Lieberman,2000-08 Stressing the important role of vision in the development of identity formation and self esteem she discusses such issues as mirroring the gaze the gleam in the eye feeling invisible or falsely mirrored and the learning early on to attach positive and negative values to one s appearance as they become manifest in the therapeutic relationship These patients use the therapist as a spectator whose focus on their bodies helps supplement insufficient cathexis and repair feelings of deficit Amply illustrated with clinical vignettes Dr **New Books on Women and Feminism** ,1996 AIDS and Representation Fiona Johnstone,2023-05-18 AIDS Representation explores portraits and self portraits made in response to the AIDS epidemic in America in the 1980s and 1990s Addressing the work of artists including Mark Morrisroe Robert Blanchon and Felix Gonzalez Torres through the interrelated themes of sickness and mortality desire and sexual identity love and loss Fiona Johnstone shows how the self representational practices of artists with HIV and AIDS offered a richly imaginative response to the limitations of early AIDS imagery Johnstone argues that the AIDS epidemic changed the very nature of visual representation and artistic practice necessitating a radical new approach to

conceptualising and visualising the human form An extended epilogue considers the ongoing art historicization of the epidemic re contextualising the book s themes in relation to contemporary photographic works More than just a historical discussion of the art of the AIDS crisis AIDS and Representation contributes to an emergent body of scholarship on the visual representation of illness Expanding the established genre of the autopathography or illness narrative beyond the predominantly textual this important contribution to art history and health humanities sensitively unpicks the entanglements between aesthetic form and the expression of lived experiences of critical and chronic ill health **Hide/Seek** Jonathan D. Katz, David C. Ward, 2010-11-02 An entirely new interpretation of modern American portraiture based on the history of sexual difference Hide Seek Difference and Desire in American Portraiture companion volume to an exhibition of the same name at the National Portrait Gallery Smithsonian Institution traces the defining presence of same sex desire in American portraiture through a seductive selection of more than 140 full color illustrations drawings and portraits from leading American artists Arcing from the turn of the twentieth century through the emergence of the modern gay liberation movement in 1969 the tragedies of the AIDS epidemic and to the present Hide Seek openly considers what has long been suppressed or tacitly ignored even by the most progressive sectors of our society the influence of gay and lesbian artists in creating American modernism Hide Seek shows how questions of gender and sexual identity dramatically shaped the artistic practices of influential American artists such as Thomas Eakins Romaine Brooks Marsden Hartley Georgia O Keeffe Charles Demuth Jasper Johns Robert Rauschenberg Andrew Wyeth Andy Warhol Robert Mapplethorpe and many more in addition to artists of more recent works such as Felix Gonzalez Torres Glenn Ligon Catherine Opie and Cass Bird The authors argue that despite the late nineteenth century definition and legal codification of the homosexual in reality questions of sexuality always remained fluid and continually redefined by artists concerned with the act of portrayal In particular gay and lesbian artists of but not fully in the society they portrayed occupied a position of influential marginality from which vantage point they crafted innovative and revolutionary ways of painting portraits Their resistance to society s attempt to proscribe them forced them to develop new visual vocabularies by which to code disguise and thereby express their subjects identities and also their own Bringing together for the first time new scholarship in the history of American sexuality and new research in American portraiture Hide Seek charts the heretofore hidden impact of gay and lesbian artists on American art and portraiture and creates the basis for the necessary reassessment of the careers of major American artists both gay and straight as well as of portraiture itself **Bibliographie D'histoire de L'art** ,1998 **Arts & Humanities Citation Index** ,2002

Artbibliographies Modern ,1998 *Women Photographers and Feminist Aesthetics* Claire Raymond, 2017-04-21 *Women Photographers and Feminist Aesthetics* makes the case for a feminist aesthetics in photography by analysing key works of twenty two women photographers including cis and trans woman photographers Claire Raymond provides close readings of key photographs spanning the history of photography from nineteenth century Europe to twenty first century

Africa and Asia She offers original interpretations of well known photographers such as Diane Arbus Sally Mann and Carrie Mae Weems analysing their work in relation to gender class and race The book also pays close attention to the way in which indigenous North Americans have been represented through photography and the ways in which contemporary Native American women photographers respond to this history Developing the argument that through aesthetic force emerges the truly political the book moves beyond polarization of the aesthetic and the cultural Instead photographic works are read for their subversive political and cultural force as it emerges through the aesthetics of the image This book is ideal for students of Photography Art History Art and Visual Culture and Gender
