Kiernan one of the world s most respected historians employs a nuanced knowledge of history literature and politics in tracing the evolution of American power Far reaching and ambitious in scope the book combines accounts of the changing relationship between Native Americans and the white population with readings of the works of key cultural figures such as Melville and Whitman as well as an analysis of the way in which money and politics became so closely intertwined in American democracy Also included is a preface by Eric Hobsbawm providing insight into his own views on American imperialism as well as a valuable introduction to Victor Kiernan s work Together they shed useful light on such issues as the uses and misuses of American military might its lack of respect for international agreements and the right to pre emptive defence issues which remain just as urgent today **Making Things International 2** Mark B. Salter,2016-04-10 Drawing widely from contemporary social and critical thought Making Things International 2 offers provocative interventions into debates about causality connection and politics through the notion of assemblage Political assemblages especially those that cross national borders can be catalyzed by a host of surprising sparks Present day global systems are complex and interdependent but the worn tools of traditional international relations theory are unsuited to the task of understanding how objects ideas and people come together to create dispute solve or perhaps cause these political configurations Contributors to this volume bring to their work a new sensitivity toward issues of power authority control and sovereignty The companion volume Making Things International 1 Circuits and Motion used things stuff and objects in motion to capture the material dynamics of global politics and to demonstrate the importance of the material This volume builds on that conversation by examining objects that incite political assemblages Specific subjects include fighter jets smartphones tents HTTP cookies representations of North Korea and histories of the diplomatic cable the orange prison jumpsuit and container shipping Contributors Rune Saugmann Andersen U of Helsinki Josef Teboho Ansorge Claudia Aradau King s College London Helen Arfvidsson Alexander D Barder Florida International U Tarak Barkawi London School of Economics Peter Chambers Shine Choi Seoul National U Sagi Cohen Thomas N Cooke Anna Feigenbaum Bournemouth U Andreas Folkers Goethe U Frankfurt Fabian Frenzel U of Leicester Kyle Grayson Newcastle U Nicky Gregson Durham U David Grondin U of Ottawa Xavier Guillaume U of Edinburgh Emily Lindsay Jackson Acadia U Miguel de Larrinaga U of Ottawa Debbie Lisle Queen s U Belfast Mary Manjikian Regent U Nadine Marquardt Goethe U Frankfurt Patrick McCurdy U of Ottawa Adam Sandor Nisha Shah U of Ottawa Julian Stenmanns Goethe U Frankfurt Casper Sylvest U of Southern Denmark Rens van Munster Danish Institute for International Studies Elspeth Van Veeren U of Bristol Srdjan Vucetic U of Ottawa Juha A Vuori U of Turku Tobias Wille **Sudden Justice** Chris Woods,2015-04-15 Sudden Justice explores the secretive history of the United States use of armed drones and their key role not only on today s battlefields but also in a covert targeted killng project that has led to the deaths of thousands *Algorithms of Armageddon* George Galdorisi,Sam J Tangredi,2024-03-12 It is unclear if U S policy makers and military leaders fully realize that we have already been thrust into an artificial intelligence AI race with authoritarian

powers Today the United States peer adversaries China and Russia have made clear their intentions to make major investments in AI and insert this technology into their military systems sensors and weapons Their goal is to gain an asymmetric advantage over the U S military The implications for our national security are many and complex Algorithms of Armageddon examines this most pressing security issue in a clear insightful delivery by two experts Authors George Galdorisi and Sam J Tangredi are national security professionals who deal with AI on a day to day basis in their work in both the technical and policy arenas Opening chapters explain the fundamentals of what constitutes big data machine learning and artificial intelligence They investigate the convergence of AI with other technologies and how these systems will interact with humans Critical to the issue is the manner by which AI is being developed and utilized by Russia and China The central chapters of the work address the weaponizing of AI through interaction with other technologies man machine teaming and autonomous weapons systems The authors cover in depth debates surrounding the AI genie out of the bottle controversy AI arms races and the resulting impact on policy and the laws of war Given that global powers are leading large scale development of AI it is likely that use of this technology will be global in extent Will AI enabled military weapons systems lead to full scale global war Can such a conflict be avoided The later chapters of the work explore these questions point to the possibility of humans failing to control military AI applications and conclude that the dangers for the United States are real Neither a protest against AI nor a speculative work on how AI could replace humans Algorithms of Armageddon provides a time critical understanding of why AI is being implemented through state weaponization the realities for the global power balance and more importantly U S national security Galdorisi and Tangredi propose a national dialogue that focuses on the need for U S military to have access to the latest AI enabled technology in order to provide security and prosperity to the American people   **Becoming the Story** Lindsay Palmer,2018-01-31 The September 11 attacks produced great changes in journalism and the lives of the people who practiced it Foreign reporters felt surrounded by the hate of American colleagues for the enemy Americans in combat areas became literal targets of anti U S sentiment Behind the lines editors and bureau chiefs scrambled to reorient priorities while feeling the pressure of sending others into danger Becoming the Story examines the transformation of war reporting in the decade after 9 11 Lindsay Palmer delves into times when print or television correspondents themselves received intense public scrutiny because of an incident associated with the work of war reporting Such instances include Daniel Pearl s kidnapping and murder Bob Woodruff s near fatal injury in Iraq the expulsions of Maziar Bahari and Nazila Fathi from Iran in 2009 the sexual assault of Lara Logan and Marie Colvin s 2012 death in Syria Merging analysis with in depth interviews of Woodruff and others Palmer shows what these events say about how post 9 11 conflicts transformed the day to day labor of reporting But they also illuminate how journalists work became entangled with issues ranging from digitization processes to unprecedented hostility from all sides to the political logic of the War on Terror   **Wines & Vines** H. F. Stoll,2017   Modern Conspiracy Emma A. Jane,Chris Fleming,2014-08-28 While conspiracy

