**Finding Her in History** Rosemary Papa,2017-06-16 This monograph was cultivated from the AERA SIG Women in Education 2016 address and delivers a brief review of his story in terms of the lack of her story being included through three parallel lines 1 historical documents on formation of the family and work in and outside the home from the Paleolithic era 2 the development of traditional religions and the subjugation of women beginning with the conniving seductress Eve and 3 the discussion of major wars and the nation state policies produced throughout history with impacts on girls and women as well the precarious health of the planet This brief review of his story reveals the continued exclusion of her story with the example of Willystine Goodsell a historian ironically erased from history in education The premise that subjugation of women and children as lesser than males has been supported both in the name of protecting them and in shaming them The combined ubiquitous effects of disequilibrium created by mankind in wars religions education social capital economics and politics have ensured his story is the one recorded This monograph suggests a more balanced approach to the written her his story requires inclusion of all the population and the secular educating of especially girls and women

Constructing Ecoterrorism John Sorenson,2016-07-01T00:00:00Z Animal rights is an important social justice movement and the animal rights movement presents ethical and political challenges to deeply rooted structures of violence and exploitation challenging ideologies of capitalism and speciesism Corporate interests that form the animal industrial complex understand the animal rights movement as a threat to their profits and have mobilized to undermine it Informed by both critical animal studies and critical terrorism studies John Sorenson analyzes ecoterrorism as a social construction He examines how corporations that profit from animal exploitation fund and produce propaganda to portray the compassionate goals and nonviolent practices of animal activists as outlandish anti human campaigns that operate by violent means not only to destroy Western civilization but also to create actual genocide The idea of concern for others is itself a dangerous one and capitalism works by keeping people focused on individual interests and discouraging compassion and commitment to others Driven by powerful and wealthy industries founded upon the exploitation of nonhuman animals and the extraction of natural resources the discourse of ecoterrorism is a useful mechanism to repress criticism of the institutionalized violence and cruelty of these industries as well as their destructive impact on the environment their major contribution to global warming and ecological disaster and their negative impacts on human health Further by deliberately constructing an image of activists as dangerous and violent terrorists these corporations and their representatives in government have created a widespread climate of fear that is very
