National Procedural Autonomy Revisited Administrative:

Cases, Materials and Text on Judicial Review of Administrative Action Chris Backes, Mariolina Eliantonio, 2019-08-08 This casebook studies the law governing judicial review of administrative action. It examines the foundations and the organisation of judicial review, the types of administrative action and corresponding kinds of review and access to court. Significant attention is also devoted to the conduct of the court proceedings, the grounds for review and the standard of review and the remedies available in judicial review cases. The relevant rules and case law of Germany, England and Wales, France and the Netherlands are analysed and compared. The similarities and differences between the legal systems are highlighted. The impact of the jurisprudence of the European Court of Human Rights is considered as well as the influence of EU legislative initiatives and the case law of the Court of Justice of the European Union in the legal systems examined. Furthermore, the system of judicial review of administrative action before the European courts is studied and compared to that of the national legal systems. During the last decade, the growing influence of EU law on national procedural law has been increasingly recognised. However, the way in which national systems of judicial review address the requirements imposed by EU law differs substantially. The casebook compares the primary sources: legislation, case law, etc. of the legal systems covered and explores their differences and similarities. This examination reveals to what extent a *ius commune* of judicial review of administrative action is developing.

National Procedural Autonomy Revisited Franziska Grashof, 2016 National Procedural Autonomy Revisited reconsiders one of the leading principles of European administrative law: the principle of national procedural autonomy. The book shows that due to different national administrative litigation rules, common European rules are enforced in a fragmented manner. This is illustrated with the example of the judicial enforcement of Directive 2011/92/EU on environmental impact assessment for projects in the legal systems of Germany, England and the Netherlands. Under the same rule of EU law, litigants are treated procedurally unequal. As well, there are different enforcement chances and judges come to different conclusions not because of diverging interpretations of the law but because of different administrative litigation rules. Subsequently, the book discusses whether it is necessary, desirable and possible to develop common rules of administrative litigation in environmental matters in the EU. It is argued that by means of the instruments which are available in the EU – specifically legislation, jurisprudence and comparative scholarship – a more precise common standard for administrative litigation in environmental matters should be created so that the principle is *ubi ius europaeum ibi remedium europaeum*. Good Administration and the Council of Europe Ulrich Stelkens, Agnė Andrijauskaitė, 2020-09-11 Good Administration and the Council of Europe Law Principles and Effectiveness examines the existence and effectiveness of written and unwritten standards of good administration developed within the framework of the Council of Europe (CoE) and in the case law of the European Court of Human Rights. These standards, called pan-European general principles of good

administration cover the entire range of general organizational procedural and substantive legal institutions meant to ensure a democratically legitimized open and transparent administration respecting the rule of law They are about the limiting function of administrative law its function to protect individuals from arbitrary power to legitimize administrative action and to combat corruption This book analyses the sources and functions of the pan European general principles of good administration and seeks to uncover how deeply they are rooted in the domestic legal systems of the CoE Member States It comprises 28 country reports dedicated to an in depth exploration of the impact of these standards on the national legal systems of the Member States written by respective experts on these systems It argues that the pan European general principles of good administration lead to a certain harmonization of the legal orders of the Member States with regard to the limiting function of administrative law despite the many fundamental differences between their administrative and legal systems It comes to the further conclusion that the pan European general principles of good administration can be considered as a concretization of the founding values of the CoE and describes the administrative law obligations a Member State entered into when joining the CoE

Standing to Enforce European Union Law before National Courts Hilde K Ellingsen, 2021-03-25 Access to court has long been recognised as an essential element of a Union based on the rule of law This book asks how can Member States ensure that their rules on standing guarantee that right The book answers this question by analysing the requirements of EU law from two angles first the effective protection of Union rights second the effectiveness of Union law per se With detailed case law examination the book formulates an autonomous Union law doctrine of standing based on the principle of effective judicial protection It then goes further setting out an effectiveness test of Member States enforcement mechanisms to ensure that EU law is rendered operative in practice This is a rigorous study on a question of immense importance

The Effectiveness of the Köbler Liability in National Courts Zsófia Varga, 2020-10-15

