Nice Channel Construction Eighteenth Cambridge Histories:

The Cambridge History of the British Empire Eric Anderson Walker, 1963 *the cambridge history of the british empire* Henry Dodwell, 1929 *The Cambridge History of Ireland: Volume 4, 1880 to the Present* Thomas Bartlett, 2018-02-28 This final volume in the Cambridge History of Ireland covers the period from the 1880s to the present. Based on the most recent and innovative scholarship and research, the many contributions from experts in their field offer detailed and fresh perspectives on key areas of Irish social, economic, religious, political, demographic, institutional, and cultural history. By situating the Irish story or stories as for much of these decades, two Irelands are in play in a variety of contexts: Irish and Anglo Irish but also European, Atlantic, and latterly global. The result is an insightful interpretation on the emergence and development of Ireland during these often turbulent decades. Copiously illustrated with special features on images of the Troubles and on Irish art and sculpture in the twentieth century, this volume will undoubtedly be hailed as a landmark publication by the most recent generation of historians of Ireland.

The Cambridge History of Warfare Geoffrey Parker, 2020-06-04 The new edition of *The Cambridge History of Warfare* offers an updated comprehensive account of Western warfare from its origins in classical Greece and Rome through the Middle Ages and the early modern period down to the wars of the twenty-first century in Afghanistan, Iraq, and Syria.

The Cambridge History of the Second World War: Volume 1, Fighting the War John Ferris, Evan Mawdsley, 2017-11-23 The military events of the Second World War have been the subject of historical debate from 1945 to the present. It mattered greatly who won and fighting was the essential determinant of victory or defeat. In Volume 1 of *The Cambridge History of the Second World War*, a team of twenty-five leading historians offer a comprehensive and authoritative new account of the war's military and strategic history. Part I examines the military cultures and strategic objectives of the eight major powers involved. Part II surveys the course of the war in its key theatres across the world and assesses why one side or the other prevailed there. Part III considers in a comparative way key aspects of military activity, including planning, intelligence, and organisation of troops and material, as well as guerrilla fighting and treatment of prisoners of war.

The Cambridge History of Egypt M. W. Daly, Carl F. Petry, 1998-12-10 *The Cambridge History of Egypt* offers the first comprehensive English language treatment of Egyptian history through thirteen centuries, from the Arab conquest to the present day. The two-volume survey considers the political, socio-economic, and cultural history of the world's oldest state, summarizing the debates and providing insight into current controversies. As today's Egypt reclaims a leading role in the Islamic Arab and Afro-Asian worlds, the project stands as testimony to its complex and vibrant past. Volume 2 traces Egypt's modern history from the Ottoman conquest to the end of the twentieth century. A wide range of scholars from the humanities and social sciences have been brought together to explore the history of the period. Their conclusions reflect the work of traditional scholarship and also indicate present trends and future directions in historical writing in Egypt.

Imaginaries of Connectivity Luis Lobo-Guerrero, Suvi Alt, Maarten Meijer, 2019-11-20 This edited collection addresses the problem of how the creation of novel spaces of governance relates to imaginaries of connectivity in time While connectivity seems almost ubiquitous today it has been imagined and practiced in various ways and to varying political effects in different historical and geographical contexts Often the conception of new connectivities also gives birth to new spaces of governance The political denomination of spaces whether maritime continental social or virtual reflects the situatedness of power Yet such crafting of new spaces also expresses particular imaginaries and technologies of connectivity that make governance possible Whereas the study of international relations has traditionally focused on the role of agency and structure in power relations the affects beliefs attitudes and practices that intervene in how groups of people connect in given times have not attracted much scholarly attention Overall the detailed and original case studies examined in the book range from the 16th century to the 19th century to the present and from Spain to the Maritime Alps to Germany to the Mediterranean to China to East Asia The historical and geographical variety of the cases serves to highlight the diversity of the meaning and function of connectivity in the constitution of novel spaces of governance

Entrepôt of Revolutions Manuel Covo, 2022 The Age of Revolutions has been celebrated for the momentous transition from absolute monarchies to representative governments and the creation of nation states in the Atlantic world Much less recognized than the spread of democratic ideals was the period's growing traffic of goods capital and people across imperial borders and reforming states attempts to control this mobility Analyzing the American French and Haitian revolutions in an interconnected narrative Manuel Covo centers imperial trade as a driving force arguing that commercial factors preceded and conditioned political change across the revolutionary Atlantic At the heart of these transformations was the entrepôt the island known as the Pearl of the Caribbean whose economy grew dramatically as a direct consequence of the American Revolution and the French American alliance Saint Domingue was the single most profitable colony in the Americas in the

second half of the eighteenth century with its staggering production of sugar and coffee and the unpaid labor of enslaved people The colony was so focused on its lucrative exports that it needed to import food and timber from North America which generated enormous debate in France about the nature of its sovereignty over Saint Domingue At the same time the newly independent United States had to come to terms with contradictory interests between the imperial ambitions of European powers its connections with the Caribbean and its own domestic debates over the future of slavery This work sheds light on the three way struggle among France the United States and Haiti to assert define and maintain commercial sovereignty Drawing on a wealth of archives in France the United States and the United Kingdom Entrep t of Revolutions offers an innovative perspective on the primacy of economic factors in this era as politicians and theorists planters and merchants ship captains smugglers and the formerly enslaved all attempted to transform capitalism in the Atlantic world

Tracks on the Ocean Sara Caputo,2024-10-22 An engaging look at ocean routes complicated beginnings and elusive impact Sara Caputo s Tracks on the Ocean is a sweeping history of how we have understood routes of travel over the ocean and how we came to represent that movement as a cartographical line Focusing on the representation of sea journeys in the Western world from the early sixteenth century to the present Caputo deftly argues that the depiction of these lines is inextricable from European imperialism the rise of modernity and attempts at mastery over nature Caputo recounts the history of ocean tracks through an array of lively stories and characters from the expeditions of Captain James Cook in the eighteenth century to tracks depicted in Moby Dick and popular culture of the nineteenth century to the use of navigational techniques by the British navy She discusses how tracks evolved from tools of surveying into tools of surveillance and eventually into paths of environmental calamity The impulse to record tracks on the ocean is Caputo argues reflective of an ongoing desire for order schematization and personal visibility as well as occupation and permanent ownership in this case over something that is unoccupiable and impossible to truly possess Both beautifully written and deeply researched Tracks on the Ocean shares how the lines drawn on maps tell the audacious and often tragic and violent stories of ocean voyages

colonial bargains intended to avert future conflict What drove this quest for a more peaceful order In this highly original account John Shovlin reveals the extent to which Britain and France sought to divert their rivalry away from war and into commercial competition The two powers worked to end future conflict over trade in Spanish America the Caribbean and India and imagined forms of empire building that would be more collaborative than competitive They negotiated to cut cross channel tariffs recognizing that free trade could foster national power while muting enmity This account shows that eighteenth century capitalism drove not only repeated wars and overseas imperialism but spurred political leaders to strive for global stability
