Grant

Hague,2016-01-07 A Word to Parents Within recent times the subject of sex hygiene has been freely discussed by members of the medical profession and through them the general public has been made more or less acquainted with the problem It has therefore acquired a degree of genuine interest which speaks well for the future of the eugenic ideal Eugenics is based to a very large extent upon the principles underlying sex hygiene As a result of this widespread interest and investigation we have discovered that the only method that promises actual progress is to talk plainly and to tell the actual truth The day of the prude has passed To attempt to achieve results in the education of youth in sex problems without giving facts is wasted effort To give facts we must explain each problem so that its principles may be clearly understood and its meaning grasped To point out the duty of youth is not sufficient They must be shown why it is to their best interest to live the clean life In every department of education we are beginning to appreciate that to achieve results it must be based upon the individual equation This is why we have found it necessary to assert that it is the duty of parents to make sex hygiene a personal matter and to acquaint their children with the facts relating to this problem It has been discovered however that a very large percentage of parents are inadequately informed on these subjects in fact they know practically nothing about the actual facts which they are supposed to teach I shall try to tell the story in a way which every parent will understand When a boy reaches the age of puberty he is susceptible to sexual desire If he has not been told the story of his growth from boyhood to man s estate he will either begin to abuse himself or he will be later enticed to commit himself to intercourse with some unclean female and he will acquire a disease as a result Inasmuch as it has been asserted that practically every boy has been addicted to self abuse at some time and that eighty per cent of all males between the ages of sixteen and thirty years are victims of venereal disease it would seem justifiable to assume that the boys who are informed of the facts in time are the boys who constitute the percentage who escape This of course may not be literally true but it is a reasonable assumption Milks Mean More: The Role of Milk in Nutrition, Digestion and Metabolism Across the Lifespan Nicole Clemence Roy,David A. **Mothers, Midwives, and Reproductive Labor in Interwar and Wartime Britain ,** Sandra Trudgen Dawson,2024-01-26 Mothers Midwives and Reproductive Labor in Interwar and Wartime Britain is about the experiences of mothers and midwives as they navigated the changing political and social issues surrounding childbirth and motherhood during interwar and wartime Britain The needs and agency of women as mothers and midwives often conflicted with the ideals of the state While government officials understood the importance of safe childbirth to the nation they also chose to allow economic crises and war preparation to take precedence The interwar plans for a national maternal healthcare system met financial constraints and a lack of political will As the outbreak of the Second World War appeared imminent politicians planned for pregnant women and those with small children to evacuate from cities The reception areas were less well planned and pregnant women returned to their homes rather than deliver among strangers Wartime maternity provision didn t take into account the needs and desires of mothers and midwives Reproductive laborers mothers and midwives demonstrated agency throughout the period Pregnant women chose to deliver at home with untrained or trained birth attendants midwives entered and left the profession on their own terms offering or withholding their skills when it suited individual need rather than at the behest of government
