Strengthening the Human Right to Sanitation as an Instrument for Inclusive Development Pedi

Obani, 2018-05-03 Over a third of the current 7.3 billion people worldwide are burdened with poor sanitation services The resulting social relational and ecological exclusion make the realisation of the human right to sanitation HRS a critical concern development concern However the literature has evolved in a largely compartmentalised manner focusing on the

formal recognition of the HRS in domestic legal systems without sufficiently addressing the drivers of poor sanitation services This research expounds on the impact of the HRS on human wellbeing and the environment within the context of a developing country like Nigeria as a case study The findings show that contrary to the focus in the literature the drivers of poor sanitation services are not confined to legal factors such as the formal recognition of the HRS within domestic legal systems Rather the drivers include social economic and environmental limitations to improved sanitation services Based on the findings the book argues that the focus in the literature on the formal recognition of the HRS in national legal systems is insufficient for tackling the main drivers of poor sanitation services It is therefore necessary to reformulate the HRS discourse using complementary governance instruments that advance social relational and ecological inclusion

Transnational Governance and Constitutionalism Christian Joerges, Inger-Johanne Sand, Gunther Teubner, 2004-06-30 The term transnational governance designates untraditional types of international and regional collaboration among both public and private actors These legally structured or less formal arrangements link economic scientific and technological spheres

with political and legal processes They are challenging the type of governance which constitutional states were supposed to represent and ensure They also provoke old questions Who bears the responsibility for governance without a government Can accountability be ensured The term constitutionalism is still widely identified with statal form of democratic governance The book refers to this term as a yardstick to which then contributors feel committed even where they plead for a reconceptualisation of constitutionalism or a discussion of its functional equivalents Transnational governance is neither public nor private nor purely international supranational nor totally denationalised It is neither arbitrary nor accidental that we present our inquiries into this phenomenon in the series of International Studies on Private Law Theory *Archives and Human Rights* Jens Boel,Perrine Canavaggio,Antonio González Quintana,2021-02-09 Why and how can records serve as evidence of human rights violations in particular crimes against humanity and help the fight against impunity *Archives and Human Rights* shows the close relationship between archives and human rights and discusses the emergence at the international level of the principles of the right to truth justice and reparation Through a historical overview and topical case studies from different regions of the world the book discusses how records can concretely support these principles The current examples also demonstrate how the perception of the role of the archivist has undergone a metamorphosis in recent decades towards the idea that archivists can and must play an active role in defending basic human rights first and foremost by enabling access to documentation on human rights violations Confronting painful memories of the past is a way to make the ghosts disappear and begin building a brighter more serene future The establishment of international justice mechanisms and the creation of truth commissions are important elements of this process The healing begins with the acknowledgment that painful chapters are essential parts of history archives then play a crucial role by providing evidence This book is both a tool and an inspiration to use archives in defence of human rights The Open Access version of this book available at <http://www.taylorfrancis.com/books/e> ISBN has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Pandemics, Public Health, and the Regulation of Borders* Colleen M. Flood,Y.Y. Brandon Chen,Raywat Deonandan,Sam Halabi,Sophie Thériault,2024-02-15 This book examines how the COVID 19 pandemic has engendered a new and challenging environment in which borders drawn around people places and social structures have hardened and new ones have emerged Over the course of the COVID 19 pandemic borders closed or became unwelcoming at the international national sub national and local levels Debate persists as to whether those countries and territories that tightly managed their borders like New Zealand Australia or Hong Kong got it right compared to those that did not Without doubt a majority of those who suffered and died throughout the pandemic have been those from vulnerable populations Yet on the other hand efforts taken to manage the spread of the disease such as through border management have also disproportionately affected those who are most vulnerable How then is the right balance to be struck acknowledging too the economic and other imperatives that may dissuade governments from taking public health steps This book considers how

international organizations countries and institutions within those countries should conceive of and manage borders as the world continues to struggle with COVID 19 and prepares for the next pandemic Engaging a range of international and sub national examples the book thematizes the main issues at stake in the control and management of borders in the interests of public health This book will be of considerable interest to academics in the fields of health law anthropology economics history medicine public health and political science as well as policymakers and public health planners at national and sub national levels
