Poetic Inquiry Atlas Vol. 1: A Survey of Rigorous Poetics Adam Vincent, 2024-10-08 This edited volume illustrates various definitions and uses of poetry in research and scholarship both across disciplines and across the world. The collection offers a worldview of the capacity of poetic inquiry to enhance research and scholarship by showcasing rigorous poetics which represent epistemology and aesthetics as synergistic in action. Each chapter is intended to highlight diverse perspectives and uses of poetic inquiry thereby highlighting commonalities and differences in praxis that include Critical discussion around poetry and its uses in each poet scholar's diverse practices e.g. research writing personal development healthcare mental health ecology and or scholarship. An example of poetry that showcases their approaches in action. Insights into the crafting of their poetry i.e. what choices were made why were specific choices made. An exploration of how their poetic work links to the vast rhizomatic array of poetic inquiry. This volume is well suited for new scholars looking for ways to integrate poetry into their praxis and experienced scholars who wish to further their understanding of the capaciousness of poetic inquiry as a valuable method methodology tool and or approach. It also holds insights for those interested in the power of poetry as it relates to mental health health care ecology teaching qualitative research and identity work.

Varieties of English in Writing Raymond Hickey, 2010-10-28 This volume is concerned with assessing fictional and non-fictional written texts as linguistic evidence for earlier forms of varieties of English. These range from Scotland to New Zealand from Canada to South Africa covering all the major forms of the English language around the world. Central to the volume is the question of how genuine written representations are. Here the emphasis is on the techniques and methodology which can be employed when analysing documents. The vernacular styles found in written documents and the use of these as a window on earlier spoken modes of different varieties represent a focal concern of the book. Studies of language in literature which were offered in the past have been revisited and their findings reassessed in the light of recent advances in variationist linguistics.

What makes written words so special to the brain? Gui Xue,Urs Maurer,Mohamed L Seghier,2015-01-22 Reading is an integral part of life in today s information driven societies Since the pioneering work of Dejerine on word blindness in brain lesioned patients the literature has increased exponentially from neuropsychological case reports to mechanistic accounts of word processing at the behavioural neurofunctional and computational levels tapping into diverse aspects of visual word processing These studies have revealed some exciting findings about visual word processing including how the brain learns to read how changes in literacy impact upon word processing strategies and

whether word processing mechanisms vary across different alphabetic logographic or artificial writing systems Other studies have attempted to characterise typical and atypical word processes in special populations in order to explain why dyslexic brains struggle with words how multilingualism changes the way our brains see words and what the exact developmental signatures are that would shape the acquisition of reading skills Exciting new insights have also emerged from recent studies that have investigated word stimuli at the system network level by looking for instance at how the reading system interacts with other cognitive systems in a context dependent fashion how visual language stimuli are integrated into the speech processing streams how both left and right hemispheres cooperate and interact during word processing and what the exact contributions of subcortical and cerebellar regions to reading are The contributions to this Research Topic highlight the latest findings regarding the different issues mentioned above particularly how these findings can explain or model the different processes mechanisms pathways or cognitive strategies by which the human brain sees words The introductory editorial summarising the contributions included here highlights how varieties of behavioural tests and neuroimaging techniques can be used to investigate word processing mechanisms across different alphabetic and logographic writing systems

North Korea's Military-Diplomatic Campaigns, 1966-2008 Narushige Michishita, 2009-10-16 This book examines North Korea's nuclear diplomacy over a long time period from the early 1960s setting its dangerous brinkmanship in the wider context of North Korea's military and diplomatic campaigns to achieve its political goals. It argues that the last four decades of military adventurism demonstrates Pyongyang's consistent calculated use of military tools to advance strategic objectives vis-à-vis its adversaries. It shows how recent behavior of the North Korean government is entirely consistent with its behavior over this longer period: the North Korean government's conduct rather than being haphazard or reactive is rational in the Clausewitzian sense of being ready to use force as an extension of diplomacy by other means. The book goes on to demonstrate that North Korea's calculated adventurism has come full circle: what we are seeing now is a modified repetition of earlier events such as the Pueblo incident of 1968 and the nuclear and missile diplomacy of the 1990s. Using extensive interviews in the United States and South Korea including those with defected North Korean government officials alongside newly declassified first-hand material from U.S., South Korean, and former Communist bloc archives, the book argues that whilst North Korea's military-diplomatic campaigns have intensified, its policy objectives have become more conservative and are aimed at regime survival, normalization of relations with the United States and Japan, and obtaining economic aid.
