Language and Intercultural Communication in the New Era Farzad Sharifian, Maryam Jamarani, 2013 Studies of intercultural communication in applied linguistics initially focused on miscommunication mainly between native and non native speakers of English The advent of the twenty first century has witnessed however a revolution in the contexts and contents of intercultural communication technological advances such as chat rooms emails personal weblogs Facebook Twitter mobile text messaging on the one hand and the accelerated pace of people's international mobility on the other have given a new meaning to the term intercultural communication Given the remarkable growth in the prevalence of intercultural communication among people from many cultural backgrounds and across many contexts and channels conceptual divides such as native non native are now almost irrelevant This has caused the power attached to English and native speaker like

English to lose much of its automatic domination Such developments have provided new opportunities as well as challenges for the study of intercultural communication and its increasingly complex nature This book showcases recent studies in the field in a multitude of contexts to enable a collective effort towards advancements in the area Methodological Developments in Teaching Spanish as a Second and Foreign Language Guadalupe Ruiz-Farjardo, 2012-11-16 This book on applied linguistics presents new trends and improvements on the teaching of Spanish It deals with two major scopes in the field of linguistics that have a crucial role in the development of language teaching in general and of the teaching of Spanish in particular Interaction and Grammar The topics chosen coincide with the areas in which the communicative approach to language teaching dominant in European and American language programs since the 1970s and 80s has been the object of most revision In its first part the book appeals both to pragmatics and to discourse analysis to research the specifics of classroom discourse and classroom interaction as well as the differences between interactions among Spanish native speakers and interactions among non natives in order to develop methodologies for the effective incorporation of these aspects to the Spanish language classroom such as tasks to teach interaction or techniques to implement learner centered interactive class dynamics and cooperative learning In its second part this book reviews the pedagogical advantages of language description based on Cognitive Linguistic theory to explain different aspects of Spanish grammar The main purpose of our contribution is to show how taking different dimensions of construal and perspective in linguistic representations into account helps teachers to elucidate idiosyncratic and subtle contrasts of Spanish structure that other views and approaches cannot clarify on a meaningful base such as the aspectual opposition between preterits or the modal opposition between indicative and subjunctive both of high importance for the English speaking student The work selected for this book by experts from Columbia University and from several universities in Spain represents the most current lines of inquiry in this post communicative approach as applied specifically to the teaching of Spanish This book seeks to be to be a must read for the present and future It tackles unexplored territory for journals and applied linguistics collections have mainly addressed these problems in relation to English language and instruction Online Intercultural Exchange Robert O'Dowd, Tim Lewis, 2016-03-31 This volume provides a state of the art overview of Online Intercultural Exchange OIE in university education and demonstrates how educators can use OIE to address current challenges in university contexts such as internationalisation virtual mobility and intercultural foreign language education Since the 1990s educators have been using virtual interaction to bring their classes into contact with geographically distant partner classes to create opportunities for authentic communication meaningful collaboration and first hand experience of working and learning with partners from other cultural backgrounds Online exchange projects of this nature can contribute to the development of learner autonomy linguistic accuracy intercultural awareness intercultural skills and electronic literacies Online Intercultural Exchange has now reached a stage where it is moving beyond individual classroom initiatives and is assuming a role as a major tool for

internationalization intercultural development and virtual mobility in universities around the globe This volume reports qualitative and quantitative findings on the impact of OIE on universities in Europe and elsewhere and offers comprehensive guidance on using OIE at both pedagogical and technological levels It provides theoretically informed accounts of Online Intercultural Exchanges which will be relevant to researchers in Computer Assisted Language Learning Computer Mediated Communication or Virtual Education Finally contributors offer a collection of practitioner authored and practically oriented case studies for the benefit of teachers of foreign languages or in other subject areas who wish to engage in developing the digital literacy and intercultural competences of their learners
