Critical Care Study Guide Gerard J. Criner,Gilbert E. D'Alonzo,2013-03-09 Critical care medicine is a dynamic and
 exciting arena where complex pathophysiologic states requiring extensive knowledge and clinical acumen are commonly
 found Caring for critically ill patients requires an extensive knowledge of basic pathophysiology as well as awareness of the
 appropriate diagnostic tests and therapeutic interventions Because this knowledge base crosses many different disciplines
 introduction to caring for the intensive care patient while exciting may also be intimidating This textbook is designed toward
 making the dynamic environment of the critical care unit understandable and the approach to the patient both logical and
 successful The book contains three components 1 description of the procedural tasks commonly performed for the critically
 ill patient 2 explanation of the most common pathophysiologic states encountered and 3 description of specific disease
 entities with details of their differential diagnosis diagnostic strategy and therapeutic plan This book also uses several

educational approaches that we have found useful in our own teaching sessions and prior textbooks Clinical cases introduce chapters and highlight chapter segments to emphasize clinical relevancy As an additional study aid margin notes highlight important teaching points and facilitate easy review of chapter content To consolidate the principles outlined in each chapter review questions with full text explanations are provided at the end of each chapter All these elements help reinforce the most important messages for the reader
