Measuring Urban Design Metrics For Livable Places Metropolitan Planning Design:

Measuring Urban Design Reid Ewing, Otto Clemente, 2013-07-20 What makes strolling down a particular street enjoyable The authors of Measuring Urban Design argue it s not an idle question Inviting streets are the centerpiece of thriving sustainable communities but it can be difficult to pinpoint the precise design elements that make an area appealing This accessible guide removes the mystery providing clear methods to measure urban design In recent years many walking audit instruments have been developed to measure qualities like building height block length and sidewalk width But while easily quantifiable these physical features do not fully capture the experience of walking down a street In contrast this book addresses broad perceptions of street environments It provides operational definitions and measurement protocols of five intangible qualities of urban design specifically imageability visual enclosure human scale transparency and complexity The result is a reliable field survey instrument grounded in constructs from architecture urban design and planning Readers will also find a case study applying the instrument to 588 streets in New York City which shows that it can be used effectively to measure the built environment s impact on social psychological and physical well being Finally readers will find illustrated step by step instructions to use the instrument and a scoring sheet for easy calculation of urban design quality scores For the first time researchers designers planners and lay people have an empirically tested tool to measure those elusive qualities that make us want to take a stroll Urban policymakers and planners as well as students in urban policy design and environmental health will find the tools and methods in Measuring Urban Design especially useful

Urbanism is a way of thinking and acting needed for sustainable development urbanists are becoming inter and transdisciplinary bringing science technology and design into their field As the world is in a cascading of crises related to e g health energy food and water as well as issues of e g traffic housing and services integrated approaches become increasingly relevant as most of these challenges are related Having a holistic urbanism viewpoint is the path to resilience and sustainability Here we are not referring to a longer list of notions but particularly encouraging dialogues between possibly perceived conflicting discourses This book is the proceedings of the 14th IFoU conference a stepping stone towards a new culture of working together It includes papers in five tracks representing five types of debates over a set of dichotomies Urban rural Integration and Areas In Between The City is an Object and a City is in Transition Political Ecology and Adaptive and Transformative Framework Metropolization and the Right to the City Human centred and Nature based Approaches in Cities Urban Transformations through Exceptional Architecture Nadia Alaily-Mattar,Alain Thierstein,2021-05-30 Urban Transformations through Exceptional Architecture focusses on the nexus between architecturally exceptional projects and the city It addresses the following questions How can the complexity of these projects be comprehended What roles do the political contexts play in the commissioning of such projects and what audiences do these projects serve How has the granting of professional recognition for architects changed and what will this change mean to measures of exceptionality in architectural design What roles do the architectural competitions play in the process of commissioning the design of architecturally exceptional projects and do design competitions as an urban planning tool grant high value designs Architecturally exceptional projects are situated in physical urban fabrics How can this situatedness be analysed and what different values does the urban design dimension of these projects add By considering diverse aspects of architecturally exceptional projects the chapters in this book utilise a variety of research methods They bring into dialogue a range of

themes regarding the architectural urban design and political aspects of these projects This volume illustrates that multidisciplinary might well be the best strategy to balance the risks of over simplification and the challenges of complexity in analysing these exceptional projects and the city in its ever transformative process The chapters in this book were originally published as a special issue of the Journal of Urban Design

Connecting Places, Connecting People Reena Tiwari, 2017-09-07 What is a better community How can we reconfigure places and transport networks to create environmentally friendly economically sound and socially just communities How can we meet the challenges of growing pollution depleting fossil fuels rising gasoline prices traffic

congestion traffic fatalities increased prevalence of obesity and lack of social inclusion The era of car based planning has led to the disconnection of people and place in developed countries and is rapidly doing so in the developing countries of the Global South The unfolding mega trend in technological innovation while adding new patterns of future living and mobility in the cities will question the relevance of face to face connections What will be the glue that holds communities together in the future To build better communities and to build better cities we need to reconnect people and places **Connecting Places** Connecting People offers a new paradigm for place making by reordering urban planning principles from prioritizing movement of vehicles to focusing on places and the people who live in them Numerous case studies including many from developing countries in the Global South illustrate how this can be realized or fallen short of in practical terms Importantly citizens need to be engaged in policy development to connect with each other and with government agencies To measure the connectivity attributes of places and the success of strategies to meet the needs an Audit Tool is offered for a continual quantitative and qualitative evaluation

