in Bacterial Infections covers common bacterial pathogenic agents with the most effective methods for their identification and classification in the light of their specific epidemiology The book will be a valuable resource for molecular typing of infectious diseases agents encountered in both the research and hospital clinical lab settings as well as culture collections Each chapter provides an overview of molecular approaches to typing bacterial pathogens Part I gives a general overview of typing methods used in the traditional microbiology laboratory in comparison to molecular methods of epidemiology In Part II the relative strengths and weaknesses of the different methods applicable to the specific agents of infectious diseases are emphasized Specific emphasis is placed on recent changes and updates in molecular typing **Causal Analytics for**

Applied Risk Analysis Louis Anthony Cox Jr.,Douglas A. Popken,Richard X. Sun,2018-06-19 Causal analytics methods can

revolutionize the use of data to make effective decisions by revealing how different choices affect probabilities of various outcomes This book presents and illustrates models algorithms principles and software for deriving causal models from data and for using them to optimize decisions with uncertain outcomes It discusses how to describe and summarize situations detect changes evaluate effects of policies or interventions learn what works best under different conditions predict values of as yet unobserved quantities from available data and identify the most likely explanations for observed outcomes including surprises and anomalies The book resents practical techniques for causal modeling and analytics that practitioners can apply to improve understanding of how choices affect probabilities of consequences and based on this understanding to recommend choices that are more likely to accomplish their intended objectives The book begins with a survey of modern analytics methods focusing mainly on techniques useful for decision risk and policy analysis Chapter 2 introduces free in browser software including the Causal Analytics Toolkit CAT software to enable readers to perform the analyses described and to apply modern analytics methods easily to their own data sets Chapters 3 through 11 show how to apply causal analytics and risk analytics to practical risk analysis challenges mainly related to public and occupational health risks from pathogens in food or from pollutants in air Chapters 12 through 15 turn to broader questions of how to improve risk management decision making by individuals groups organizations institutions and multi generation societies with different cultures and norms for cooperation These chapters examine organizational learning community resilience societal risk management and intergenerational collaboration and justice in managing risks
