## **Nice Book Infinity Beckoned Adventuring Through 19691989:**

**Infinity Beckoned** Jay Gallentine, Bobak Ferdowsi, 2016 Infinity Beckoned illuminates a critical period of space history when humans dared an expansive leap into the inner solar system With an irreverent and engaging style Jay Gallentine conveys the trials and triumphs of the people on the ground who conceived and engineered the missions that put robotic spacecraft on the heavenly bodies nearest our own These dedicated space pioneers include such individuals as Soviet Russia's director of planetary missions who hated his job but kept at it for fifteen years enduring a paranoid bureaucracy where even the copy machines were strictly regulated Based on numerous interviews Gallentine delivers a rich variety of stories involving the men and women American and Russian responsible for such groundbreaking endeavors as the Mars Viking missions of the 1970s and the Soviet Venera flights to Venus in the 1980s From the dreamers responsible for the Venus landing who discovered that dropping down through heavy clouds of sulfuric acid and 900 degree heat was best accomplished by surfing to the five man teams puppeteering the Soviet moon rovers from a top secret off the map town without a name the people who come to life in these pages persevered in often trying thankless circumstances Their legacy is our better understanding of our own planet and our place in the cosmos Purchase the audio edition

**Island of Clouds** Gerald Brennan, 2017-05-08 April 1972 Three legendary astronauts embark on mankind's boldest space voyage yet a yearlong mission to fly past our nearest planetary neighbor Venus What follows will be a journey more harrowing than any of them can imagine Island of Clouds the first full length novel in the Altered Space series is a gripping space epic based on NASA mission proposals from the late 1960s Touching on literary influences ranging from Borges and Bukowski to the Book of Job this story of exploration also offers a literary probing of the dark reaches of human nature alcoholism capitalism authority fatherhood and the ephemeral nature of desire The titles in the Altered Space series are wholly separate narratives but all deal with the mysteries of space and time progress and circularity Each one is an ens of words in which orbits of spacecraft moons planets and people allow us fresh perspectives on the cycles of our own lives

**Star Bound** Emily Carney, Bruce McCandless, 2025 Star Bound is a book for anyone who wants to learn about the American space program but isn't sure where to start First and foremost it's a history short sweet and straightforward From rocketry pioneer Robert Goddard's primitive flight tests in 1926 through the creation of NASA from our first steps on the moon to construction of the International Space Station and planning a trip to Mars readers will meet the people and projects that have put the United States at the forefront of space exploration Along the way they'll learn How the United States beat the Soviets to the moon Why astronauts float in space Hint It's not for lack of gravity How fast rockets have to go to stay in orbit around Earth How we can look back in time through a space telescope With technology evolving and humanity's understanding of the universe expanding we are entering an exciting period of space exploration Authored by two veteran space writers with unique insights into the topic Star Bound offers up the story of Americans in space with a focus on the cultural and societal contexts

of the country's most important missions rather than engineering and technical minutiae. Vibrant, positive and humorous, *Star Bound* is packed with facts and stories for novice space fans. And sprinkled in with the history are lists of the greatest space songs, books, movies, and more, all designed to make space exploration accessible to even the casual reader. **Shoot for the Moon** James Donovan, 2019-03-12. Learn why NASA astronaut Mike Collins calls this extraordinary space race story the best book on Apollo: this inspiring and intimate ode to ingenuity celebrates one of the most daring feats in human history. When the alarm went off forty thousand feet above the moon's surface, both astronauts looked down at the computer to see 1202 flashing on the readout. Neither of them knew what it meant, and time was running out. On July 20, 1969, Neil Armstrong and Buzz Aldrin became the first humans to walk on the moon. One of the world's greatest technological achievements and a triumph of the American spirit, the Apollo 11 mission was a mammoth undertaking involving more than 410,000 men and women dedicated to winning the space race against the Soviets. Set amid the tensions and upheaval of the sixties and the Cold War, *Shoot for the Moon* is a gripping account of the dangers, the challenges, and the sheer determination that defined not only Apollo 11 but also the Mercury and Gemini missions that came before it. From the shock of Sputnik and the heart-stopping final minutes of John Glenn's Mercury flight to the deadly whirligig of Gemini 8, the doomed Apollo 1 mission, and that perilous landing on the Sea of Tranquility when the entire world held its breath while Armstrong and Aldrin battled computer alarms, low fuel, and other problems, James Donovan tells the whole story. Both sweeping and intimate, *Shoot for the Moon* is a powerfully written and irresistible celebration of one of humankind's most extraordinary accomplishments. Booklist starred review. *Infinity Beckoned* Jay Gallentine, 2016. *Infinity Beckoned* illuminates a critical period of space history when humans dared an expansive leap into the inner solar system. With an irreverent and engaging style, Jay Gallentine conveys the trials and triumphs of the people on the ground who conceived and engineered the missions that put robotic spacecraft on the heavenly bodies nearest our own. These dedicated space pioneers include such individuals as Soviet Russia's director of planetary missions who hated his job but kept at it for fifteen years, enduring a paranoid bureaucracy where even the copy machines were strictly regulated. Based on numerous interviews, Gallentine delivers a rich variety of stories involving the men and women American and Russian responsible for such groundbreaking endeavors as the Mars Viking missions of the 1970s and the Soviet Venera flights to Venus in the 1980s. From the dreamers responsible for the Venus landing who discovered that dropping down through heavy clouds of sulfuric acid and 900-degree heat was best accomplished by surfing to the five-man teams puppeteering the Soviet moon rovers from a top secret off-the-map town without a name, the people who come to life in these pages persevered in often trying, thankless circumstances. Their legacy is our better understanding of our own planet and our place in the cosmos. **Apollo 11** James Donovan, 2019-05-13. Apollo 11: die unmögliche Mission. In der Nacht vor seinem Flug zum Mond rechnete Neil Armstrong die Chancen aus, die er Buzz Aldrin und Michael Collins hatten, um lebend zur Erde zurückzukehren. Fifty Fifty dachte er. Andere Experten hingegen, darunter auch Wissenschaftler und

Techniker der NASA sahen die Sache weitaus weniger optimistisch 5 zu 1 sagten sie dass die Männer nicht zurückkommen  
Oder sogar 10 zu 1 Apollo 11 war die unmögliche Mission ihr Scheitern wahrscheinlicher als ihr Erfolg Praktisch zum
