**Managing Care in Context** Jeanette Henderson, Dorothy Atkinson, 2003. Managing Care in Context looks at the different contexts in which care takes place considering the impact of policy, practice, and organizational contexts on managers.

**Quality Assurance and Accreditation in Distance Education and e-Learning** Insung Jung, Colin Latchem, 2012-04-05. Quality assurance (QA) in open and distance learning (ODL) can be a contentious issue. Some argue that it should be judged by the same criteria and methods as face-to-face education, while others claim that it is so different in its organization, enrolments, and operations that conventional QA mechanisms cannot apply. Some advocate the use of specific guidelines and standards for e-learning; others believe that regardless of the technology, the basic principles of quality teaching and learning should apply. Providers who have enjoyed freedom from external scrutiny may resist attempts at external regulation and auditing and look upon QA as yet another imposition of corporatization and bureaucracy on education. Others see it as a means of establishing a culture of quality, self-reflection, and self-improvement. There is little research-based literature to guide policy makers, managers, and practitioners in applying QA in education and training to ensure the right balance is found between accountability and autonomy, as well as assuring quality for the time and costs involved. In this respect, *Quality Assurance and Accreditation in Distance Education and e-Learning* is a book that is long overdue. It explains what is involved in QA and accreditation in education. It describes and analyzes applications of these practices in open distance, dual mode, and conventional universities throughout Europe, North America, Africa, and the Asia Pacific, looking at open schooling, e-learning in conventional schools, non-formal adult and community education, and corporate and small to medium enterprises.

*Quality Assurance and Accreditation in Distance Education and e-Learning* is edited and authored by experts with extensive international experience in ODL, e-learning, and QA who give careful consideration to the possibilities and challenges involved. The book will be an invaluable guide for all policy makers, managers, practitioners, and researchers in the field.

,1998 Changing Times In Teacher Education Marvin F. Wideen,Peter P. Grimmer,2013-05-13 Pressures for reform in teacher education have begun to take on the same sense of urgency as school reform Those faculties of education who have been strong advocates for change in the schools now find themselves the subject of similar pressures from governmental policy makers Attempts at change have taken place in many different countries and jurisdictions around the world This book details through a series of international vignettes how teachers are responding to the changing times and social contexts in which they do their work The authors hold the view that changes are inevitable in teacher education but what is not clear is who will control the changes and whether the end result will actually improve the preparation of teachers The theme of the book is that the reform of teacher education should be informed by intelligent debate and that any attempt to restructure teacher preparation should result from a careful reconceptualisation of its purposes and processes **The British National**
