

The background of the slide features a stylized illustration of dark brown and grey leaves falling from the top left towards the bottom right. The leaves are scattered across a light grey horizontal band, with some resting on a dark brown band at the very bottom. The overall aesthetic is minimalist and naturalistic.

**More Than Hot** Christopher Hamlin,2014-11-03 A conceptual and cultural history of fever a universally experienced and sometimes feared symptom Winner of the CHOICE Outstanding Academic Title of the Choice ACRL Christopher Hamlin s magisterial work engages a common experience fever in all its varieties and meanings Reviewing the representations of that condition from ancient times to the present More Than Hot is a history of the world through the lens of fever The book deals with the expression of fever with the efforts of medical scientists to classify it and with fever s changing social cultural and political significance Long before there were thermometers to measure it people recognized fever as a dangerous if transitory state of being It was the most familiar form of alienation from the normal self a concern to communities and states as well as to patients families and healers The earliest

medical writers struggled for a conceptual vocabulary to explain fever During the Enlightenment the idea of fever became a means to acknowledge the biological experiences that united humans A century later in the age of imperialism it would become a key element of conquest both an important way of differentiating places and races and of imposing global expectations of health Ultimately the concept would split fevers were dangerous and often exotic epidemic diseases while fever remained a curious physiological state certainly distressing but usually benign By the end of the twentieth century that divergence divided the world between a global South profoundly affected by fevers chiefly malaria and a North where fever now merely a symptom was so medically trivial as to be transformed into a familiar motif of popular culture A senior historian of science and medicine Hamlin shares stories from individuals some eminent many forgotten who exemplify aspects of fever reflections of the fevered for whom fevers and especially the vivid hallucinations of delirium were sometimes transformative of those who cared for them nurses and often mothers and of those who sought to explain deadly epidemic outbreaks Significant also are the arguments of the reformers for whom fever stood as a proxy for manifold forms of injustice Broad in scope and sweep Hamlin s study is a reflection of how the meanings of diseases continue to shift affecting not only the identities we create but often also our ability to survive *A Tripartite Self* Lisa Raphals,2023 *A Tripartite Self* explores relations between body and mind spirit or soul in early Chinese texts from the Warring States and early Han dynasty period

*Fluid Physiology and Pathology in Traditional Chinese Medicine* Steven Clavey,1995 Assists in the diagnosis of conditions resulting from fluid pathology and discusses approaches to treatment using both herbal remedies and acupuncture The text is augmented by clinical cases and listings of formulae and herbs used in treatments *Sharing the Light* Lisa Ann Raphals,Professor Lisa Raphals,1998-01-01 Explores historical and philosophical shifts in the depiction of women and virtue in the early years of the Chinese state Includes an examination of the history of yin yang theories **The Chinese**

**Historical Review** ,2009 **Early Science and Medicine** ,2008 **Metaphor and Meaning** Constance A. Cook,Christopher J. Foster,Susan Blader,2024-07-01 In *Metaphor and Meaning* scholars from China the United States and Europe draw on Sarah Allan s groundbreaking application of conceptual metaphor theory to the study of early Chinese philosophy and material culture Conceptual metaphor theory treats metaphors not just as linguistic expressions but as fundamental structures of thought that define one s conceptual system and perception of reality To understand another culture s worldview then hinges upon identifying the right metaphors through which it then becomes possible to navigate between shared and unshared experiences The contributors pursue lines of argument that complement enhance or challenge Allan s prior investigations into these root metaphors of early Chinese philosophy whether by explicitly engaging with conceptual metaphor theory or more indirectly by addressing meaning construction in a broader sense Like Allan s interpretative works *Metaphor and Meaning* interrogates both transmitted traditions and newly unearthed archaeological finds to understand how people in early China thought about the cosmos society and themselves *Chasing the Dragon's*

Tail Yoshio Manaka, Kazuko Itaya, Stephen Birch, 1995 The text introduces Dr Manaka's major clinical and theoretical accomplishments by describing how the X signal system is the foundation of human topography function and response In essence the X signal system defines qi yin yang and the five phases as clinical events rather than as abstract theories The text gives Western readers the first complete description of this treatment system **Translation Review**, 1998

*Reader's Guide to the History of Science* Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn Fundamentals of Chinese Acupuncture Andrew Ellis, Nigel Wiseman, Ken Boss, 1988 Revised companion to Fundamentals of Chinese Medicine is used in many top acupuncture and post graduate physician courses
