Edwards,2020-01-31 This book describes in considerable detail the people events ships and aircraft that shaped the Air Service from its origins in the late 19th century to its demise in 1945 The formative years began when a British Naval Mission was established in Japan in 1867 to advise on the development of balloons for naval purposes After the first successful flights of fixed wing aircraft in the USA and Europe the Japanese navy sent several officers to train in Europe as pilots and imported a steady stream of new models to evaluate During World War One Japan became allied with the UK and played a significant part in keeping the German fleets of ships and submarines at bay in the Pacific and Indian Oceans However in the international naval treaties that followed they felt betrayed since the number of capital ships battleships and cruisers that they were allowed was below those of the USA and the UK Aircraft carriers were not included so a program of carrier building was started and continued until World War Two At the same time they developed an aircraft industry and at the beginning of war their airplanes were comparable and in some instances superior to those of the British and Americans Much prewar experience was gained during Japans invasion of China but their continued anger with America festered and resulted in their becoming allied with Germany Italy and the Vichy France during World War Two There followed massive successful attacks on Pearl Harbor the Philippines the Southern Islands Port Darwin and New Guinea The British were decimated and the USA recoiled at the onslaught taking over a year to regroup and take the war to the Imperial Japanese forces Throughout the conflict many sea battles were fought and the name Zero became legendary When Japan eventually capitulated after the Atomic bombs were dropped the Japanese Imperial Air Service was disbanded

how reformed institutional arrangements might develop more sustainable and equitable transport services With chapters addressing each major form of transport Black examines the predominant role of institutions and individuals from seventeenth century shoguns to post war planners in transforming Japan s maritime infrastructure its roads and waterways and its adoption of rail and air transport Using a multidisciplinary comparative and chronological approach the book consults a range of technical cultural and political sources to tease out these interactions between society and technology This spirited new contribution to transport studies will attract readers interested in institutional power the history of transport and the development of future infrastructure as well as those with a general interest in Japan *J2M Raiden and N1K1/2 Shiden/Shiden-Kai Aces* Yasuho Izawa,Tony Holmes,2016-04-21 Although seen as a replacement for the A6M Zero sen carrier based fighter the Mitsubishi J2M Raiden was actually designed as a land based naval interceptor optimised for speed rather than manoeuvrability Engine cooling problems for its Mitsubishi Kasai 23 engine airflow and flight control issues plagued the Raiden s development but despite these production delays aces Sadaaki Akamatsu Yoshihiro Aoki Susumu Ito and Susumu Ishihara all claimed significant scores in the Raiden Kawanishi s N1K family of fighters were privately developed by the manufacturer from the N1K Kyofu floatplane fighter Again plagued by structural and engine maladies the N1K1 J Shiden eventually entered frontline service in time to see considerable action in the doomed defence of the Philippines in October 1944 Despite suffering heavy losses the units equipped with new fighter proved that the N1K could more than hold its own against P 38s and F6Fs The improved N1K2 J Shiden KAI started to reach the frontline by late 1944 in time for defence of the Home Islands Here it proved to be the best IJN fighter of the war **American Aviation Historical Society Journal** American Aviation Historical Society,1964 **Fighters of the Dying Sun** Justo Miranda,2021-07-11 The first B 29 flew over Tokyo on 1 November 1944 It was a photographic reconnaissance aircraft ironically named Tokyo Rose The Ki 44 fighters of the 47th Sentai took off to intercept it but as it turned out the Superfortress flew at such an altitude and speed that they could not reach it The Ki 44 II Otsu had been specifically designed for this type of interception and could reach the astonishing rate of climb of 5 000 m in four minutes however it was not good enough During the following ten months a devastating bombing campaign of thousands of Superfortress destroyed 67 Japanese cities and half of Tokyo The cultural shock and the political consequences were huge when it was realised that the Japanese industry was not able to produce the specially heat and stress resistant metallic alloys that were required to manufacture the turbo superchargers needed by the fighters in charge of defending the Japanese mainland They lacked the essential chromium and molybdenum metals to harden the steel This fact thwarted the manufacturing of numerous advanced projects of both conventional fighters and those derived from the transfer of German technology fitted with turbojets and rocket engines They are thoroughly described in this book Blood and Ruins Richard Overy,2023-04-04 Monumental A vast and detailed study that is surely the finest single volume history of World War II Richard Overy has given us a powerful reminder of the horror of war and the threat

posed by dictators with dreams of empire The Wall Street Journal A thought provoking and original reassessment of World War II from Britain s leading military historian A New York Times bestseller Richard Overy sets out in Blood and Ruins to recast the way in which we view the Second World War and its origins and aftermath As one of Britain s most decorated and respected World War II historians he argues that this was the last imperial war with almost a century long lead up of global imperial expansion which reached its peak in the territorial ambitions of Italy Germany and Japan in the 1930s and early 1940s before descending into the largest and costliest war in human history and the end after 1945 of all territorial empires Overy also argues for a more global perspective on the war one that looks broader than the typical focus on military conflict between the Allied and Axis states Above all Overy explains the bitter cost for those involved in fighting and the exceptional level of crime and atrocity that marked the war and its protracted aftermath which extended far beyond 1945 Blood and Ruins is a masterpiece a new and definitive look at the ultimate struggle over the future of the global order which will compel us to view the war in novel and unfamiliar ways Thought provoking original and challenging Blood and Ruins sets out to understand the war anew

Unquestionably the most iconic Japanese fighter of World War II the Mitsubishi A6M Rei Sen Type Zero fighter was used from the initial raid on Pearl Harbor up to the Kamikaze attacks at the end of the war Facing off against the likes of the Wildcat Corsair and even the Spitfire the Zero gained a legendary reputation amongst Allied pilots due to its incredible manoeuvrability Detailed analysis of its technical qualities show why the Zero was so feared but also pinpoints the weaknesses that would eventually be its downfall as Allied pilots learned how to combat it A selection of historical photographs and unique artwork accompany the analysis as James D Angina delves into the history of the premier Axis fighter of the Pacific Theatre exploring the design and combat effectiveness of the Zero as well as the tactics developed by Allied pilots to counter it
