Measurements Revised Edition Observations should not be entered at random over the page but according to a carefully
planned system and each should be accompanied by a memorandum so full that another person in reviewing the notes could
at a glance determine its meaning of what it is a measure and in what units it is expressed This above all things is essential It
is desirable that the observations and calculations should admit of ready comparison one part with another The notes should
therefore be compact and well arranged and the writing and figuring closely Spaced About the Publisher Forgotten Books
