Critical Issues for the Development of Sustainable E-health Solutions Nilmini Wickramasinghe, Rajeev Bali, Reima Suomi, Stefan Kirn, 2011-11-23 Pervasive healthcare is an emerging research discipline focusing on the development and application of pervasive and ubiquitous computing technology for healthcare and wellness Pervasive healthcare seeks to respond to a variety of pressures on healthcare systems including the increased incidence of life style related and chronic diseases emerging consumerism in healthcare need for empowering patients and relatives for self care and management of their health and need to provide seamless access for healthcare services independent of time and place Pervasive healthcare may be defined from two perspectives First it is the development and application of pervasive computing or ubiquitous computing ambient intelligence technologies for healthcare health and wellness management Second it seeks to make healthcare available to anyone anytime and anywhere by removing locational time and other restraints while increasing both the coverage and quality of healthcare This book proposes to define the emerging area of pervasive health and introduce key management principles most especially knowledge management its tools techniques and technologies In addition the book takes a socio technical patient centric approach which serves to emphasize the importance of a key triumvirate in healthcare management namely the focus on people process and technology Last but not least the book discusses in detail a specific example of pervasive health namely the potential use of a wireless technology solution in the monitoring of diabetic patients

Future Visions on Biomedicine and Bioinformatics 2 Lodewijk Bos, Denis Carroll, Luis Kun, Andrew Marsh, Laura M. Roa, 2011-07-11 Swamy Laxminarayan was an outstanding researcher active in many diverse fields of science and technology. He was one of the most prominent biomedical scientists and his ideas influenced the Biomedical Technology substantially. This book tries to provide an overview on the multiple achievements of Swamy Laxminarayan. It presents a collection of his most outstanding publications and an overview on his outstanding life. This Volume is the second part of the *liber amicorum* in Memory of Swamy Laxminarayan.

Rare Diseases in the Age of Health 2.0 Rajeev K. Bali, Lodewijk Bos, Michael Christopher Gibbons, Simon Ibell, 2013-10-21 This text focuses on various factors associated with orphan diseases and the influence and role of health information technologies. Orphan diseases have not been adopted by the pharmaceutical industry because they provide little financial incentive to treat or prevent it. It is estimated that 6 000 7 000 orphan diseases exist today as medical knowledge continues to expand; this number is likely to become much greater. The book highlights the opportunities and challenges in this increasingly important area. The book explores new avenues which are opened by information technologies and Health 2.0 and highlights also economic opportunities of orphan disease medicine. The editors of this new book have international experience and competencies in the key areas of patient empowerment, healthcare and clinical knowledge management, healthcare inequalities and disparities, rare diseases and patient advocacy.

Current Principles and Practices of Telemedicine and E-health Rifat Latifi, 2008 This book represents the most current development on the expanding and changing field of telemedicine and e health, especially in the developing countries. Many things have changed since the publication of the first book in 2004, *Establishing Telemedicine in Developing Countries: From Inception to Implementation*. Telemedicine has become more popular and still continues to grow. While there are many good books and materials on telemedicine, this publication can be seen as the work of reference for all of those who want to practice telemedicine and e health, particularly in developing countries. This publication deals with ways to establish telemedicine and e health system not only in the developing countries but also in the developed world. Hopefully, this book will be a guide that reflects the status of telemedicine at the given time. It is dedicated to all future generations of telemedicine and e health students which include healthcare practitioners, administrators, policy makers, technical professionals and others.

Challenges for Assistive Technology Gorka Eizmendi, José Miguel Azkoitia, Ger M. Craddock, 2007 In the 21st century, Assistive Technology (AT) should be defined as a scientific and technologic approach to the development of products and services oriented to support the elderly and people with disabilities in their daily activities, maximizing their personal autonomy, independence, health and quality of life.

