Plant Factory Toyoki Kozai, Genhua Niu, Michiko Takagaki, 2019-11-03 *Plant Factory An Indoor Vertical Farming System for Efficient Quality Food Production Second Edition* presents a comprehensive look at the implementation of plant factory PF practices to yield food crops for both improved food security and environmental sustainability Edited and authored by leading experts in PF and controlled environment agriculture CEA the book is divided into five sections including an Overview and the Concept of Closed Plant Production Systems CPPS the Basics of Physics and Physiology Environments and Their Effects System Design Construction Cultivation and Management and Plant Factories in Operation In addition to new coverage on the rapid advancement of LED technology and its application in indoor vertical farming other revisions to the new edition include updated information on the status of business R D and selected commercial PFALs plant factory with artificial lighting Additional updates include those focused on micro and mini PFALs for improving the quality of life in urban areas the physics and physiology of light the impact of PFAL on the medicinal components of plants and the system design construction cultivation and management issues related to transplant production within closed systems photoautotrophic micro propagation and education training and intensive business forums on PFs Includes coverage of LED technology Presents case studies for real world insights and application Addresses PF from economics and planning to operation and lifecycle assessment *Advanced technologies for energy saving, plant quality control and mechanization development in plant factory* Yuxin Tong, Myung-Min Oh, Wei Fang, 2023-06-09 **Plant Factory Basics, Applications and Advances**

Toyoki Kozai, Genhua Niu, Joseph G. Masabni, 2021-11-16 *Plant Factory Basics Applications and Advances* takes the reader from an overview of the need for and potential of plant factories with artificial lighting PFALs in enhancing food production and security to the latest advances and benefits of this agriculture environment Edited by leading experts Toyoki Kozai Genhua Niu and Joseph Masabni this book aims to provide a platform of PFAL technology and science including ideas on its extensive business and social applications towards the next generation PFALs The book is presented in four parts Introduction Basics Applications and Advanced Research Part 1 covers why PFALs are necessary for urban areas how they can contribute to the United Nations Sustainable Development Goals and a definition of PFAL in relation to the term indoor vertical farm Part 2 presents SI units and radiometric photometric and photonmetric quantities types components and performance of LED luminaires hydroponics and aquaponics and plant responses to the growing environment in PFALs Part 3 describes the indexes and definition of various productivity aspects of PFAL provides comparisons of the productivity of the past and the present operation of any given PFALs and compares PFALs with one another from the productivity standpoint by applying the common indexes Part 4 describes the advances in lighting and their effects on plant growth breeding of indoor and outdoor crops production of fruiting vegetables and head vegetables and concluding with a focus on a human centered perspective of urban agriculture Providing real world insights and experience *Plant Factory Basics Applications and*

Advances is the ideal resource for those seeking to take the next step in understanding and applying PFAL concepts Provides the most in depth assessment of PFAL available Compares PFAL to indoor vertical farming and provides important insights into selecting optimal choice Presents insights to inspire design and management of the next generation of PFALs

Smart Plant Factory Toyoki Kozai, 2018-11-11 This book describes the concept characteristics methodology design management business recent advances and future technologies of plant factories with artificial lighting PFAL and indoor vertical farms The third wave of PFAL business started in around 2010 in Japan and Taiwan and in USA and Europe it began in about 2013 after the rapid advances in LED technology The book discusses the basic and advanced developments in recent PFALs and future smart PFALs that emerged in 2016 There is an emerging interest around the globe in smart PFAL R 3 lack of understanding of the technical and engineering aspects of PFAL among horticulturists 4 lack of knowledge of the technical challenges and opportunities in future PFAL businesses among business professionals policy makers and investors and 5 lack of a suitable textbook on the recent advances in PFAL technologies and business for graduate students and young researchers This book covers all the aspects of successful smart PFAL R D and business