Beyond Mobility Robert Cervero, Erick Guerra, Stefan Al, 2017-12-05 Beyond Mobility also seeks to rethink how projects are planned and designed in cities and suburbs at multiple geographic scales from micro designs such as parklets to corridors and city regions The book closes with a reflection on the opportunities and challenges in moving beyond mobility with attention to emerging technologies such as self driving cars and ride hailing services and social equity topics such as accessibility livability and affordability

Computational Urban Planning and Management for Smart Cities Stan Geertman, Qingming Zhan, Andrew Allan, Christopher Pettit, 2019-05-09 This book contains a selection of the best articles presented at the CUPUM Computational Urban Planning and Urban Management conference held in the second week of July 2019 at the University of Wuhan China The chapters included were selected based on a double blind review process involving external reviewers

The Empathic City Nimish Biloria, Giselle Sebag, Hamish Robertson, 2023-06-30 This book has a primary focus on inclusions for solutions to problems and not just more on the nature of the current and emerging problems that most other competing titles present The book is also a true global representation of challenges and opportunities that have been encountered addressed and critiqued from a wide variety of contributors rather than academicians per se In doing so rather than focusing on techno centric prowess and associated case studies of the west as is the case in most competing titles the book also equally emphasizes upon the vulnerabilities and mitigating solutions being developed and tested in the under developed and developing nations Besides this the book also acquires an Equity oriented focus and hints upon sustainable inclusive modes of shaping our built environment throughout the contributing chapters The book is also unique in the way it combines the chosen themes to provide a holistic coverage of the broader determinants of urban health and wellbeing thus being better positioned to address SDG3 within one compact volume The book also differs from a typical conference proceeding or a non peer reviewed book since the book s highly theme specific approach is curated by a scientific peer review committee to carefully maintain diversity of contributions to

the book Cities have a profound power to support or hinder human health and wellbeing in countless ways Achieving greater health equity has emerged in recent years as a key priority and consideration when designing cities to promote health and wellbeing although there is a dearth of evidence and practical examples of research translation to guide cities and communities The book accordingly exemplifies a pluralistic approach to achieving urban health equity which recognises and addresses critical aspects of geography age race background socioeconomic status disability gender etc With interdisciplinary science clearly pointing to the role of the neighbourhood environment as one of the most important health determinants this book will undoubtedly lead the next generation of urban health actors to build contextually responsive equitable empathic cities to benefit residents around the world The book rather than being focused purely on academic propositions for building equitable cities offers a unique multi stakeholder perspective by collaborating with the International Society for Urban Health s 18th International Conference on Urban Health This unique collaboration allows access to hundreds of scientists architects urbanists multilaterals policymakers non profit leaders and grassroots organizers The book captures the voices and concerns of such diverse cross sectoral professionals and showcases findings that turn evidence into action and impact in communities around the world Chapter 14 is available open access under a Creative Commons Attribution 4 0 International License via link.springer.com

Urban Redevelopment Barry Hersh, 2017-08-29 Urban redevelopment plays a major part in the growth strategy of the modern city and the goal of this book is to examine the various aspects of redevelopment its principles and practices in the North American context Urban Redevelopment A North American Reader seeks to shed light on the practice by looking at both its failures and successes ideas that seemed to work in specific circumstances but not in others The book aims to provide guidance to academics practitioners and professionals on how when where and why specific approaches worked and when they didn t While one has to deal with each case specifically it is the interactions that are key The contributors offer insight into how urban design affects behavior how finance drives architectural choices how social equity interacts with economic development how demographical diversity drives cities growth how politics determine land use decisions how management deals with market choices and how there are multiple influences and impacts of every decision The book moves from the history of urban redevelopment The City Beautiful movement grand concourses and plazas through urban renewal superblocks and downtown pedestrian malls to today s place making transit oriented design street quieting new urbanism publicly accessible softer waterfront design funky small urban spaces and public private megaprojects This history also moves from grand masters such as Baron Haussmann and Robert Moses through community participation to stakeholder involvement to creative local leadership The increased importance of sustainability high energy performance resilience and both pre and post catastrophe planning are also discussed in detail Cities are acts of man not nature every street and building represents decisions made by people Many of today s best recognized urban theorists look for great forces economic trends technological shifts political movements and

try to analyze how they impact cities One does not have to be a subscriber to the great man theory of history to see that in urban redevelopment successful project champions use or sometimes overcome overall trends using the tools and resources available to rebuild their community This book is about how these projects are brought together each somewhat differently by the people who make them happen **Image and Graphics** Yao Zhao,Nick Barnes,Baoquan Chen,Rüdiger
