

GUIDE TO ESTIMATING

ESTIMATED WORK TIMES

All operation times are listed in hours and tenths of an hour. A time listed as 3.5 indicates three and one half hours.

ESTIMATED WORK TIME PREMISE

The estimated work times reported in this publication are to be used as a **GUIDE ONLY**. MOTOR recommends a review of the OE service information at the time of estimate preparation to confirm the OE manufacturer repair procedure(s). MOTOR assumes the repair facility is equipped with the necessary tools, equipment, and training to complete any given repair following published vehicle manufacturer repair procedures. Reported times include normal adjustment procedures within the range of motion permitted by the fastener(s) or component, to ensure proper fit of the individual new part being replaced. Reported times include tube/padded OEM caulking and seam sealer removal/application on bonded, riveted, and welded replacement panels. Sprayable seam sealer equipment requires preparation and adjustment before application and is **NOT INCLUDED** in ESTIMATED WORK TIME.

Estimated work times do not apply to vehicles with equipment other than that supplied by the vehicle manufacturer as standard or regular production options. If other equipment is used, the time may be adjusted to compensate for the variables. Removal and replacement of exchanged or used parts is not considered. If additional aligning or repair must be made, such factors should be considered when developing the estimate. Items not listed under the **INCLUDED/DOES NOT INCLUDE** heading for any given procedure have not been considered in the estimated work time development for that procedure, unless specified by a footnote. All included/not included items for labor procedures listed between pages G10 and G33 are for component R&R and R&I procedures unless otherwise indicated in operation heading.

Many OEMs recommend a pre-and post-repair diagnostic scan on all vehicles involved in a collision that could reveal pre-accident or accident-related damage. Due to the variety of vehicle manufacturer-approved scan tools, both OEM and aftermarket, as well as the variation from vehicle to vehicle and repair to repair, MOTOR is unable to develop a time that accounts for these different scenarios. Therefore, MOTOR recommends an on-the-spot evaluation to determine an appropriate estimated time to perform diagnostic scans for each repair. Please refer to OEM position statements and repair procedures for more information.

OPERATION TIMES LISTED ARE BASED ON NEW UNDAMAGED PARTS INSTALLED ON NEW UNDAMAGED VEHICLES AS INDIVIDUAL OPERATIONS. TIME HAS NOT BEEN CONSIDERED FOR ALIGNMENT PULLS, DAMAGE-RELATED ACCESS TIME, DAMAGED, USED, REMANUFACTURED OR AFTERMARKET PARTS. SOME OPERATION TIMES ARE APPLICABLE AFTER BOLTED, ATTACHED OR RELATED PARTS HAVE BEEN REMOVED. REFER TO SPECIFIC FOOTNOTES ATTACHED TO OPERATION TIME LISTING.
