Announcements & Index, 1982 *Desert Puma* Kenneth A. Logan, Linda L. Sweanor, 2001-08 Scientists and
conservationists are beginning to understand the importance of top carnivores to the health and integrity of fully functioning
ecosystems As burgeoning human populations continue to impinge on natural landscapes the need for understanding
carnivore populations and how we affect them is becoming increasingly acute Desert Puma represents one of the most
detailed assessments ever produced of the biology and ecology of a top carnivore The husband and wife team of Kenneth
Logan and Linda Sweanor set forth extensive data gathered from their ten year field study of pumas in the Chihuahua Desert
of New Mexico also drawing on other reliable scientific data gathered throughout the puma's geographic range Chapters
examine the evolutionary and modern history of pumas their taxonomy and physical description a detailed description and
history of the study area in the Chihuahua Desert field techniques that were used in the research puma population dynamics
and life history strategies the implications of puma behavior and social organization the relationships of pumas and their
prey The authors provide important new information about both the biology of pumas and their evolutionary ecology not only
what pumas do but why they do it Logan and Sweanor explain how an understanding of puma evolutionary ecology can and
must inform long term conservation strategies They end the book with their ideas regarding strategies for puma
management and conservation along with a consideration of the future of pumas and humans Desert Puma makes a
significant and original contribution to the science not only of pumas in desert ecosystems but of the role of top predators in
all environments It is an essential contribution to the bookshelf of any wildlife biologist or conservationist involved in large
scale land management or wildlife management *Applied Statistics*, 1999 Series C Applied Statistics of the Journal of the
