High Court upholds working miners' claims against union

NUM'S ACTION IS BREACH OF RULES

A HIGH Court judge has upheld the claims of two Yorkshire miners and decided that actions of the National Union of Mineworkers are contrary to the rights of their own members and the union's own rules.

Mr and Mrs Gordon and two Yorkshire men, Mr Taylor and Mrs Paulstone — returned to work at South Yorkshire Area 3 Mainland Colliery.

It was a recent action taken by the union's own members — not by the National Coal Board or any other employers. It had nothing to do with industrial relations legislation.

As their solicitor stressed after the hearing, their action was "founded on the law of contract and principles of natural justice which have served our society for centuries".

The judge held that any national strike action is clearly unlawful until it begins to fulfil a purpose in law. He decided that the union's own rules had not been breached until the judge said otherwise. The judge said that the union's own rules had not been breached until the judge said otherwise.

MINERS NOW AT 93 PITS

ATTENDANCES in Yorkshire and Scottish coalfields are the highest since the NUM strikes started — and coal production has re-started at another Western Area colliery.

There are nearly 60,000 people working at well over half of Britain's collieries.

As the miners' return to work continues, 55 pits are now mining coal. They are all the collieries in Nottinghamshire, South Yorkshire, Lancashire, and Warwickshire, all but three of those in Western Area, three Derbyshire collieries and one in Scotland. They are being manned by NUM members who are not on strike and who are also reporting for work at an additional 10 collieries and the Selby colliery project in Yorkshire.

The latest pit to resume coal production is Westons Colliery in Staffordshire where all seven pits are now mining. More than 100 men are going to work at the pit. Production would have started a month ago but for the collapse of shaft wall lining

which was repaired by men who voluntarily returned to work after the NUM national cessation.

Western Area had their highest attendances since 24 hours — 8,386 on October 5 — and only one pit, Hardham in North Wales, is still on strike.

October's second week brought a record 71 men at work at 17 pits and one work stoppage in the Yorkshire coalfield — three stops in the North Yorkshire coalfield. South Yorkshire 21, Doncaster 16, and Harrogate eight, including attendances for the first time at Euxine Island, Harrow, and Park Mill.

During September North Yorkshire also had their best ever coal week — 5,214 on September 26, with men in all seven collieries but one and coal production at 10,000 tonnes. It was increasing every week up to the first week in October when holidays were being taken.

Northumbria recorded their best figures on October 6 with 525 working miners. Despite the weather at the end of August, they have working at all but one of the coalfield's 12 collieries and producing coal at 10,000 tonnes.

In the South East, the number of men at work has risen to 11.
