Grid Forecast

When you use electricity matters.

Grid Forecast highlights cleaner times when using electricity may emit less carbon into the atmosphere, as well as less clean times when more carbon may be emitted.

About Clean and Less Clean Times

Your home electricity comes from energy sources that change throughout the day and over time. Depending on the energy source, a period of time is considered cleaner or less clean.

Cleaner

Electricity used during cleaner times may come from

renewable sources or other sources that emit less carbon.

Online Cleaner Cheaper Smaller Transforming Electricity:

Clean Disruption of Energy and Transportation Tony Seba, 2014-06-27 The industrial age of energy and transportation will be over by 2030 Maybe before Exponentially improving technologies such as solar electric vehicles and autonomous self driving cars will disrupt and sweep away the energy and transportation industries as we know it The same Silicon Valley ecosystem that created bit based technologies that have disrupted atom based industries is now creating bit and electron based technologies that will disrupt atom based energy industries Clean Disruption projections based on technology cost curves business model innovation as well as product innovation show that by 2030 All new energy will be provided by solar or wind All new mass market vehicles will be electric All of these vehicles will be autonomous self driving or semi autonomous The new car market will shrink by 80% Even assuming that EVs don't kill the gasoline car by 2030 the self driving car will shrink the new car market by 80% Gasoline will be obsolete Nuclear is already obsolete Up to 80% of highways will be redundant Up to 80% of parking spaces will be redundant The concept of individual car ownership will be obsolete The Car Insurance industry will be disrupted The Stone Age did not end because we ran out of rocks It ended because a disruptive technology ushered in the Bronze Age The era of centralized command and control extraction resource based energy sources oil gas coal and nuclear will not end because we run out of petroleum natural gas coal or uranium It will end because these energy sources the business models they employ and the products that sustain them will be disrupted by superior technologies product architectures and business models This is a technology based disruption reminiscent of how the cell phone Internet and personal computer swept away industries such as landline telephony publishing and mainframe computers Just like those technology disruptions flipped the architecture of information and brought abundant cheap and participatory information the clean disruption will flip the architecture of energy and bring abundant cheap and participatory energy Just like those previous technology disruptions the Clean Disruption is inevitable and it will be swift *Global Trends 2025: A Transformed World* C. Thomas Fingar, 2009-02 Prepared by the Nat Intell Council to stimulate strategic thinking about the future by identifying key trends the factors that drive them where they may be headed and how they might interact It uses scenarios to illustrate some of the many ways in which the drivers examined in the study e.g globalization demography the rise of new powers the decay of internat institutions climate change and the geopolitics of energy may interact to generate challenges and opportunities for future decisionmakers Contents The Globalizing Economy The Demographics of Discord The New Players Scarcity in the Midst of Plenty Growing Potential for Conflict BRIC s Bust Up Will the Internat System Be Up to the Challenges Power sharing in a Multipolar World Illus **Smart Grid Redefined: Transformation of the Electric Utility** Subramanian Vadari, 2018-02-28 Written by a leading expert in the utility field this practical resource guides professionals in the evolution of the Smart Grid and offers insight into distribution automation storage and microgrid This book highlights the journey to a transformed electric utility provides solid examples and includes

real world case studies Readers find guidance on new energy storage solutions and electric value chain disruptors Professionals learn how to overcome challenges related to integrating supply and demand diversity The book highlights how new technologies impact the day to day operations of a utility and how these technologies can transform the normal functioning of the utility Discussions are provided about how a transformed utility can be a springboard to a smart city Professionals will be able to apply the strategies of technologies in this resource to guide them to success in the field This book defines the roadmap to the utility of the future and provides a vision for how utilities can thrive in their new environment

Power Without Responsibility James Curran, Jean Seaton, 2018-10-08 This book attacks the conventional history of the press as a story of progress offers a critical defence and history of public service broadcasting provides a myth busting account of the internet a subtle account of the impact of social media and explores key debates about the role and politics of the media It has become a standard book on media and other courses but it has also gone beyond an academic audience to reach a wider public Hailed as a classic of media history and analysis by the Irish Times and a book that has cracked the canon by the Times Higher it has been translated into five languages This edition contains six new chapters These include the press and the remaking of Britain the rise of the neo liberal Establishment the moral decline of journalism the impact of social media and a history of attempts to reform the press It contains new research on the relationship between programmes institutions and society It places key UK institutions in the wider context of international affairs and their impact The book has been updated to take account of new developments like Brexit and the rise of Jeremy Corbyn and the shift in authority and legitimacy prompted by social media It does this with a clear explanation of how policy can shape media outcomes

The Energy Challenge Heiko von der Gracht, Michael Salcher, Nikolaus Graf Kerssenbrock, 2015-10-28 Be future proof with the energy licence Making the economy and society fit for the future begs the question how will the energy needs of tomorrow be met What measures need to be implemented by companies and communities today in order to be future proof tomorrow Current developments like power line conflicts the phase out of nuclear energy and meeting growing supply expectations demonstrate that to solve this strategic challenge decision makers from business politics and the wider community have to develop new sets of skills and foresight competencies In this book the authors set out the possible scenarios their consequences and the essential factors for securing tomorrow's energy supply They also provide the information needed by readers to earn their energy licence It's a licence designed to qualify the holder to recognise key developments trends and options for the energy future and to take the necessary action within their own organisations

Global Awakening Michael Schacker, 2012-12-14 Shows how we must make deep changes to complete our paradigm shift from the old mechanistic worldview to the new organic worldview Reveals the distinct stages of paradigm shifts through the ages including the 18th century Enlightenment and the critical stage of our current shift Explains how the new organic worldview began with Goethe and Kant Offers solutions for each of us to be able to realize and make the deep changes

needed for global regeneration In *Global Awakening* Michael Schacker shows that hidden within our global crises is a positive future for the planet Sharing his 30 years of intensive research into the history of change as well as the evolution of consciousness and regenerative science Schacker explains how our current shift from the old mechanistic worldview to a new organic worldview based on biological models follows the same pattern as other paradigm shifts across history including the 18th century Enlightenment and the American Revolution He reveals the creative geniuses who have contributed to the birth of the organic worldview beginning with Goethe Kant and Hahnemann Exposing the scientific and social forces that drive paradigm shifts he details the stages every paradigm shift progresses through the early Enlightenment the conservative backlash the intensive phase and the transformational phase leading to the Organic Shift Explaining that we are currently in the throes of the paradigm flip the critical last phase of our paradigm shift Schacker shows how the mechanistic worldview is crumbling around us and nothing but a complete transformation in the way we think will keep us from the path of total self destruction Providing a map to overcome the allure of the simplistic mechanical model that has spawned countless unsustainable practices and problems from global warming to intense economic disparities the author offers concrete solutions showing how each of us can use our talents skills and time to make the deep changes needed for global regeneration
