the individual's relationship with utopia so as to offer new interpretive approaches for engaging with and examining utopian individuality Interdisciplinary in scope and bringing together work from around the world *The Individual and Utopia* enquires after the nature of the utopian as citizen demonstrating the inherent value of making the individual central to utopian theorizing and highlighting the methodologies necessary for examining the utopian individual The various approaches employed reveal what it is to be an individual yoked by the idea of citizenship and challenge the ways that we have traditionally been taught to think of the individual as citizen As such it will appeal to scholars with interests in social theory philosophy literature cultural studies architecture and feminist thought whose work intersects with political thought utopian theorizing or the study of humanity or human nature

Victorian Literature and the Physics of the Imponderable Sarah C Alexander, 2015-07-28 The Victorians were obsessed with the empirical but were frequently frustrated by the sizeable gaps in their understanding of the world around them This study examines how literature and popular culture adopted the emerging language of physics to explain the unknown or imponderable

The Secret Life of the Modern House Dominic Bradbury, 2021-04-01 Informative and entertaining this publication is a feast for the eyes while also thought provoking and offers excellent inspiration for daydreaming about what makes the perfect modern house Wallpaper A fascinating selection of innovative homes this is a thoughtful journey through the evolution of domestic architecture Sunday Express Over the last century the way that we live at home has changed dramatically Nothing short of a design revolution has transformed our houses and the spaces within them moving from traditional patterns of living all the way through to an era of more fluid open plan and modern styles Whether we live in a new home or a period house our spaces will have been shaped one way or another by the pioneering Modernists and Mid century architects and designers who argued for a fresh way of life Architectural and design writer Dominic Bradbury charts the course of this voyage all the way from the late 19th century through to the houses of today in this ground breaking book Over nineteen thematic chapters he explains the way our houses have been reinvented while taking in along the way the giants of Art Deco influential Modernists including Le Corbusier and Frank Lloyd Wright as well as post war innovators such as Eero Saarinen and Philip Johnson Taking us from the 20th to the 21st century Bradbury explores the progress of modernity itself and reveals the secret history of our very own homes

The Folk Ross Cole, 2021-09-07 Who were the folk This question has haunted generations of radicals and reactionaries alike *The Folk* traces the musical culture of these elusive figures in Britain and the US during a crucial period from 1870 to 1930 and beyond to the contemporary alt right It follows an insistent set of disputes surrounding the practice of collecting ideas of racial belonging the poetics of nostalgia and the pre history of European fascism It is the biography of a people who exist only as a

symptom of the modern imagination and the archaeology of a landscape directing the flow of global politics today
