Human Factors in Product Design W. Green, Patrick W. Jordan, 1999-08-19 Manufacturers are becoming more aware of human factors in product design as a major competitive issue In many product areas manufacturers have reached a technology ceiling which simply means that it is increasingly difficult to get ahead of the competition in terms of for example functionality technical reliability or manufacturing costs As a consequence design has become a major battleground for manufacturers and usability is recognized as being a central tenet of good design This book provides a unique snapshot of current practice in human factors identifying methods and techniques that work well under tight constraints and providing case study evidence of their effectiveness The commercial implications of usability are discussed and special attention is paid to two key trends inclusive design and smart products Inclusive design is about meeting the needs of all users with one design which includes the elderly and the disabled Smart products are multi functional products with electronic interfaces containing a vast array of helpful functions Industrial designers and manufacturing executives will find this text enlightening

Manufacturing is then surveyed in the context of mechanical design. The book concludes with information on clutches, brakes, transmission and other topics important for vehicle engineering. Tables, figures and charts are included for reference.

Responsible Fashion Business in Practice Sennait Ghebreab, Sally Heale, 2023-04-14 This unique text offers a holistic, insightful and timely exploration of sustainable practices across the fashion industry. The book takes the reader logically through each part of the authors' new Responsible 9 Framework™, providing a clear perspective and examples for each component. The framework thoroughly explains the move away from a singular product commercial focus to a Conscious Item approach and Circular Services business mindset. An organisation's people are at the heart of the new framework and have therefore been rebranded as Community Next. Addressed is the Perceived Value of an item or brand and how sustainable pricing initiatives actively influence consumer purchase. Insights into Accountable Systems are reviewed to examine the importance of responsible processes when considering and integrating a successful sustainable supply chain into a fashion business. The section on Governance looks at the different global organisations available to fashion brands and customers alike which support their transition into a responsible and sustainable future existence. The last two sections of the framework are labelled Storytelling Platforms and Honest Communication, where transparent and honest strategies are highlighted and discussed from a viewpoint of how modern brands are engaging and
