Nice Book Crisis Communitisation Gilles Dauv:

From Crisis to Communitisation Gilles Dauvé, 2019-02-01 Communitisation means something quite straightforward a revolution that starts to change social relations immediately It would extend over years decades probably but from Day One it would begin to do away with wage labour profit productivity private property classes States masculine domination and more There would be no transition period in the Marxist sense no period when the associated producers continue furthering economic growth to create the industrial foundations of a new world Communitisation means a creative insurrection that would bring about communism not its preconditions Thus stated it sounds simple enough The questions are what how and by whom That is what this book is about Communitisation is not the be all and end all that solves everything and proves wrong all past critical theory The concept was born out of a specific period and we can fully understand it by going back to how people personally and collectively experienced the crises of the 1960s and 70s The notion is now developing in the maelstrom of a new crisis deeper than the Depression of the 1930s among other reasons because of its ecological dimension a crisis that has the scope and magnitude of a crisis of civilisation This is not a book that glorifies existing struggles as if their present accumulation were enough to result in revolution Radical theory is meaningful if it addresses the question How can proletarian resistance to exploitation and dispossession achieve more than aggravate the crisis How can it reshape the world

Crisis Communication Alan Jay

Zaremba, 2015-05-18 Crises happen When they do organizations must learn to effectively communicate with their internal and external stakeholders as well as the public in order to salvage their reputation and achieve long term positive effects Ineffective communication during times of crisis can indelibly stain an organization's reputation in the eyes of both the public and the members of the organization The subject of crisis communication has evolved from a public relations paradigm of reactive image control to an examination of both internal and external communication which requires proactive as well as reactive planning There are many challenges in this text for crisis communication involves more than case analysis students must examine theories and then apply these principles This text prepares students by Providing a theoretical framework for understanding crisis communication Examining the recommendations of academics and practitioners Reviewing cases that required efficient communication during crises Describing the steps and stages for crisis communication planning Crisis Communication is a highly readable blend of theory and practice that provides students with a solid foundation for effective crisis communication

Responding to Crisis Dan Pyle

Millar, Robert L. Heath, 2003-12-08 In recent years researchers and practitioners have explored the nature theory and best practices that are required for effective and ethical crisis preparation and response The consequences of being unprepared to respond quickly appropriately and ethically to a crisis are dramatic and well documented For this reason crisis consulting and the development of crisis response plans and protocols have become more than a cottage industry Taking a rhetorical view of crisis events and utterances this book is devoted to adding new insights to the discussion and to describing a rhetorical approach to crisis communication To help set the tone for that

description the opening chapter reviews a rhetorical perspective on organizational crisis As such it raises questions and provokes issues more than it addresses and answers them definitively The other chapters can be viewed as a series of experts participating in a panel discussion The challenge to each of the authors is to add depth and breadth of understanding to the analysis of the rhetorical implications of a crisis as well as to the strategies that can be used ethically and responsibly Central to this analysis is the theoretic perspective that crisis response requires rhetorically tailored statements that satisfactorily address the narratives surrounding the crisis which are used by interested parties to define and judge it This volume will be of value to scholars and students interested in crisis communication and is certain to influence future work and research on responding to crises **Lukaszewski on Crisis Communication** ,2013 The First 24 Hours Dieudonné ten Berge,1988
