The Place of the Mother Tongue in National Education (Classic Reprint) Henry Cecil Kennedy Wyld, 2018-02-07 Excerpt from *The Place of the Mother Tongue in National Education* The following pages contain an elaboration of some remarks which I designed to lay before the Meeting of the British Association in York at the beginning of last month Various circumstances prevented me from carrying out my purpose and I am therefore putting forth my views in their present form in the hope that they may form a slight contribution to a subject which is occupying some attention at the present moment and deserves to occupy more I hope that even if prejudiced criticism be wholly hostile both to the subject itself and the manner in which it is here dealt with the suggestions herein contained may yet at least serve as the nucleus of a concrete discussion from which some progress may result The conscientious objector may in time modify his views the serious and friendly critic will help on the cause About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Observations Upon the Natural History of Epidemic Diarrhoea (Classic Reprint) O. H. Peters, 2018-02-06 Excerpt from *Observations Upon the Natural History of Epidemic Diarrhoea* The causative agencies from which springs the plentiful harvest of child mortality in large cities may be conceived as a felted mass of rootlets almost inextricably intertwined Those of poverty bad housing bad feeding and neglect may be severally recognized but the extent of their interrelations with actual respiratory and alimentary disease those to which the greater part of the mortality is referred can be traced only with difficulty It is the object of this work to aid in the labour of cutting away the matrix and entangling fibres and to lay bare the hidden ramifications of at least one important causative agency epidemic diarrhoea This affection if we accept provisionally the more novel and generally favoured conception As to its nature is revealed as something very like an ordinary infectious disease and one which permeates all classes while the excessive mortality it gathers round itself in urban centres must be regarded as something superadded owing to the vicious circle it forms with those baneful conditions of slum life mentioned above On the other hand its peculiarly intimate association with the circumstances of domestic life from the continual faecal pollution of the interior of the household by infants and others tends to make it more so than other affections of the kind peculiarly a class disease and an especial scourge of dirty neighbourhoods Dirty towns may however be saved from excessive mortality by a high percentage of breast feeding A notable point in the interesting comparison that can be drawn between diarrhoea and typhoid fever is that in accordance with their peculiarly opposite age incidence curves the marked and habitual depositing of infectious excreta within the

household in the former disease may make the question of water closet versus conservancy pan a matter of far less importance than in the latter About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Critical Voices in Teacher Education Barry Down, John Smyth, 2012-04-28 We live in dangerous times when educational policies and practices are debated largely in terms of how they fit with the needs of the free market This volume is a collection of writing by teacher educators that draws on their unique biographies experiences and perspectives to denounce these misguided norms It explores what it means practically and intellectually to teach for social justice in conservative times In a globalised world where the power of capital holds sway the purposes of social institutions such as universities and schools is being refashioned in ways that are markedly instrumental and technicist in nature The consequence is that teachers work is increasingly constrained by regimes of control such as standardised testing accountability transparency and national curricula In the meantime large numbers of students and teachers are disengaging physically emotionally and intellectually from learning The contributors to this edited volume present both a powerful critique of these developments and a counter hegemonic vision of teacher education founded on the principles and values of social justice democracy and critical inquiry Teacher education they argue involves a commitment to critical intellectual work that subjects some deeply entrenched assumptions beliefs habits routines and practices to closer scrutiny The contributing authors expose how ideology and power operate in seemingly blameless rational ways to perpetuate social hierarchies based on class gender sexuality race and culture