Medicine Meets Virtual Reality 16 Randy S. Haluck, Helene M. Hoffman, Greg T. Mogel, Roger Phillips, Richard A. Robb, Kirby G. Vosburgh, 2008-01-15 We humans are tribal, grouping ourselves by a multitude of criteria: physical, intellectual, political, emotional, etc. The Internet and its auxiliary technologies have enabled a novel dimension in tribal behavior during our recent past. This growing connectivity begs the

question will individuals and their communities come together to solve some very urgent global problems At MMVR we explore ways to harness information technology to solve healthcare problems and in the industrialized nations we are making progress In the developing world however things are more challenging Massive urban poverty fuels violence and misery Will global networking bring a convergence of individual and tribal problem solving Recently a barrel shaped water carrier that rolls along the ground was presented improving daily life for many people Also the One Laptop per Child project is a good example of how the industrialized nations can help the developing countries They produce durable and simple laptops which are inexpensive to produce At MMVR we focus on cutting edge medical technology which is generally pretty expensive While the benefits of innovation trickle downward from the privileged few to the broader masses we should expand this trickle into a flood Can breakthrough applications in stimulation visualization robotics and informatics engender tools as ingeniously as the water carrier or laptop With some extra creativity we can design better healthcare for the developing world too

The Conservative Scoliosis Treatment Society on Scoliosis Orthopaedic and Rehabilitation Treatment, 2008 This is the first of a series of Instructional Course Lectures ICL books of the International Society On Scoliosis Orthopaedic and Rehabilitation Treatment SOSORT In the contents of this book the reader can find the SOSORT statutes and become familiar with the aims of the creation of this society This will hopefully be the initiation of a series of books on conservative scoliosis treatment and a valuable library for SOSORT The philosophy of the commencement of such ICL book series is the achievement of an ultimate aim the improvement of early detection and non operative treatment of the patient care pathway for scoliosis For this endeavor a number of eminent clinicians and scientists around the world who are devoted and high quality students of scoliosis are involved with and contributing to their fabulous work There is no doubt that this book is not able to cover every aspect of the issue However the future volumes of this series of books will continuously complete the latest relevant knowledge In this volume there are chapters reporting on various aspects of the current state of the following topics IS aetiology recent trends on scoliosis research genetics prevention school screening various methods of physiotherapy various types of braces the inclusion criteria for conservative treatment together with the SOSORT guidelines for conservative treatment clinical evaluation and classification study of the surface after brace application and outcomes for each brace

Medicine Meets Engineering Joachim Hammer, Michael Nerlich, Sebastian Dendorfer, 2008 Biomedical Engineering is defined as the science that integrates medical and engineering sciences to improve diagnosis and treatment of patients Only by this integration progress can be achieved Both medical and engineering sciences comprise a huge diversity in topics so it is imaginable that Biomedical Engineering combining these two science areas is even more huge Thanks to this megadisciplinary approach many breakthroughs can be achieved More and more research groups realize this and start new research projects which results in a rapid increase in knowledge in Biomedical Engineering This will only benefit the main goal of Biomedical Engineering improving diagnosis and treatment of patients when it is spread and applied The 2nd

Regensburg Applied Biomechanics conference is special in that it realized both the distribution of new knowledge and the essential integration of medical and engineering specialists The conference dealt with the latest results in applied biomechanics ranging from fundamental bone strength properties via bone remodeling phenomena to new implants that replace lost human functions Also new research areas like robot surgery and tissue engineering were discussed **EHealth**

Bernd Blobel, Peter Pharow, Michael Nerlich, 2008 Current demographic economic and social conditions which developed countries are faced with require a paradigm change for delivering high quality and efficient health services In that context healthcare systems have to turn from organization centered to process oriented and finally towards individualized patient care also called personal care based on ehealth platform services Interoperability requirements for ubiquitous personalized health services reach beyond current concepts of health information integration among professional stakeholders and related Electronic Patient Records Future personal health platforms particularly have to maintain semantic interoperability among systems using different modalities and technologies different knowledge representation and domain experts languages as well as different coding schemes and terminologies to include home care as well as personal and mobile systems This development is not restricted to regions or countries but appears globally requiring a comprehensive international collaboration This publication within the series Studies in Health Technology and Informatics presents papers from leading international experts representing all domains involved in ehealth [Future Visions on Biomedicine and Bioinformatics 1](#)

