Online Risk Lifetime When Procreation Permissible:

The Risk of a Lifetime Rivka Weinberg, 2017 This original comprehensive theory of procreative ethics explains what kind of act procreation is and when we may permissibly engage in it In order to ascertain when the procreative risk is permissible to impose Weinberg proposes contractualist principles to fairly attend to the interests prospective parents have in procreating and the interests future people have in a life of human flourishing The book presents a solution to the non identity problem as well as dilemmas regarding our liberal principles of autonomy consent and equality which may seem to be in tension with our procreative practices

Being Born Alison Stone, 2019-09-26 All human beings are born and all human beings die In these two ways we are finite our lives begin and our lives come to an end Historically philosophers have concentrated attention on our mortality and comparatively little has been said about being born and how it shapes our existence Alison Stone sets out to overcome this oversight by providing a systematic philosophical account of how being born shapes our condition as human beings Drawing on both feminist philosophy and existentialist concerns about the structure of meaningful human existence Stone offers an original perspective on human existence She explores how human existence is shaped by the way that we are born Taking natality into account transforms our view of human existence and illuminates how many of its aspects are connected with our birth These aspects include dependency the relationality of the self vulnerability reception and inheritance of culture and history embeddedness in social power situatedness and radical contingency Considering natality also sheds new light on anxiety mortality and the temporality of human life This book therefore bears on death and the meaning of life as well as many debates in feminist and continental philosophy

Citizen Science in the Digital Age James Wynn, 2017-01-10 James Wynn s timely investigation highlights scientific studies grounded in publicly gathered data and probes the rhetoric these studies employ Many of these endeavors such as the widely used SETI home project simply draw on the processing power of participants home computers others like the protein folding game FoldIt ask users to take a more active role in solving scientific problems In *Citizen Science in the Digital Age Rhetoric Science and Public Engagement* Wynn analyzes the discourse that enables these scientific ventures as well as the difficulties that arise in communication between scientists and lay people and the potential for misuse of publicly gathered data

Bryan F Singer,Patrick Anselme,Mike James Ferrar Robinson,Paul Vezina,2014-11-04 Like in the case of drugs gambling hijacks reward circuits in a brain which is not prepared to receive such intense stimulation Dopamine is normally released in response to reward and uncertainty in order to allow animals to stay alive in their environment where rewards are relatively unpredictable In this case behavior is regulated by environmental feedbacks leading animals to persevere or to give up In contrast drugs provide a direct intense pharmacological stimulation of the dopamine system that operates independently of environmental feedbacks and hence causes motivational runaways With respect to gambling the confined environment experienced by gamblers favors the emergence of excitatory conditioned cues so that positive feedbacks take over negative feedbacks Although drugs and gambling may act differently their abnormal activation of reward circuitry generates an underestimation of negative consequences and promotes the development of addictive compulsive behavior In Parkinson s and Huntington s disease dopamine related therapies may disrupt these feedbacks on dopamine signalling potentially leading

to various addictions including pathological gambling The goal of this Research Topic is to further our understanding of the neurobiological mechanisms underlying the development of pathological gambling This eBook contains a cross disciplinary collection of research and review articles ranging in scope from animal behavioral models to human imaging studies *The Use of Routine Health Data in Low- and Middle-Income Countries* Jim Todd,Michael Johnson Mahande,2020-12-11 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact [The Economy of Nature](#) Robert E.
