Ecologies Design Maibritt Pedersen Zari,Peter Connolly,Mark Southcombe,2020-07-07 The notion of ecology has become central to contemporary design discourse This reflects contemporary concerns for our planet and a new understanding of the primary entanglement of the human species with the rest of the world The use of the term ecology with design tends to refer to how to integrate ecologies into design and cities and be understood in a biologically scientific and technical sense In practice this scientific technical knowledge tends to be only loosely employed The notion of ecology is also often used metaphorically in relation to the social use of space and cities This book argues that what it calls the biological and social senses of ecology are both important and require distinctly different types of knowledge and practice It proposes that science needs to be taken much more seriously in biological ecologies and that social ecologies can now be understood non metaphorically as assemblages Furthermore this book argues that design practice itself can be understood much more rigorously productively and relevantly if understood ecologically The plural term ecologies design refers to these three types of ecological design This book is unique in bringing these three perspectives on ecological design together in one place It is significant in proposing that a strong sense of ecologies design practice will only follow from the interconnection of these three types of practice *Ecologies Design* brings together leading international experts and relevant case studies in the form

of edited research essays case studies and project work It provides an overarching critique of current ecologically oriented approaches and offers evidence and exploration of emerging and effective methods techniques and concepts It will be of great interest to academics professionals and students in the built environment disciplines *Postcolonial Pacific Writing* Michelle Keown,2004-12-17 This major new interdisciplinary study focuses on the representation of the body in the work of eight of Polynesia's most significant contemporary writers Drawing on anthropology psychoanalysis philosophy history and medicine *Postcolonial Pacific Writing* develops an innovative postcolonial framework specific to the literatures and cultures of this region Critical Qualitative Research in Second Language Studies Kathryn A. A Decade of Disaster Experiences in Ōtautahi Christchurch Shinya Uekusa, Steve Matthewman, Bruce C.

Glavovic, 2022-02-13 This book critically surveys a decade of disasters in Ōtautahi Christchurch. It brings together a diverse range of authors, disciplinary approaches, and topics to reckon with the events that commenced with the 2010/2011 Canterbury earthquake sequence. Each contribution tackles its subject matter through the frame of Critical Disaster Studies (CDS). The events and the subsequent recovery provide a once-in-a-lifetime opportunity to learn from a series of concatenating urban disasters in order to prepare us for our future on an urban planet facing unprecedented environmental pressures. The book focuses on the production of vulnerability, the human dimensions of disaster, the Indigenous response to disasters, and the practical lessons that can be drawn from them.

Transpacific Americas Eveline Dürri, Philipp Schorch, 2015-12-07 This volume explores cultural, social, and economic connections between the Americas and the South Pacific. It reaches beyond Sino-American collaborations to focus on rather neglected and sometimes invisible Southern linkages, asking how these connections originated and have developed over time, which local responses they have generated, and what impact these processes have in the region in terms of representational forms and strategies, new cultural practices, and empowerment of individuals in post-colonial contexts. The volume also compares and contrasts intriguing parallels of politics and identity formation. By extending the focus beyond East Asia to the Southern Pacific region, including Island connections with the Americas, the volume provides a more comprehensive understanding of recent dynamics and shifting relations across the Pacific. By approaching the Transpacific Americas as an assemblage or relational space which is created and becomes meaningful through multiple localities and their translocal connections, the book complicates the Euro-American distinction between centre and rim. While the collection offers a distinctive geographical focus, it simultaneously emphasizes the translocal qualities of specific locations through their entanglements in transpacific assemblages within and across cultural, social, and economic spheres. Furthermore, without neglecting the inextricable historical dimension of anthropological perspectives, the focus is on the diverse and unexpected contemporary forms of cultural, social, and economic encounters and engagements, and on re-emerging Indigenous networks. Primarily based on empirical research, the volume explores face-to-face encounters, relations from below, and transcultural interactions and relationships, as well as ideas and conceptualizations of cultural spaces across localities that have long been perceived as separate but are indeed closely interconnected.

Maori Oral Tradition Jane McRae, 2017-03-20 Maori oral tradition is the rich poetic record of the past handed down by voice over generations through whakapapa, whakatauki, korero, and waiata. In genealogies and sayings, histories, stories, and songs, Maori tell of te ao tawhito or the old world, the gods, the migration of the Polynesian ancestors from Hawaiki, and life here in Aotearoa. A voice from the past, today this remarkable record underpins the speeches, songs, and prayers performed on marae and the teaching of tribal genealogies and histories. Indeed, the oral tradition underpins Maori culture itself. This book
