 Slezak, Thanos Vasilakos, MingChu Li, Kouichi Sakurai, 2009-12-01 As future generation information technology FGIT becomes  
 specialized and fr mented it is easy to lose sight that many topics in FGIT have common threads and because of this advances  
 in one discipline may be transmitted to others Presentation of recent results obtained in different disciplines encourages this  
 interchange for the advancement of FGIT as a whole Of particular interest are hybrid solutions that c bine ideas taken from  
 multiple disciplines in order to achieve something more signi cant than the sum of the individual parts Through such hybrid  
 philosophy a new principle can be discovered which has the propensity to propagate throughout mul faceted disciplines FGIT  
 2009 was the first mega conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple  
 events related to particular disciplines of IT conducted by separate scientific committees but coordinated in order to expose  
 the most important contributions It included the following international conferences Advanced Software Engineering and Its
