Distance Learning for Elementary STEM Amanda Thomas,2021-02-17 This practical guide outlines a vision for online and distance STEM learning at the elementary level with creative activities based on eight STEM themes Online and distance learning

may sound fairly straightforward. Instead of learning in a classroom setting, students learn at home with the assistance of online resources. But classroom learning does not always translate easily to online settings, particularly at the elementary level where children should be actively engaging in activities, exploration, and discussion. From designing a zoo to learning to garden to exploring the night sky, you'll find eight STEM lessons that are creative, hands-on, and engaging for elementary learners. Written for teachers and parents, the book unpacks STEM integration across multiple subjects with connections to the ISTE Standards. The book also includes play-based lessons for young learners and ideas for innovative design challenges. Each of the eight lessons includes an overview of materials, resources, time, and supervision needed. Suggested resources to explore such as simulations and virtual field trips. Supplementary learning materials such as questions and quizzes. Ideas for games and reinforcement. Hands-on activities and engineering design challenges. Connections to various content areas as well as children's books, movies, and art to keep the learning going after the lesson is completed. Concluding with a model for designing online and distance STEM learning for elementary-aged children, this book will support teachers and parents in designing the types of resources and learning experiences they need for elementary students. Audience: K-5 teachers and parents.

Teaching towards Democracy with Postmodern and Popular Culture Texts Patricia Paugh, Tricia Kress, Robert Lake, 2014-11-26 This edited volume supports implementation of a critical literacy of popular culture for new times. It explores popular and media texts that are meaningful to youth and their lives. It questions how these texts position youth as literate social practitioners. Based on theories of Critical and New Literacies that encourage questioning of social norms, the chapters challenge an audience of teachers, teacher educators, and literacy-focused scholars in higher education to creatively integrate popular and media texts into their curriculum. Focal texts include science fiction, dystopian, and other youth central novels, picture books that disrupt traditional narratives, graphic novels, video games, other arts-based texts, film, novel hybrids, and even the lives of youth readers themselves as texts that offer rich possibilities for transformative literacy. Syllabi and concrete examples of classroom practices have been included by each chapter author.
