Nation Building Beyond Afghanistan And Iraq Forum On Constructive Capitalism:

Nation-Building Francis Fukuyama, 2006-02-15 Bestselling author Francis Fukuyama brings together esteemed academics political analysts and practitioners to reflect on the U S experience with nation building from its historical underpinnings to its modern day consequences The United States has sought on repeated occasions to reconstruct states damaged by conflict from Reconstruction in the South after the Civil War to Japan and Germany after World War II to the ongoing rebuilding of Iraq Despite this rich experience there has been remarkably little systematic effort to learn lessons on how outside powers can assist in the building of strong and self sufficient states in post conflict situations The contributors dissect mistakes false starts and lessons learned from the cases of Afghanistan and Iraq within the broader context of reconstruction efforts in other parts of the world including Latin America Japan and the Balkans Examining the contrasting models in Afghanistan and Iraq they highlight the Coalition Provisional Authority in Iraq as a cautionary example of inadequate planning The need for post conflict reconstruction will not cease with the end of the Afghanistan and Iraq missions This timely volume offers the critical reflection and evaluation necessary to avoid repeating costly mistakes in the future Contributors Larry Diamond Hoover Institution and Stanford University James Dobbins RAND David Ekbladh American University Mich le A Flournoy Center for Strategic and International Studies Francis Fukuyama Paul H Nitze School of Advanced International Studies Johns Hopkins University Larry P Goodson U S Army War College Johanna Mendelson Forman UN Foundation Minxin Pei Samia Amin and Seth Garz Carnegie Endowment for International Peace S Frederick Starr Central Asia Caucasus Institute at Johns Hopkins School of Advanced International Studies F X Sutton Ford Foundation Emeritus Marvin G Weinbaum University of Illinois at Urbana Champaign

Nation-Building Francis Fukuyama, 2006 Publisher Description *Nation-Building and Stability Operations* Cynthia A. Watson, 2007-12-30 Addressing the range of nation building experiences and concerns in the United States and its allies Watson opens with a discussion of Somalia Haiti and Southeastern European experiences during the 1990s She then shifts to a discussion of the more recent lessons from Iraq and Afghanistan since the beginning of the Global War on Terrorism An examination of the growing emphasis within the U S government focused on the education officers at the flag rank in combined joint and multinational aspects of military activities that form the basis of nation building underscores the pace of changes taking place today As nation building and stability operations have expanded so too should the discussion of such activities With increasing pressure on the United States to engage in actions abroad in the long War on Terrorism a greater understanding among the American public of what is involved in this area is absolutely crucial The U S has been involved in numerous nation building activities Watson breaks down the operational and doctrinal shifts that have occurred in military and political circles during the last twenty years in this introductory overview of the topic She supplements her narrative with brief biographical essays focused on individuals such as Marine General Ret and U S commander in Somalia 1992 1994 Anthony

Zinni and others who influenced the course of nation building and stabilization processes now in place Their impact is underscored in the documents Watson includes which are taken from various studies laws and debates on the subject at hand making this a useful work for both students and specialists

The Great American Mission David Ekbladh, 2011-08-28 The Great American Mission traces how America's global modernization efforts during the twentieth century were a means to remake the world in its own image David Ekbladh shows that the emerging concept of modernization combined existing development ideas from the Depression He describes how ambitious New Deal programs like the Tennessee Valley Authority became symbols of American liberalism's ability to marshal the social sciences state planning civil society and technology to produce extensive social and economic change For proponents it became a valuable weapon to check the influence of menacing ideologies such as Fascism and Communism Modernization took on profound geopolitical importance as the United States grappled with these threats After World War II modernization remained a means to contain the growing influence of the Soviet Union Ekbladh demonstrates how U.S. led nation building efforts in global hot spots enlisting an array of nongovernmental groups and international organizations were a basic part of American strategy in the Cold War However a close connection to the Vietnam War and the upheavals of the 1960s would discredit modernization The end of the Cold War further obscured modernization's mission but many of its assumptions regained prominence after September 11 as the United States moved to contain new threats Using new sources and perspectives The Great American Mission offers new and challenging interpretations of America's ideological motivations and humanitarian responsibilities abroad
