

The background of the cover is a photograph of a desert landscape. In the foreground and middle ground, there are large, rounded rock formations with distinct horizontal sedimentary layers. The rocks are a mix of light tan and deep red colors. Sparse green desert shrubs are scattered across the sandy ground. The sky is a clear, bright blue with a few wispy white clouds. The overall scene is brightly lit, suggesting a sunny day.

Whitewashing War Christopher Leahey, 2015-04-24 Whitewashing War explores perhaps the most critical issue social studies educators presently face How do we teach our students about war In this timely book Christopher Leahey investigates how the political struggles over the social studies curriculum the corporate domination of the textbook and testing industry and the curricular constraints of the No Child Left Behind Act combine to stifle historical inquiry and deprive students of meaningful social studies instruction Using the controversial Vietnam War as a case study Leahey holds textbook narratives up to the light illuminating how the adoption process interpretive framework and selection of evidence combine to transform the past into thinly veiled historical myths By

attending to questions traditionally ignored in history education this dynamic book Challenges educators to rethink their pedagogical approaches to military conflict American and otherwise Calls on teachers to develop students critical sensibilities to ask questions conduct research evaluate evidence and make meaning of the past Provides classroom lessons for history educators and students to engage in rich intellectual encounters with the historical record Christopher R Leahey teaches world history in upstate New York His articles have appeared in Social Education and The Social Studies If students are to be prepared for the challenges of the 21st century then we need to provide inspired interdisciplinary instruction that can provide the skills values and knowledge to enable our future citizens with the possibility promise and perspective to transform their world Whitewashing War provides that solid interdisciplinary framework for teachers and students to teach and learn about the myth of war Critical Education Leahey echoes a concern expressed by others that history textbooks fail to address the realities of war CHOICE The crowning achievement of Whitewashing War is that it clearly illustrates the necessity of pursuing rational answers about why things are as they are or were as they were It becomes clear upon reading this book that if we help our students pursue rational answers in the course of creating personally meaningful understandings of the world they will figure out just what it is that needs to be done From the Foreword by E Wayne Ross University of British Columbia The author has done a masterful job of exploring issues of historiography pedagogy textbook debates and critical thinking Through a deep examination of two historical turning points in the Vietnam War he has contrasted the known facts of these periods with the accounts contained in the textbooks Rick Ayers Graduate School of Education UC Berkeley A passionate and powerful analysis Christopher Leahey provides penetrating insight into how Americans teach about their wars As such his book is an invaluable aid to understanding the past and its connection to our current predicament Fredrik Logevall Cornell University Whitewashing War challenges the fundamental assumptions underlying the corporate regime of standards textbooks and testing and exposes the distortions manipulation and lies that result Leahey builds a compelling case for critical inquiry and dialogue Highly recommended Ronald W Evans San Diego State University author of The Social Studies Wars

Christensen, 2009-08-30 The experience economy is a fourth economic field different from commodities goods and services. Experiences are an economic value added to a product or identical with the product. When you buy an experience you pay to spend time enjoying a series of memorable events that a company stages to engage the customer in a personal way. The experience dimension has moved into a predominant place since the 1990s, fueled by an expanding global and digital economy. In developed countries, people get richer and more individualized and, having met all basic material needs, they focus increasingly on personal development and self-realization. Demand for experience-based products increases, such as tourism and sports, as well as film, music, and other contents of media and interactive technologies. Furthermore, the demand for experience values is extended to include any product and dimension of modern societies, such as the design of houses, furniture, clothes, cars, computers, etc. This is not a completely new story. Commercial entertainment and design have been around for a century or so. And in addition, universal values of love, sex, belief, family, and the meaning of life have always been vital to human beings. What is new is the fact that capitalism is invading more and more fields of experiences connected with emotions and the extension of life proportions. In all developed countries and increasingly on a global scale, a series of expanding industries have emerged to supply the market with experience-oriented goods. In this book, the business development of markets and industries is covered from tourism to media and entertainment and from design to sex, including leading companies and trends in all industries involved.