theory is often characterized in terms of the collapse of objectivity and Enlightenment reason Modern Conspiracy traces the important role of conspiracy in the formation of the modern world the scientific revolution social contract theory political sovereignty religious paranoia and mass communication media Rather than seeing the imminent death of Enlightenment reason and a regression to a new Dark Age in conspiratorial thinking Modern Conspiracy suggests that many characteristic features of conspiracies tap very deeply into the history of the Enlightenment its vociferous critique of established authorities and a conception of political sovereignty fuelled by fear of counter plots for example Perhaps ultimately conspiracy theory affords us a renewed opportunity to reflect on our very relationship to the truth itself **Governing the Use-of-Force in International Relations** A. Warren,I. Bode,2014-10-01 This book examines US recourse to military force in the post 9 11 era In particular it evaluates the extent to which the Bush and Obama administrations viewed legitimizing the greater use of force as a necessary solution to thwart the security threat presented by global terrorist networks and WMD proliferation **Doing Ethics in Media** Chris Roberts,Jay Black,2021-11-29 The second edition of Doing Ethics in Media continues its mission of providing an accessible but comprehensive introduction to media ethics with a grounding in moral philosophy to help students think clearly and systematically about dilemmas in the rapidly changing media environment Each chapter highlights specific considerations cases and practical applications for the fields of journalism advertising digital media entertainment public relations and social media Six fundamental decision making questions the 5Ws and H around which the book is organized provide a path for students to articulate the issues understand applicable law and ethics codes consider the needs of stakeholders work through conflicting values integrate philosophic principles and pose a test of publicity Students are challenged to be active ethical thinkers through the authors reader friendly style and use of critical early career examples While most people will change careers several times during their lives all of us are life long media consumers and Doing Ethics in Media prepares readers for that task Doing Ethics in Media is aimed at undergraduate and graduate students studying media ethics in mass media journalism and media studies It also serves students in rhetoric popular culture communication studies and interdisciplinary social sciences The book s companion website doingethicsin media or www doingmediaethics com provides continuously updated real world media ethics examples and collections of essays from experts and students The site also hosts ancillary materials for students and for instructors including a test bank and instructor s manual *Vanity Fair* ,2005-11 *Air University Library Index to Military Periodicals* ,1997 **Captivating Technology** Ruha Benjamin,2019-06-07 The contributors to Captivating Technology examine how carceral technologies such as electronic ankle monitors and predictive policing algorithms are being deployed to classify and coerce specific populations and whether these innovations can be appropriated and reimagined for more liberatory ends **Security after Christendom** John Heathershaw,2024-02-13 We live in the wealthiest and most heavily defended world in history so why do we feel so insecure In a secular world what does Christian theology have to say about this problem Security after

Christendom combines practical examples social scientific research and an ecumenical approach to political theology to answer these questions It argues that Christendom was a plural phenomenon of imagined security communities of East and West whose unravelling continues to have implications for global politics today as dramatically illustrated by Russia s war in Ukraine While notions of a new Christendom are idolatrous and delusional secular imaginaries of national security or the liberal international order are both destructive and unstable True security radical inclusion nonviolent protection and abundant provision is an eschatological phenomenon inaugurated by Christ Security after Christendom is neither found in faithful government nor an exclusive church as polis approach but in relations of tension where the fallen powers are continuously confronted by prophetic practices A post Christendom community expresses its love for the world by seeking its security providentially limiting the disorders of the secular age and offering glimmers of a new earth **Violence in American Society** Chris Richardson,2020-08-11 While many books explore such specific issues as gun violence arson murder and crime prevention this encyclopedia serves as a one stop resource for exploring the history societal factors and current dimensions of violence in America in all its forms This encyclopedia explores violence in the United States from the nation s founding to modern day trends laws viewpoints and media depictions Providing a nuanced lens through which to think about violence in America including its underlying causes its iterations and possible solutions this work offers broad and authoritative coverage that will be immensely helpful to users ranging from high school and undergraduate students to professionals in law enforcement and school administration In addition to detailed and evenhanded summaries of the key events and issues relating to violence in America contributors highlight important events political debates legal perspectives modern dimensions and critical approaches This encyclopedia also features excerpts from such important primary source documents as legal rulings presidential speeches and congressional testimony from scholars and activists on aspects of violence in America Together these documents provide important insights into past and present patterns of violent crime in the United States as well as proposed solutions to those problems InfoWorld ,1997-04-07 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **InfoWorld** ,1997-03-17 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects ECAI 2020 Giuseppe De Giacomo,Bistra Dilkina,Michela Milano,Senén Barro,Alberto Bugarín,Jérôme Lang,2020-09-15 This book presents the proceedings of the 24th European Conference on Artificial Intelligence ECAI 2020 held in Santiago de Compostela Spain from 29 August to 8 September 2020 The conference was postponed from June and much of it conducted online due to the COVID 19 restrictions The conference is one of the principal occasions for researchers and practitioners of AI to meet and discuss the latest trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence PAIS 2020 held at
