Narrative In Health Care Healing Patients Practitioners Profession And Community:

Narrative in Health Care John D Engel, Joseph Zarconi, Lura Pethtel, Sally Missimi, 2017-11-22 Narrative medicine has developed an identity already Clinicians of many disciplines are being summoned to a practice that recognizes patients by receiving their accounts of self Starting from different positions the four authors have converged in a strong and shared commitment to narrative health care They conceptualize narrative health care practices within frameworks derived from the social sciences and psychology and to a lesser degree phenomenology and autobiographical theory They relate the development of narrative medicine to relationship centered care patient centered care and complex responsive process of relating theory positing that narrative medicine can help clinicians to develop the skills required to practice relationship centered care The book details with exercises resource texts and abundant scholarly apparatus how these skills can be developed and strengthened This work will change health care Because of its scholarly rigor its multi voiced sources and its highly practical features lists activities key ideas and key references primary texts written by health care professionals and patients this work will be a guide in the field for those who practice medicine or nursing or social work The book establishes that there is a field to be practised a need to practise it and a means to develop the wherewithal to do so **Narrative**

Medicine in Hospice Care Tara Flanagan, 2019-12-13 Narrative medicine an interdisciplinary field that brings together the studies of literature and medicine offers both a way of understanding patient identity and a method for developing a clinician s responsiveness to patients While recognizing the value of narrative medicine in clinical encounters including the ethical aspects of patient discourse Tara Flanagan examines the limits of narrative practices for patients with cognitive and verbal deficits In *Narrative Medicine in Hospice Care Identity Practice and Ethics through the Lens of Paul Ricoeur* Flanagan contends that the models of selfhood and care found in the work of Ricoeur can offer a framework for clinicians and caregivers regardless of the verbal and cognitive capabilities of a patient at the end of life In particular Ricoeur s concept of patient identity connects with the narrative method of life review in hospice and offers an opportunity to address the religious and spiritual dimensions of the patient experience **The Palliative Care and Hospice Caregiver's Workbook**

Lura L Pethtel, John D Engel, 2017-11-22 This educational workbook helps people who build compassionate relationships with dying people Accompanied by its trainer s guide it presents a comprehensive sequential learning program for caregivers in non medical capacities covering everything from self understanding to spiritual issues listening skills and expressive activities developing the skills awareness and resilience needed for this privileged and sensitive role The program includes a variety of learning experiences including large and small group activities discussion close reading creative writing self exploration and skill development and practice This is an invaluable resource for small groups of individuals who wish to volunteer in hospice or palliative care settings A copy of the guide for trainers is included in each pack of workbooks and is also freely available online The best resource I have seen to guide teachers and learners in this complex training process I

predict that those of you who try it with your staffs and trainees will find that it bears fruit both for your patients and their families but also for the sustenance and personal development of the staff members themselves Timothy Quill M D in his Foreword

Developing Clinicians' Career Pathways in Narrative and Relationship-Centered Care John D Engel, Lura L Pethtel, Joseph Zarconi, 2018-08-08 Today there exists a robust body of work connecting narrative theory and practice with medical theory practice teaching and research Taken together what is particularly interesting about these works is that they portray narrative healthcare as both a philosophy of care and a set of skills John D Engel Lura L Pethtel and Joseph Zarconi in the Preface This inspiring collection of narrative portraits details the career paths of physicians and nurses who figure prominently in the realms of narrative and relationship centered healthcare Each narrative describes the healthcare practitioner's early decision process for choosing their career and follows with a trajectory of events and work situations that brought each person to their present position They offer a unique view from both a personal and a professional perspective The collection of narrative portraits provides students residents and practicing health professionals a window into the possibilities for constructing professional lives that are oriented to service in ways that are fulfilling energizing and creative The editors have made an important contribution to advancing the practice of narrative and relationship centered medicine They invite you to listen for the truths of your own story as you hear the voices of colleagues speak from the pages in your hand Reflecting on the ultimate concerns that move you will enable you to more fully inhabit your own life story and become more authentic and vital as you heal others Mark L Savickas in the Foreword