Vision, Learning, and Robotics: AI for Plants in the 2020s Zhenghong Yu, Huabing Zhou, Luca Iocchi, Jeffrey Too Chuan Tan, Changcai Yang, Hao Lu, 2025-01-10 Population growth and climate change have posed significant challenges to crop breeding The identification of crop agronomic traits is fundamental to breeding yet currently the collection of such traits is largely reliant on the subjective judgment of workers or ground test equipment which is both costly and inefficient In recent years the advancement of artificial intelligence AI has revolutionized modern agriculture and plant science AI is a rapidly evolving field with datasets models and algorithms constantly changing It has also been increasingly applied to unmanned aerial vehicles field robots and hyperspectral imaging sensors offering great potential for large scale crop growth monitoring and precision management driving the agricultural field from mechanization to automation and intelligence This research topic aims to encourage research work that actively embraces new AI ideas progress and combines these new ideas technologies with robotics or sensing technologies for applications in plant phenotyping or precision agriculture We encourage the use of technologies that have seen significant development in the AI community after 2020 such as vision transformers and diffusion models

Advances and Trends in Development of Plant Factories Alejandro Isabel Luna-Maldonado, Juan Antonio Vidales-Contreras, Humberto Rodríguez-Fuentes, 2017-03-22 The plant factory is a facility that aids the steady production of high quality vegetables all year round by artificially controlling the cultivation environment e g light temperature humidity carbon dioxide concentration and culture solution allowing growers to plan production By controlling the internal environment plant factories can produce vegetables about two to four times faster than by typical outdoor cultivation In addition as multiple cultivation shelves a multi shelf system are used the mass production of vegetables in a small space is facilitated This research topic presents some new trends on intelligent measuring systems environment

Production under Controlled Environment Agriculture Toshiki Asao, Genhua Niu, Md Asaduzzaman, 2022-04-05

Contemporary Developments in Agricultural Cyber-Physical Systems Karthick, G.S., 2023-08-01 The cultivation of

crops plays a very important role in agriculture. However, proper maintenance and management are required. Lack of such management would lead to crop loss or reduced crop yields. Hence, the ability to detect and identify diseases on infected crops is a problem of increasing concern. Real-time disease detection systems do not exist in the current agricultural landscape. It requires tremendous amounts of work, expertise in plant diseases, and excessive processing time. Using precision agriculture techniques combined with AI, a great deal of work is reduced.

Contemporary Developments in Agricultural Cyber Physical Systems provides a forum for researchers and practitioners to exchange ideas and achieve progress in cyber physical systems by highlighting agricultural applications, advances, and research challenges. The book features chapters on all aspects pertaining to this multidisciplinary paradigm, in particular in its application to sustainable agriculture developments. Covering topics such as automation, monitoring systems, and smart agriculture, this premier reference source is an excellent resource for scientists, healthcare professionals, data analysts, computer scientists, students, and educators of higher education, researchers, and academicians.

Advances in Food Security and Sustainability Marc J. Cohen, 2020-10-16

Advances in Food Security and Sustainability Volume Five takes a scientific look at the challenges, constraints, and solutions necessary to maintain a healthy and accessible food supply in different communities. This ongoing series addresses a wide range of issues on food sustainability and security, exploring challenges related to protecting environmental resources while also meeting human nutritional requirements. Contains expertise from leading contributors on the topics. Covers a vast array of subjects relating to food security and sustainability. Explores challenges related to protecting environmental resources while also meeting human nutritional requirements.

Physiological Growth Responses to Light in Controlled Environment Agriculture Jason Lanoue, 2024-12-24

Light is the primary driving force for photosynthesis and thus dictates carbon assimilation, biomass production, and yield in plants. Light also plays an important role in a myriad of physiological and biochemical processes in plants, from eliciting specific gene responses to whole plant phenomics. The lighting environment is especially important in controlled environment agriculture (CEA) as it supplements or fully replaces natural light to improve growth and quality. Due to the advancements in lighting technologies and the rapid growth of the CEA industry, lighting research has been propelled into the forefront of the plant science field. Unlike organisms in the animal kingdom, plants are sessile. The inability to move has forced plants to evolve mechanisms to deal with the lighting environment they are in. For example, in environments that are rich in far-red light, leaf expansion and stem elongation are promoted in an effort to orient themselves in a more advantageous position to absorb photosynthetically active radiation (PAR). We have yet to fully understand the physiological and biochemical implications of plants under all forms of light, from ultraviolet to far-red. The goal of this Research Topic is to collect studies which further our knowledge of how plants interact with their light environment.