Lodewijk Bos, Denis Carroll, Luis Kun, Andrew Marsh, Laura M. Roa, 2011-07-09 Swamy Laxminarayan was an outstanding researcher active in many diverse fields of science and technology This liber amicorum in memory of Swamy Laxminarayan collects Medical and Biological Engineering and Informatics contributions to the Safety and Security of Individuals and Society The authors are renowned scientists and the aim of their writing is to recall the enormous personal and scientific achievement of Swamy Laxminarayan *Comorbidity in Rheumatic Diseases* Yasser El Miedany, 2017-08-24 This book explores comorbidity in patients with rheumatic diseases and details both care and treatment options in standard clinical practice Patients with rheumatic diseases are clinically complex and the interplay of their disease activity with associated conditions may lead to increased morbidity and mortality Recently there have been major advances in the management of rheumatic diseases however without addressing the potential comorbid conditions including cardiovascular disease pulmonary disease and depression outcomes remain poor With its 19 chapters covering the management of major rheumatic diseases e g rheumatoid arthritis systemic lupus erythematosus and osteoarthritis potential comorbidities and treatment recommendations as well as possible interactions between conditions this book addresses the gap between textbook medicine and day to day patients care Authors also discuss the new hot issue of the comorbidity index comparing the standard tools to the recently developed indices and how they can assist the rheumatologists in determining disease burden prognosis and comorbidity probability This book is an ideal clinical guide and reference that enables rheumatologists internal

medicine physicians and residents to address the full clinical expression of these rheumatic diseases with views towards prevention or early management of comorbid conditions

Collaborative Patient Centred EHealth E. De Clercq, G.J.E. De Moor, J. Bellon, 2008-10-03 In Medical Informatics three types of processes play a central role organizational patient related and decision making related processes The first type deals with settings such as a hospital care setting or a primary care setting the second is related to health and disease i.e. to patients the third type of process aims at assisting in decision making and therapy and evolves in the brains of healthcare professionals Hence in all domains data information and knowledge play a key role As these three processes evolve dealing with individuals patients doctors and nurses because of that human factor there are obviously limitations imposed by formalization and standardization In the past there have been some unrealistic expectations regarding the possible contributions of medical informatics to healthcare However such contributions appeared to be very modest to say the least The same applies to the overly optimistic expectations regarding the introduction of electronic health records Although the technology is widely available all these developments appear to be far more complex than expected The need for an improved understanding of the nature of medical knowledge to better serve health remains to be emphasized

2d fdtd with matlab empossible - Mar 31 2022

web building on the prerequisite course on 1d fdtd this course will introduce you to 2d simulations and cover everything from deriving all of the equations to writing the programs in matlab the course uses stunning visuals and animations to teach the concepts

interactive simulation toolbox for optics file exchange matlab - Aug 04 2022

web may 13 2013 the interactive fdtd toolbox for matlab is a simulation software to model and simulate two dimensional optical systems in te polarization it was designed for educational purposes no further knowledge of matlab

pplication of gpu accelerated fdtd method to - Jun 02 2022

web nov 11 2022 in this paper sometechniques in using matlab parallel computing toolbox are studied to improve the performance of solving complex electromagnetic problems by the finite difference time domain fdtd method implementing these techniques allows the gpu accelerated parallel fdtd code to execute 20xfaster than basic serial fdtd code

2 d acoustic fdtd simulation demo for matlab github - Oct 06 2022

web 2 d acoustic fdtd simulation demo for matlab outline this is a truly physical simulation program of the sound wave propagation in a two dimensional field filled with fluid media surrounded by total reflecting walls this program solves the equations of the 2d acoustic fdtd finite difference time domain method

fdtd github topics github - Jan 09 2023

accelerating the fdtd algorithm on cpus with matlab s - Nov 07 2022

web abstract investigating the improvement of matlab based finite difference time domain fdtd simulations using central processing units cpus is the goal of this paper the matlab parallel toolbox along with modern multi core cpus are used with no external dependencies or libraries and no expensive or complicated hardware acceleration units

2211 05647 application of gpu accelerated fdtd method to - Dec 08 2022

web nov 10 2022 in this paper some techniques in using matlab parallel computing toolbox are studied to improve the performance of solving complex electromagnetic problems by the finite difference time domain fdtd method implementing these techniques allows the gpu accelerated parallel fdtd code to execute 20x faster than basic serial fdtd code

1d finite difference time domain using matlab empossible - Jan 29 2022

web this course is meant for the complete beginner create and implement your own finite difference time domain fdtd code to simulate and design your own electromagnetic and photonic devices course includes clear lectures stunning graphics and animations and even matlab coding sessions