Restoring Primary Care Anton J Kuzel, John D Engel, 2018-04-19 To many practitioners managers and patients US primary care is in crisis Primary care physicians are often overworked and undervalued and both patients and care providers can feel locked into structures that lack compassion and are unfit for their intended purposes Healthcare reforms aim to resolve the situation but changes may take years to deliver and are contingent on numerous outside factors What steps are within care providers power to take now This book lays out a course to deliver compassionate care quality and efficiency that unlike many current patient centred medical home initiatives in the US does not require outside funding After reflecting on avoidable problems and harms in primary care the book offers stories of hope from innovative clinicians across the US before presenting ten practical deliverable steps to lift primary care provision from poor or mediocre to great This book will be of interest to practicing family physicians and general internists but will also be useful reading for health system leaders healthcare insurance purchasers and insurance company executives

Diagnosis Narratives and the Healing Ritual in Western Medicine James Meza, 2018-07-17 The dominance of illness narratives in narrative healing studies has tended to mean that the focus centers around the healing of the individual Meza proposes that this emphasis is misplaced and the true focus of cultural healing should lie in managing the disruption of disease and death cultural or biological to the individual's relationship with society By explicating narrative theory through the lens of cognitive anthropology Meza reframes the epistemology of narrative and healing moving it from

relativism to a philosophical perspective of pragmatic realism Using a novel combination of narrative theory and cognitive anthropology to represent the ethnographic data Meza's ethnography is a valuable contribution in a field where ethnographic records related to medical clinical encounters are scarce The book will be of interest to scholars of medical anthropology and those interested in narrative history and narrative medicine *Humanizing Healthcare Reforms* Gerald

Arbuckle, 2012-10-15 This book looks at the problems facing healthcare systems from a social anthropological angle and argues for a return to a values based approach to healthcare The author clarifies how organizations need to identify the goals that unite their members and how individuals at every level can contribute to positive change in their organizations

Second Wind M. Festle, 2012-02-14 This book uses both oral and conventional historical methods to describe and analyze the history of lung transplantation in the US While drawing on accounts from doctors and other specialists it primarily focuses on the experiences of patients and explores themes of uncertainty timing identity coping and quality of life

The Patient as Text Petter Aaslestad, 2016-07-06 A commonly held model of the doctor patient relationship casts it as a subject object relationship broadly the patient is a text and the doctor the reader or interpreter of that text However recent critical models preset notions of text and reader as complex and unstable and the relationship of doctor and patient as similarly complicated Explorations of psychiatry and madness by critics such as Michel Foucault present a further background of complex ideological change In *The Patient as Text* Petter Aaslestad explores selections from over a century of psychiatric notes from Gaustad Hospital Norway against this critical background exploring the impact of ideological and medical changes surrounding the psychiatric clinical relationship and psychiatric professionals as constructors of narratives This book will be of interest to researchers in the medical humanities psychiatric practitioners and those with an interest in medical history and critical theory *Mental Health, Psychiatry and the Arts* Victoria Tischler, 2018-10-08

Medicine and psychiatry both based on science require the art of caring using the principles of art in learning and teaching Sitting with a patient making sense of their distress being empathetic in understanding both the symptoms and the person and alleviating suffering needs a human touch For that doctors need the soul of an artist and must be aware of the value that arts have for society and the individual from the Foreword by Dinesh Bhugra This comprehensive book explores how visual art cinema music poetry literature and drama can inform the teaching and practice of psychiatrists and mental health professionals Edited and written by a team of expert practitioners teachers and researchers including both clinicians and users of mental health services this comprehensive book will provide valuable insights for undergraduate and postgraduate educators with teaching responsibilities in psychiatry and mental health Students of the medical humanities art music and drama therapists and educators in occupational therapy and psychology will also find this a valuable and insightful handbook The authors of this wonderful handbook provide a convincing argument that the arts are good for what ails us They have each used a preferred artistic medium to deepen personal reflection and to enhance their own creativity as physicians teachers and

