Rethinking Positive Thinking Gabriele Oettingen, 2014-10-16 The solution isn't to do away with dreaming and positive thinking Rather it's making the most of our fantasies by brushing them up against the very thing most of us are taught to ignore or diminish the obstacles that stand in our way So often in our day to day lives we're inundated with advice to think positively From pop music to political speeches to commercials the general message is the same look on the bright side be optimistic in the face of adversity and focus on

your dreams And whether we re trying to motivate ourselves to lose weight snag a promotion at work or run a marathon we re told time and time again that focusing on fulfilling our wishes will make them come true Gabriele Oettingen draws on more than twenty years of research in the science of human motivation to reveal why the conventional wisdom falls short The obstacles that we think prevent us from realizing our deepest wishes can actually lead to their fulfillment Starry eyed dreaming isn t all it s cracked up to be and as it turns out dreamers are not often doers While optimism can help us alleviate immediate suffering and persevere in challenging times merely dreaming about the future actually makes people more frustrated and unhappy over the long term and less likely to achieve their goals In fact the pleasure we gain from positive fantasies allows us to fulfill our wishes virtually sapping our energy to perform the hard work of meeting challenges and achieving goals in real life Based on her groundbreaking research and large scale scientific studies Oettingen introduces a new way to visualize the future called mental contrasting It combines focusing on our dreams with visualizing the obstacles that stand in our way By experiencing our dreams in our minds and facing reality we can address our fears make concrete plans and gain energy to take action In Rethinking Positive Thinking Oettingen applies mental contrasting to three key areas of personal change becoming healthier nurturing personal and professional relationships and performing better at work She introduces readers to the key phases of mental contrasting using a proven four step process called WOOP Wish Outcome Obstacle Plan and offers advice and exercises on how to best apply this method to daily life Through mental contrasting people in Oettingen s studies have become significantly more motivated to quit smoking lose weight get better grades sustain fulfilling relationships and negotiate more effectively in business situations Whether you are unhappy and struggling with serious problems or you just want to improve discover and explore new opportunities this book will deepen your ideas about human motivation and help you boldly chart a new path ahead