Over the last 15 years Köbler liability has resulted in the allocation of damages on only five occasions Why is that And what are the practical implications of the Köbler judgment in the Member States This book offers a unique analysis of the principle not from the usual EU focused point of view but from the view of the practical Member State and thus follows the track set by earlier books in the EU Law in the Member States series It thoroughly examines the national jurisprudential and legislative acceptance of the state liability principle and explores the existence of alternative remedies available in the Member States in case of such breaches The conclusions based on a systematic assessment of 300 national judgments from the 28 Member States lead to a reconsideration of the role of the Köbler doctrine in the system of judicial remedies against violation of EU law by national supreme courts After the pronouncement of the ECJ judgment in Köbler legal scholars and practitioners have forecast the eradication of the principle of res judicata and the endangering of judicial independence The judgment caused a lot of ink to flow according to the ECJ's records at least 100 studies are directly

devoted to the analysis of this decision This book is however the first to offer a comprehensive analysis on the genuine life of the Kbler liability in the Member States **National Remedies Before the Court of Justice** Michael Dougan,2004-12-21 The Court of Justice has delivered an extensive body of caselaw concerning the obligation of domestic courts to provide effective judicial protection to claimants relying upon Community law rights including such landmark judgments as Factortame and Francovich This book offers a critical analysis of the Court s fast changing approach to national procedural autonomy and explores the difficult conceptual framework underpinning the caselaw The author demonstrates how Community intervention in the domestic systems of judicial protection cannot remain unaffected by wider debates about the evolving European integration project in particular the tension between uniformity and differentiation as competing values influencing the exercise of Community regulatory competence Because of its emphasis on an ideal of uniformity which has become increasingly untenable within the contemporary Community legal order much of the existing academic discourse about national remedies and procedural rules now seems ripe for reconsideration It is argued that the Court s jurisprudence on the decentralised enforcement of Treaty norms needs to be interpreted afresh having regard to the recent growth of regulatory differentiation within the Community system National Remedies Before the Court of Justice provides a challenging account of this crucial field of EU legal studies It includes detailed discussion of issues such as Member State liability in damages Community control over national limitation periods and the principles governing state aid and competition law enforcement This book is of value to academics and practitioners alike **The Enforcement of EU Law and Values** András Jakab,Dimitry Kochenov,2017-04-07 It is clear that the current crisis of the EU is not confined to the Eurozone and the EMU evidenced in its inability to ensure the compliance of Member States to follow the principles and values underlying the integration project in Europe including the protection of democracy the Rule of Law and human rights This defiance has affected the Union profoundly and in a multi faceted assessment of this phenomenon The Enforcement of EU Law and Values Ensuring Member States Compliance dissects the essence of this crisis examining its history and offering coping methods for the years to come Defiance is not a new concept and this volume explores the richness of EU level and national level examples of historical defiance the French Empty Chair policy the Luxembourg compromise and the FP crisis in Austria and draws on the experience of the US legal system and that of the integration projects on other continents Building on this legal political context the book focuses on the assessment of the adequacy of the enforcement mechanisms whilst learning from EU integration history Structured in four parts the volume studies 1 theoretical issues on defiance in the context of multi layered legal orders 2 EU mechanisms of acquiescence and values enforcement 3 comparative perspective on law enforcement in multi layered legal systems and 4 case studies of defiance in the EU Convergence and Divergence in European Public Law Paul Beaumont,Carole Lyons,Neil Walker,2002-06-07 This book grew out of a symposium held in the University of Aberdeen in May 2000 It examines the extent to which the European Union has brought about and should bring about

Sovereign Choices and Sovereign Constraints Gus Van Harten, 2013-10-03 Investment arbitrators rely on sovereignty for their legal status just as investor state disputes usually stem from disagreements about the role of the state in society As a result investment arbitration is a vehicle for the exercise of sovereign authority and a site for contesting sovereign choices This book investigates and evaluates the decision making record and policy trajectory of international investment arbitration from theoretical doctrinal and empirical perspectives It analyses the extent to which the system used to resolve disputes impacts on the role of government affecting diverse constituencies as opposed to limiting itself to case specific disputes between a single business enterprise and state entity The book provides a comprehensive review of known awards in order to determine the types of government measures that have triggered disputes It investigates how investment arbitrators have exercised their authority in recent case law It provides a review of the approaches adopted in the reasoning of investment treaty tribunals on questions of judicial deference and

respect for sovereign decision makers In doing so it determines whether investment tribunals have taken a predominantly assertive approach to investor protection without regard to their relative lack of accountability capacity or proximity in some cases This approach does not sit comfortably with the relative restraint seen by domestic and international courts in similar contexts The book argues that the unique characteristics of investment treaty arbitration make the experience of domestic judicial review more pertinent to international investment arbitration than to any other contexts for international adjudication However it argues that mediating devices in some form should be incorporated into the process in order to solve the tension between the extensive scope and potency of international investment arbitration as an important site of global governance and the challenges of the review function in reviewing decisions which have strong claims to having comprehensive regulatory expertise inclusive decision making electoral or other public accountability or greater proximity to the underlying facts and context Online Appendices