therapists Their models are clear their suggestions practical but none of the approaches you ll find here is reductive or simplistic Try some of the reflective exercises and teaching strategies You will be sure to rediscover something you have always cherished about the art of healing from the Foreword by Allan D Peterkin **Creative Dialogues** Isabel Fernandes,Cecilia Beecher Martins,Amândio Reis,2015-06-18 This volume is the outcome of work done in the groundbreaking field of Narrative Medicine by an interdisciplinary research team based at the University of Lisbon Centre for English Studies ULICES and devoted to the international project Narrative and Medicine since 2009 The articles and essays gathered here heterogeneous as they may be such is the natural outcome of research carried out across disciplines are not only of high caliber when read individually but also constitute an inval Understanding Medical Education Tim Swanwick,Kirsty Forrest,Bridget C. Judah's Desire and the Making of the Abrahamic Israel Hong Guk-Pyoung, 2024-07-01 In this refreshing exploration of Judah's identity formation the emphasis is placed on the psychological underpinnings of Judah's sentiments towards Israel aiming to illuminate the significance of Judah's appropriation of Israel Richly contextual this book draws parallels observed in Asian contexts notably those of North and South Korea and China with its marginal Others Central to the thesis is that Judah's perceived inferiority to Israel played a crucial role in its quest to appropriate Israel's legacy and identity Adopting a functionalist lens Judah's rewriting of Israel's ancestral past is examined The Abraham and Jacob traditions are understood as competing identity narratives serving as critical discursive tools to construct their pasts The study scrutinizes how the southern Abraham tradition fundamentally reoriented the Jacob tradition North Israel's standalone ancestral myth Set against the broader canvas of continued efforts to redefine and embody Israel within the history of Judeo Christian religions this exploration underscores how Judah's pivotal appropriation of Israel has established a paradigm for all future endeavors of becoming Israel

Interdisciplinarity Andrew Barry, Georgina Born, 2013-06-26 The idea that research should become more interdisciplinary has become commonplace According to influential commentators the unprecedented complexity of problems such as climate change or the social implications of biomedicine demand interdisciplinary efforts integrating both the social and natural sciences In this context the question of whether a given knowledge practice is too disciplinary or interdisciplinary or not disciplinary enough has become an issue for governments research policy makers and funding agencies Interdisciplinarity in short has emerged as a key political preoccupation yet the term tends to obscure as much as illuminate the diverse practices gathered under its rubric This volume offers a new approach to theorising interdisciplinarity

showing how the boundaries between the social and natural sciences are being reconfigured It examines the current preoccupation with interdisciplinarity notably the ascendance of a particular discourse in which it is associated with a transformation in the relations between science technology and society Contributors address attempts to promote collaboration between on the one hand the natural sciences and engineering and on the other the social sciences arts and humanities From ethnography in the IT industry to science and technology studies environmental science to medical humanities cybernetics to art science the collection interrogates how interdisciplinarity has come to be seen as a solution not only to enhancing relations between science and society but the pursuit of accountability and the need to foster innovation Interdisciplinarity is essential reading for scholars students and policy makers across the social sciences arts and humanities including anthropology geography sociology science and technology studies and cultural studies as well as all those engaged in interdisciplinary research It will have particular relevance for those concerned with the knowledge economy science policy environmental politics applied anthropology ELSI research medical humanities and art science

Qualitative Health Research Janice M Morse, 2016-06-03 The leading figure in qualitative health research QHR Janice M Morse asserts that QHR is its own separate discipline distinct from both traditional health research and other kinds of qualitative research and examines the implications of this position for theory research and practice She contends that the health care environments transform many of the traditional norms of qualitative research and shape a new and different kind of research tradition Similarly the humanizing ethos of qualitative health research has much to teach traditional researchers and practitioners in health disciplines She explores how the discipline of QHR can play out in practice both in the clinic and in the classroom in North America and around the world A challenging thought provoking call to rethink how to conduct qualitative research in health settings

Strategies of Qualitative Inquiry Norman K. Denzin, Yvonna S. Lincoln, 2012-10-24 *Strategies of Qualitative Inquiry* Fourth Edition is Volume II of the three volume paperback versions of *The SAGE Handbook of Qualitative Research* Fourth Edition This portion of the handbook consists of the topics addressed in Part III *Strategies of Inquiry* *Strategies of Qualitative Inquiry* Fourth Edition isolates the major strategies historically the research methods that researchers can use in conducting concrete qualitative studies The question of methods begins with questions of design and the matters of money and funding These questions always begin with the researcher who moves from a research question to a paradigm or perspective and then to the empirical world The history and uses of these strategies are explored extensively in this volume The chapters move from forms and problems with mixed methods inquiry to case study performance and narrative ethnography to constructionist analytics to grounded theory strategies testimonies participatory action research and clinical research
